

Cognos Access: In order to add users to Cognos, the user must also be given Security Administrator access in POS. This could be viewed as a potential audit issue.

The TxDMV and RTS Refactoring project team added a new Cognos security role that allows counties to grant permission to Cognos without requiring administrator rights. The new Cognos user role will be available **September 28th**. All members of the RTS Security Administrator group will be prepopulated in the Cognos User group and counties can then adjust group membership to fit their needs.

The screenshot shows the Texas Department of Motor Vehicles Registration & Title System interface. The header includes the logo and the text "Texas Department of Motor Vehicles HELPING TEXANS GO. HELPING TEXAS GROW." and "REGISTRATION & TITLE SYSTEM". The navigation menu includes "Customer", "Miscellaneous", "Reports", "Local Options", "Accounting", "Inventory", "Funds", "Exit", and "Help". The main content area is titled "Security Access Rights Reports SEC012". It displays the following information:

Employee Id:	12345
Employee Name:	SMITH PAT M

Below the employee information, there is a section titled "Reports" with a list of checkboxes:

- Reports
- Sales Tax Allocation
- Reprint Report
- Reprint Sticker Report
- Exempt Audit Report
- Title Package Report
- Electronic Title Report
- Suspected Fraud Report
- COGNOS Reports

The "COGNOS Reports" checkbox is circled in green. At the bottom of the form, there are three buttons: "Enter", "Cancel", and "Help".

A new job aid (Adding a Cognos User) that lists the steps to add a user to this group will be available on the RTS Refactoring Resources page on the TAC hub, which can be accessed by clicking the 🗉 icon on your RTS desktop or at <http://www.txdmv.gov/rts-refactoring-resources>.

Print Delay: Counties report print delays of various lengths.

The TxDMV and RTS Refactoring project team developed a solution to the print speed issues. This solution was deployed state wide on **September 25th**. County users should see a reduction in the time it takes for the first page to begin printing after completing a title or registration transaction. TxDMV continues to work on other reported printing issues and will provide you with regular updates on our progress

NMVTIS Report: Counties have requested that a “substation sort” be added to the NMVTIS report (rather than the transaction number sort currently used). This would be beneficial to counties who have multiple substations and increase the efficiency of using the report.

The TxDMV and RTS Refactoring project team updated the NMVTIS report to include a substation sort. The report now displays information sorted by County, Substation, Doc Number, and then VIN. This solution will be available **September 28th**.

GRAND TOTAL ERRORS - 19
 GRAND TOTAL WARNINGS - 0
 GRAND TOTAL IT - 0

Scan Guns: Counties have reported that USB Scan Guns do not read the bar codes for 7 character plates.

The TxDMV and RTS Refactoring project team implemented a solution for this issue on **September 9th**. USB Scan Guns now function normally.

Overtyping: Counties have reported that the system does not keep up with the speed at which some clerks can type.

The TxDMV and RTS Refactoring project team have resolved several of the issues that caused the system to remove characters when it could not keep up with the speed at which the clerks type. Specifically the issues related to customer middle names, check numbers, and title passenger vehicle selection have been resolved. This solution will be available **September 28th**.

RTS Color Scheme: Counties have reported that the RTS POS screen is too bright and does not have enough contrast between the different colors.

The TxDMV invited all counties to complete a survey to indicate their preference on a new color scheme for the RTS POS screens. The survey results were used to help determine the new color scheme. The screen shots below represent the new RITS POS color scheme. This is update will be available **September 28th**.

New color scheme for menu items and drop-downs:

Texas Department of Motor Vehicles
 HELPING TEXANS GO. HELPING TEXAS GROW.

Additional Features

Mandatory 24 Month Registration: The RTS POS application has been updated to include the mandatory 24 month registration.

New passenger cars or light trucks sold on a MCO by a Texas dealer with a two year inspection must receive 24 months of initial registration for certain registration classes. This also applies to new passenger cars and light trucks purchased on a MCO by a commercial fleet buyer. Used vehicles are not included.

IVTRS Processing: Transaction report order.

IVTRS results will now be returned with the "New" results in order of ITRNTPYMNTTIMESTAMP. This means that the IVTRS search will return transactions in the same order as the Net Revenue Details report.
