

NYSOLAR SMART

Under the NY-Sun Initiative, the New York State Energy Research and Development Authority (NYSERDA), New York Power Authority (NYPA) and the City University of New York (CUNY) developed a [NYS Unified Solar Permit](#) aimed at reducing costs for solar projects under 12kW by streamlining municipal permitting processes. CUNY's NYSolar Smart program surveyed municipal officials across New York State to understand their photovoltaic (PV) permitting costs, procedures and issues, as well as to develop the permit.

Municipalities that adopt the unified permit and procedures are eligible for between \$2,500 and \$5,000, depending on population, through the New York State Cleaner, Greener Communities program.

CUNY will be conducting regional workshops for municipalities across New York State to ease the adoption of the permit and to hold roundtable discussions on the development of a solar permit for commercial installations. [REGISTER HERE](#)

NYSolar Smart Workshops

November 14th, Mohawk Valley Region

SUNY IT

860 Wildcat Drive, Donovan Hall Room 1229, Utica

November 15th, Capital District Region

Albany Community Development Agency

200 Henry Johnson Blvd, Community Room, 2nd Floor, Albany

November 19th, Western New York Region

Jacobs Executive Development Center

672 Delaware Avenue, Buffalo

November 20th, Finger Lakes Region

Rochester Institute of Technology, Louise Slaughter Hall,

CIMS Conference Room 2230/2240, Rochester

November 21th, Central New York Region

SUNY-ESF

Gateway Center, Forestry Drive & Campus Drive, Syracuse

December 12th, Westchester

New York Power Authority

123 Main Street, Jaguar Room, White Plains

AGENDA

9:00 - 11:00

NY Solar Smart Program

NYS Unified Solar Permit

Cleaner Greener Incentives

Early Adopter Case Study

Q & A

11:00 - 11:30

Networking Coffee Break

11:30 - 12:30

Roundtable Discussion

Developing a NYS Commercial Permit with NYS Solar Installers
