

## DCC staff facility to use SWH vehicles

As part of the continued focus on partnership working Devon Highways Board has agreed that, where possible, DCC employees can request the use of available SWH vehicles. This is a way of getting the most from the available combined fleet of vehicles which are charged to the contract.

## How will it work?

Any DCC staff member wishing to use SWH vehicles would need to sign up and comply to SWH driving requirements. The main points regarding this are:

- The vehicles are fitted with trackers which record personal data on staff use including location and driving speeds
- Drivers would sign up to the SWH managing alcohol and drug testing policy which includes; random testing, testing on suspicion of intoxication and following a traffic incident
- Mandatory check with DVLA on driver licence details and any endorsements

For those wishing to take this up you will need to contact the appropriate Works Manager, in order to obtain further details and to complete and submit the required consent form.
