# Gale Warning

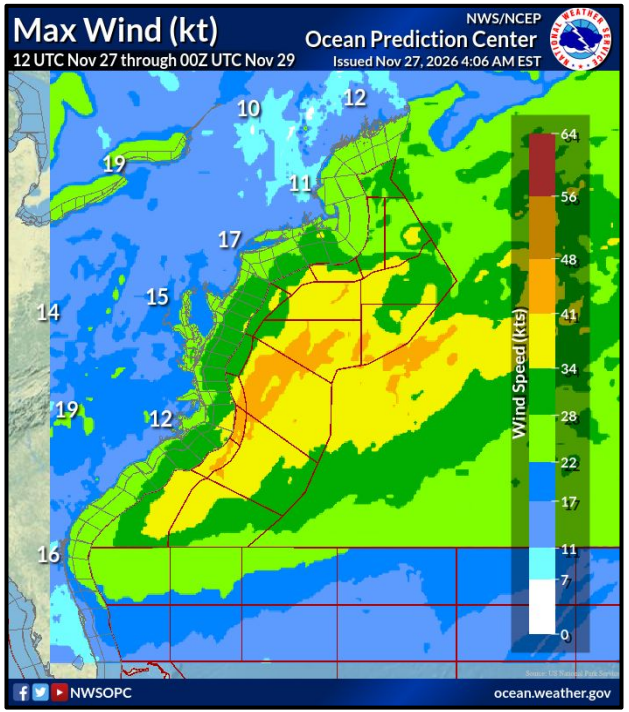
Today through Saturday (11/27-11/28)

November 27, 2026
0915 UTC

***CALL TO ACTION: Vessels should use caution or make avoidance plans depending on your vessel type and cargo.***

**KEY MESSAGES:**

- Broad low pressure over the lower Great Lakes and southern New England early today will move through New England today and tonight, being over the Canadian Maritimes Saturday, with associated cold fronts moving east today into tonight offshore of the east coast.
- Widespread gales from offshore of Delmarva and southward will spread north off of southern New England by tonight. Near gales and gale-force wind gusts will gradually spread back into the Gulf of Maine tonight.
- Sustained winds could be close to storm force today and tonight well offshore of the mid-Atlantic coast in and near the Gulf Stream. Regardless, mariners should be prepared for storm-force wind gusts in and near the Gulf Stream today, and then in and near the Gulf Stream offshore of the mid-Atlantic coast tonight into Saturday night.
- Gales from this system will eventually shift well out into the north Atlantic early Sunday.
- **Coastal interests should continue to monitor conditions and heed advice from local officials.**



*Maximum Sustained Wind Speed Forecast (kt) Valid 12 UTC November 27 through 00 UTC November 29*

National Oceanic and Atmospheric Administration

# Gale Warning

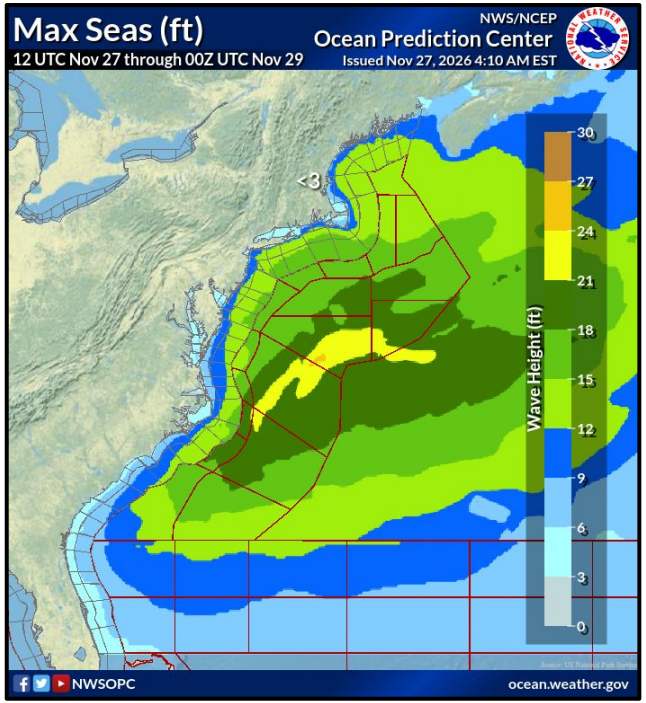
Today through Saturday (11/27-11/28)

November 27, 2026
0915 UTC

***CALL TO ACTION: Vessels should use caution or make avoidance plans depending on your vessel type and cargo.***

**KEY MESSAGES:**

- Widespread 12-foot and greater seas will persist through Saturday morning.
- Seas will approach 25 feet again in and near the Gulf Stream well offshore of the mid-Atlantic coast late today and tonight, continuing from around 20 to 25 feet Saturday.
- 12-foot and greater seas gradually move well out into the north Atlantic by early Sunday night.
- With the approach of another low moving into New England Monday, and its associated cold front extending south, mariners should prepare for renewed gales overnight Sunday and through Monday off of much of the east coast. Gales will continue off of New England and toward Georges Bank late Monday night into Tuesday.
- There is a chance of localized storm-force sustained winds with this next system. Mariners should monitor later forecasts. Winds and seas will be higher in and near thunderstorms along the cold front.
- Keep abreast of the latest in the tropics and high seas marine weather information at hurricanes.gov and ocean.weather.gov. This will be the final briefing update, with updates possible for the system early next week.



*Maximum Significant Wave Height Forecast (ft) Valid 12 UTC November 27 through 00 UTC November 29*
