

## **Walnut Park – Walnut Street, et al**

### **Project Scope**

The project includes the following proposed work:

- Reconstruction of roadways with cement-treated base, recycled asphalt, and rubberized asphalt surface layer for 7.1 miles of local road network
- Over 50 concrete curb ramps to be replaced to meet Americans with Disabilities Act requirements
- Over 30 damaged concrete driveway approaches to be replaced
- Sidewalk repairs due to tree root damage, etc.
- Trimming and root pruning 30 trees where sidewalk was damaged

### **Project Benefits**

This project will improve residents' quality of life and lessen vehicle wear and tear. This project will also help preserve natural resources by using recycled and in-place materials, resulting in cost savings and reduced greenhouse gas emissions, energy, and landfill deposition.

### **Community Outreach**

A flyer was issued for a community meeting held in April to introduce the community to the upcoming project. Furthermore, a project information flyer and a construction brochure will be provided just after the project has been awarded. The County will hold an on-site meeting 3-6 weeks prior to the start of construction.

### **Cost Estimate**

The total project cost is \$14,500,000; the construction cost is \$12,500,000.

### **Economic Impact**

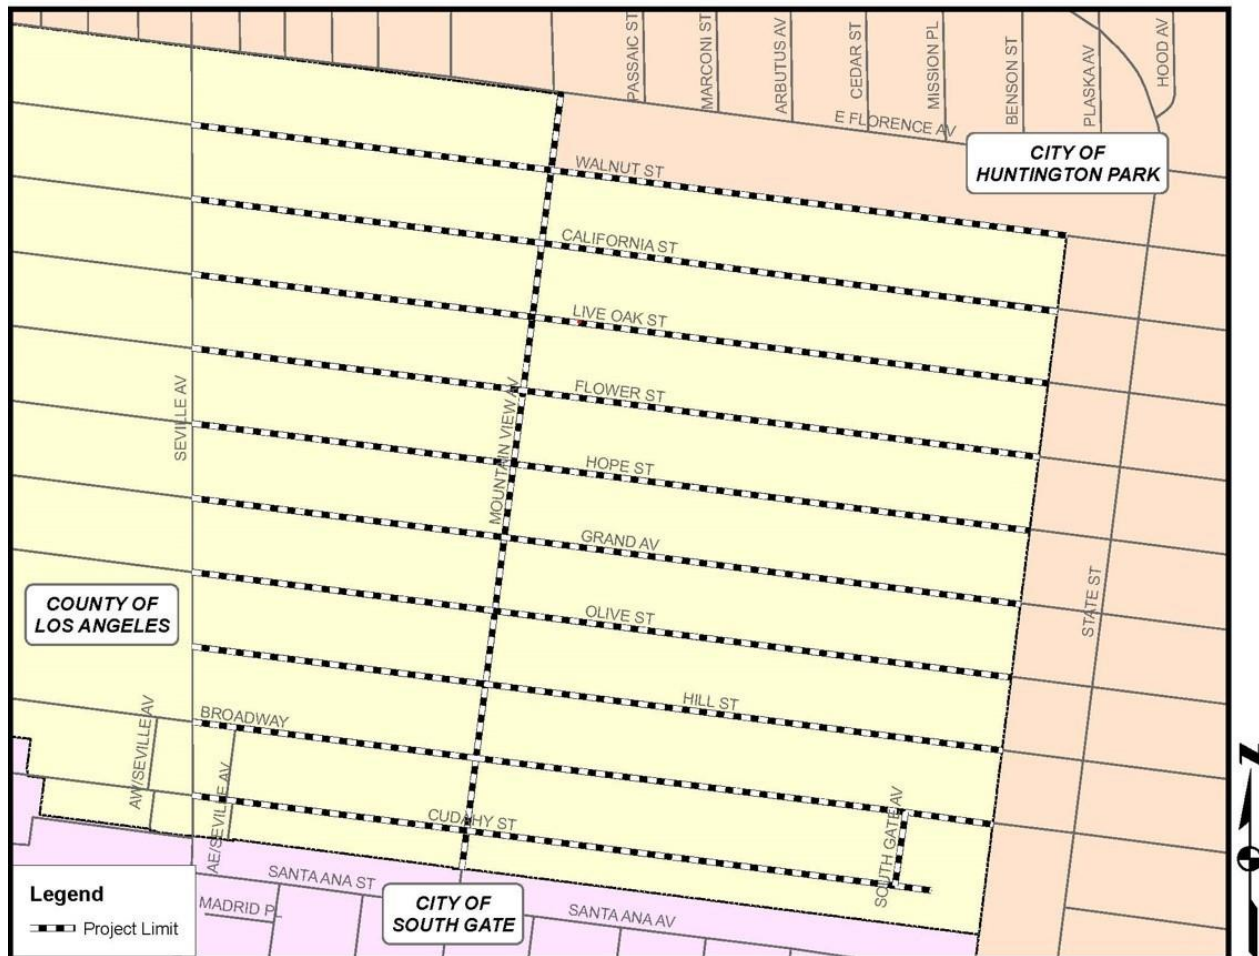

The project construction supports 140 direct and indirect jobs.

### **Schedule**

Final Plans were completed in Winter 2022. The project is anticipated to be advertised in Summer 2023 with a start of construction in Fall 2023.

## Project Location

Unincorporated County Community of Walnut Park.

## 7.1 Miles of Full Depth Street Reconstruction
