

2013 A to F Report Card Requirements and Timeline Updates

New Supplemental Information Required by USDE

The United States Department of Education has recently released a new set of guidelines for school report cards. In addition to the state requirements outlined by Oklahoma law, this year's report card will contain additional student performance information.

Please note that these new requirements **will not** affect the calculation of school or district grades in any way. This is supplemental information that will be reported in addition to the information that is already used for calculation of report card grades. Furthermore, you **do not** have to provide any additional information to OSDE for these sections. All the data needed for these sections have either already been collected or will be provided by a third party (e.g., the Oklahoma State Regents for Higher Education).

On the following pages are tables detailing all of the information you can expect to find on this year's report card. The first tables list the information that will be used to calculate A-F report card grades.* The first column identifies the sections. The second and third columns identify each component of the Report Card and the corresponding data that will make up that component, respectively. The remaining columns identify the source of the information, what action will be required of the school or district, and the timeframe for performing that action (if available). Most of these actions will require the use of several new Wave applications. Details for these applications (including training information) will be provided in a separate communication.

The last table details information that will be provided as an addendum to each report card. Again, the first column indicates each new section that will be included in the report card. The second column provides a brief description of the information that section.

Additional information will be provided through listserv and the OSDE website (<http://www.ok.gov/sde>) as it becomes available.

Any legislative changes – and emergency rules that result from those changes – may impact these requirements and timeline. The OSDE will post an updated version on the department website as new information becomes available.

* Geography, Social Studies, and History will not be included in the grade calculation for grades 3-8 this year due to field testing of these exams. They will be reinserted into the calculation for the 2013-2014 school year.
