## U.S. International Transactions: Third Quarter 2012

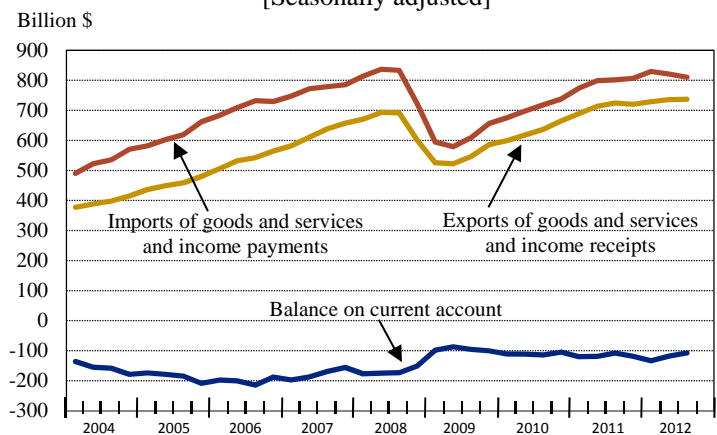

### Current Account

The U.S. current-account deficit—the combined balances on trade in goods and services, income, and net unilateral current transfers—decreased to \$107.5 billion (preliminary) in the third quarter from \$118.1 billion (revised) in the second quarter. The decrease in the current-account deficit was more than accounted for by a decrease in the deficit on goods. Changes in the other balances were relatively small.

#### Goods and services

The deficit on goods and services decreased to \$124.5 billion in the third quarter from \$137.4 billion in the second.

U.S. Current-Account Transactions  
[Seasonally adjusted]

NOTE: This news release is available on [BEA's Web site](http://www.bea.gov) <www.bea.gov> along with [Highlights](#) related to this release, the latest detailed [statistics](#) for U.S. international transactions, and a description of the [estimation methods](#) used to compile them. The third-quarter statistics in this release are preliminary and will be revised on March 14, 2013. All links in the text of this release—including archived versions of this release—refer to the latest available revised statistics.

Goods The deficit on goods decreased to \$173.9 billion in the third quarter from \$185.7 billion in the second.

Goods exports decreased to \$393.4 billion from \$394.1 billion. Decreases in three of the six major end-use categories were mostly offset by increases in the other three categories. The largest decrease was in industrial supplies and materials, which reflected decreases in nonferrous metals, in chemicals, and in petroleum and products. The major end-use categories with the largest increases were foods, feeds, and beverages and capital goods. The increase in foods, feeds, and beverages was largely due to an increase in soybeans, and the increase in capital goods was more than accounted for by an increase in completed civilian aircraft ([Table 2a](#)).

Goods imports decreased to \$567.3 billion from \$579.9 billion. Four of the six major end-use categories decreased. The largest decreases were in industrial supplies and materials and in capital goods. The decrease in industrial supplies and materials was more than accounted for by a decrease in petroleum and products. The decrease in capital goods was more than accounted for by a decrease in machinery and equipment, which was mostly due to a decrease in computers, peripherals, and parts. Changes in the other major categories were relatively small ([Table 2a](#)).

Services The surplus on services increased to \$49.4 billion in the third quarter from \$48.3 billion in the second.

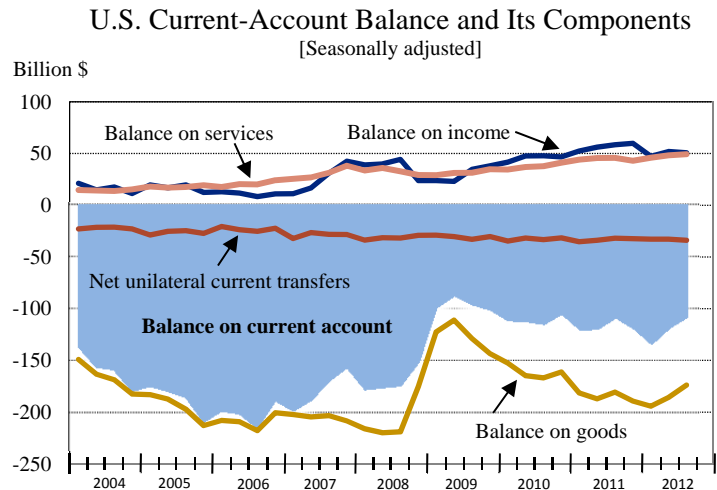

Services receipts increased to \$159.1 billion from \$157.6 billion. Five of the seven major services categories increased. The largest increase was in other private services, which includes items such as financial services, insurance services, and business, professional, and technical services.

