

Fast growing solar company in Roseville seeks an experienced, reliable, service-minded Lead Solar Installer. As part of the solar installation crew, you will be installing, managing and supervising the installation.

You **MUST have at least 1-year experience** as a Lead Solar Installer, with expertise in:

Conducting Site Surveys and Inspections

Working with Inverters

Bending Conduit

Landing Breakers in the Main Panel

Hanging and Wiring Inverters

Installing Solar Roof Mounted Feet

Racking Systems

Laying Modules

This experience is a **MUST**. Please do not respond to this position if you do not have this experience.

Duties include but are not limited to:

Quality control.

Supervising while assisting a crew of 2 – 5 installers, managing their work and hours.

Coordinating job scheduling with sales representatives and/ or office staff as needed.

Making sure all aspects of the solar installation project are planned and performed according to company procedures, city or county codes and safety standards.

Pulling permits necessary for installation.

Job Type: Full-Time

Compensation: \$24 to \$27 per hour, depending upon experience

Required: Must successfully complete a pre-employment background screening, drug screen, reference checks and verification of a clear driving record.
