Q3014	Facilitation of Telemedicine	1 case presentation	49.79	N/A	
H0046	Client Status Review	1 review	40.04	Every 90-135 days	

Services that are provided via telemedicine require a procedure code modifier "GT" to designate that the service was not performed in person. When applicable, providers should report multiple procedure code modifiers with a single procedure code as appropriate. For example, report both modifier U7 and GT with procedure code 90847 if the family psychotherapy with the patient present was provided for 30 minutes via telemedicine (90847-U7-GT)