Services payments increased to \$109.7 billion from \$109.2 billion. Four of the seven major services categories increased. The largest increase was in royalties and license fees, which included payments for the rights to broadcast the Summer Olympic Games in July and August.

### Income

The surplus on income decreased to \$50.8 billion in the third quarter from \$52.1 billion in the second.

Investment income Income receipts on U.S.-owned assets abroad increased to \$182.9 billion from \$182.5 billion. The increase was more than accounted for by an increase in direct investment receipts. Other private receipts, which consists of interest and dividends, decreased.

Income payments on foreign-owned assets in the United States increased to \$130.2 billion from \$128.5 billion. The increase was more than accounted for by an increase in direct investment payments. Other private payments decreased.

Compensation of employees Receipts for compensation of U.S. residents paid by nonresidents remained at \$1.5 billion in the third quarter. Payments for compensation of foreign residents paid by U.S. residents remained at \$3.4 billion.

#### Unilateral current transfers

Net unilateral current transfers to foreigners were \$33.8 billion in the third quarter, up from \$32.7 billion in the second. The increase was mostly due to an increase in the category of private remittances and other transfers. Examples of these transactions include U.S. immigrants' remittances to households abroad, taxes withheld on international transactions, U.S. charitable donations to foreign residents, and transfers between U.S. and foreign insurance companies.

#### Capital Account

Net capital-account transactions are not available for the third quarter because source data are not yet available. Net payments were \$0.3 billion in the second quarter, which was accounted for by capital transfers resulting from the forgiveness of debt owed to the U.S. government by foreign governments.

#### Financial Account

Net financial inflows were \$45.8 billion in the third quarter, down from \$105.0 billion in the second. Both U.S.-owned assets abroad and foreign-owned assets in the United States increased in the third quarter after decreasing in the second. The slowing of net financial inflows in the third quarter was primarily the result of a greater change in flows from the second quarter for U.S.-owned assets abroad than for foreign-owned assets in the United States.

#### U.S.-owned assets abroad

U.S.-owned assets abroad increased \$229.8 billion in the third quarter after decreasing \$248.2 billion in the second.

U.S. claims on foreigners reported by U.S. banks and securities brokers increased \$144.0 billion in the third quarter after decreasing \$267.0 billion in the second. Examples of these claims are U.S. banks' deposits at foreign banks and U.S. banks' loans to foreigners. The third-quarter increase was due to increases in claims for both customers' accounts and banks' own accounts ([Table 10a](#)).

U.S. sales of foreign securities exceeded purchases (net sales) by \$2.2 billion in the third quarter after net sales of \$6.5 billion in the second. Net sales of foreign stocks were \$2.1 billion, a shift from net purchases of \$21.0 billion in the second quarter. Net sales of foreign bonds were \$0.1 billion, down from \$27.5 billion in net sales in the second quarter ([Table 8a](#)).

U.S. direct investment abroad was \$101.4 billion in the third quarter, up from \$63.3 billion in the second. The increase was mostly accounted for by a shift of intercompany debt investment to net outflows in the third quarter from net inflows in the second quarter ([Table 7a](#)).

U.S. claims on unaffiliated foreigners reported by U.S. nonbanking concerns decreased \$0.2 billion in the third quarter after decreasing \$24.6 billion in the second.

U.S. official reserve assets increased \$0.8 billion in the third quarter after increasing \$3.3 billion in the second. The third-quarter increase reflected an increase in the U.S. reserve position in the International Monetary Fund (IMF) associated with U.S. loans to the IMF under New Arrangements to Borrow.

U.S. government assets other than official reserve assets decreased \$14.2 billion in the third quarter after decreasing \$16.7 billion in the second. The decreases in both quarters reflected reductions of central bank liquidity swaps between the U.S. Federal Reserve System and foreign central banks.

