

Eastern Team Link

The team link is slowly getting started as they have not had a team meeting since November 2014.

I will be working from Rockbeare the second Tuesday of each month to assist where I can, so far providing details to a staff member who had not obtained access to I-ways yet, he was then able to close down all the enquiries he had dealt with.

The team are endeavouring to ensure the jobs that are programmed for this year's budget are completed.

Design jobs for next year have started for drainage, urban estates and patching. Fully committed for next year to assist SWH in programming works.
