A. TBI and Stroke: What is the Same?, What is Different

Carol Ann Smith, RN, BAN, CNRN, Program Coordinator, Traumatic Brain Injury Center; Donna Lindsay, MN, RN, CNS-BC, CNRN, SCRN, Program Coordinator, Hennepin Stroke Center, Hennepin County Medical Center

June 14

Stroke and traumatic brain injury are among the leading causes of disability and death in the nation. This presentation will discuss the similarities and differences between these two significant health issues. Risk factors, signs and symptoms, treatment, functional loss, and prevention will be discussed.

B. A Second Chance: Expungement and Strategies for Overcoming Poor Criminal and Rental History

Paul Ziezulewicz, Staff Attorney, Southern Minnesota Regional Legal Services

July 13

Head injuries can affect development of temperance, judgment, and impulses which may contribute to criminality. Lack of housing can relate to these injuries. Negative criminal and rental records are significant barriers to stable employment or housing. Expungement and other legal strategies may assist TBI clients in need of a second chance.

C. Behaviors or Symptoms

Zach Tubbs, LSW, CBIS; Angela Bowles-Edwards, Minnesota Brain Injury Alliance

August 16

Often time a behavior individuals with brain injury exhibit is a symptom of their injury. In this training, participants will learn about the basics of brain injury and case studies will be reviewed to better understand behaviors vs. symptoms after brain injury.

D. Latino Culture and their Perspective on Brain Injury

Paula St John, MA, CBIS, Minnesota Brain Injury Alliance; Beatriz Martinez, Community Relations Manager, UCare

September 14

Participants will review the concepts of diversity, acceptance, and respect in the workplace. In this session, participants will learn about the Latino Culture and their view on brain injury. Participants will also learn strategies to provide continuity of care to their Latino patients/consumers.

E. About dating After Brain Injury: What Professionals Can Do to Help

Robert Karol, PhD, ABPP-RP, CBIST, President of Karol Neuropsychological Services & Consulting

October 11

Difficulties dating are some of the most common complaints of people with brain injury. Yet, too often professionals fail to adequately address this, leaving people with brain injuries frustrated and at a loss. This talk will identify why dating is difficult for persons with brain injury and why it is insufficiently addressed by professionals, and will make recommendations about how professionals should proceed.

F. Concussion for Case Managers, Social Workers, and Direct Care Providers

Zach Tubbs, LSW, CBIS; Angela Bowles-Edwards, Minnesota Brain Injury Alliance

November 16

A concussion is a type of traumatic brain injury. Concussions are an invisible injury, but the consequences are real. You don't have to lose consciousness to have a concussion. Some people will have obvious symptoms of a concussion, but other people won't. In this session, we will review signs and symptoms that accompany concussion, when to seek more urgent medical care, and strategies to return to school and normal daily activities.