#### Foreign-owned assets in the United States

Foreign-owned assets in the United States increased \$282.0 billion in the third quarter after decreasing \$143.6 billion in the second.

U.S. liabilities to foreigners reported by U.S. banks and securities brokers, other than those recorded under foreign official assets, increased \$11.8 billion in the third quarter after decreasing \$214.4 billion in the second. Examples of these liabilities are deposits of foreign residents at banks in the United States and loans by banks abroad to banks in the United States ([Table 11a](#)).

Foreign private purchases of U.S. Treasury securities exceeded sales by \$47.9 billion in the third quarter, an increase from second-quarter net purchases of \$6.0 billion. The increase from the second quarter reflected a shift from foreign net sales of U.S. Treasury bills to net purchases ([Table 8a](#) and [Table 11a](#)).

Foreign private purchases of U.S. securities other than U.S. Treasury securities exceeded sales by \$47.7 billion in the third quarter, a shift from foreign net sales of \$43.1 billion in the second. Net purchases of U.S. stocks were \$37.4 billion, shifting from net sales of \$8.5 billion in the second quarter. Net sales of U.S. corporate bonds decreased to \$6.1 billion from \$38.2 billion in the second quarter. Net purchases of U.S. federally sponsored agency bonds increased to \$16.4 billion from \$3.6 billion in the second quarter ([Table 8a](#)).

Foreign direct investment in the United States was \$34.2 billion in the third quarter, down from \$48.0 billion in the second. The decrease was more than accounted for by lower net inflows of intercompany debt investment; equity investment was also lower. These decreases were partly offset by an increase in reinvested earnings in the third quarter ([Table 7a](#)).

U.S. liabilities to unaffiliated foreigners reported by U.S. nonbanking concerns decreased \$6.0 billion in the third quarter after decreasing \$27.0 billion in the second.

Foreign official assets in the United States increased \$130.3 billion in the third quarter after increasing \$79.8 billion in the second. The third-quarter increase was mostly due to net purchases of U.S. Treasury securities.

Net shipments of U.S. currency to foreign countries were \$16.2 billion in the third quarter, up from \$7.1 billion in the second.

Financial derivatives

Net outflows of financial derivatives were \$6.4 billion in the third quarter after net inflows of \$0.5 billion in the second.

The statistical discrepancy—the amount that balances the sum of the recorded credits and debits across all the accounts in the international transactions accounts—was \$61.7 billion in the third quarter compared with \$13.4 billion in the second.

In the third quarter, the U.S. dollar appreciated 0.1 percent on a trade-weighted quarterly average basis against a group of 7 major currencies. In the second quarter, the U.S. dollar appreciated 1.5 percent on the same basis. Exchange rate data are based on Federal Reserve Statistical Release H.10.

**Revisions**

The second-quarter 2012 international transactions are revised from previously published statistics. The current-account deficit was revised upward to \$118.1 billion from \$117.4 billion. The goods deficit was revised downward to \$185.7 billion from \$185.8 billion. The services surplus was revised upward to \$48.3 billion from \$46.5 billion. The income surplus was revised downward to \$52.1 billion from \$55.5 billion. Net outflows of unilateral current transfers were revised downward to \$32.7 billion from \$33.6 billion. Net financial inflows were revised upward to \$105.0 billion from \$88.5 billion.

p Preliminary r Revised n.a. Not available

<sup>1</sup> **Credits, +:** Exports of goods and services and income receipts; unilateral current transfers to the United States; capital account receipts; financial inflows—increase in foreign-owned assets (U.S. liabilities) or decrease in U.S.-owned assets (U.S. claims). **Debits, -:** Imports of goods and services and income payments; unilateral current transfers to foreigners; capital account payments; financial outflows—decrease in foreign-owned assets (U.S. liabilities) or increase in U.S.-owned assets (U.S. claims).

<sup>2</sup> Calculated excluding capital account transactions, net (line 39).

<sup>3</sup> The change shown here is calculated as the change from the prior period, not as the sum of changes in the above items.

Note: Details may not add to totals because of rounding. Source: U. S. Bureau of Economic Analysis
