

# Let's Talk Alcohol and Pregnancy FREE Webinar

## Did you know that...

- ❑ 1 in 7 women continue to drink during pregnancy in the U.S.?
- ❑ 47,860 Alaskans are estimated to have an FASD
- ❑ 4.2% of those seen by FASD Diagnostic Teams meet criteria for FAS

This webinar will help providers understand the issues re: women & alcohol use, prenatal alcohol exposure, and FASD prevention via routine alcohol screening & brief intervention strategies. We are deeply concerned that the number of women drinking during pregnancy has continued to increase over the past few years.

**Speaker: Marilyn Pierce-Bulger, APRN (MN, FNP-BC, CNM)**

**Alaska Center for FASD**

# CE Available for;

MDs, APRNs, PAs, & Nurses
