Data through week ending 11/14/2020

Summary of Confirmed COVID-19 Cases, San Diego County Residents

COVID-19 Confirmed and Probable Cases by Onset* Week

*When onset date is unavailable, specimen collection date, date of death, or date reported is used instead.

**Probable cases are antigen positive tests received since August 1, 2020.

November 17, 2020

Data through week ending 11/14/2020

Table 1. Confirmed COVID-19 Cases and Deaths

Summary of San Diego County Confirmed COVID-19 Cases and Deaths			
Confirmed cases	64,768	Deaths	926
Hospitalizations	4,197 (6%)	Underlying Conditions	883 (95%)
Illness onset date range*	2/14/2020-11/14/2020	Death date range	3/21/2020-11/12/2020
Median age	35 years	Median age	77 years
Age range	0-107 years	Age range	23-102 years
Male	31,528 (49%)	Male	531 (57%)
Female	33,062 (51%)	Female	395 (43%)
Healthcare workers	4,612 (7%)	Case Fatality Ratio	1.4%
Summary of Non-County Resident COVID-19 Cases			
Confirmed cases	5,442	Hospitalizations	563 (10%)

*When onset date is unavailable, specimen collection date, date of death, or date reported is used instead.

Note: percentage hospitalized and healthcare workers are calculated based on the total number of cases; information may be unknown in some cases.

Confirmed COVID-19 Cases by Geography

Figure 10. Cumulative COVID-19 Rates by Zip Code of Residence, San Diego County (Countywide Rate = 1,932 per 100,000 Population)

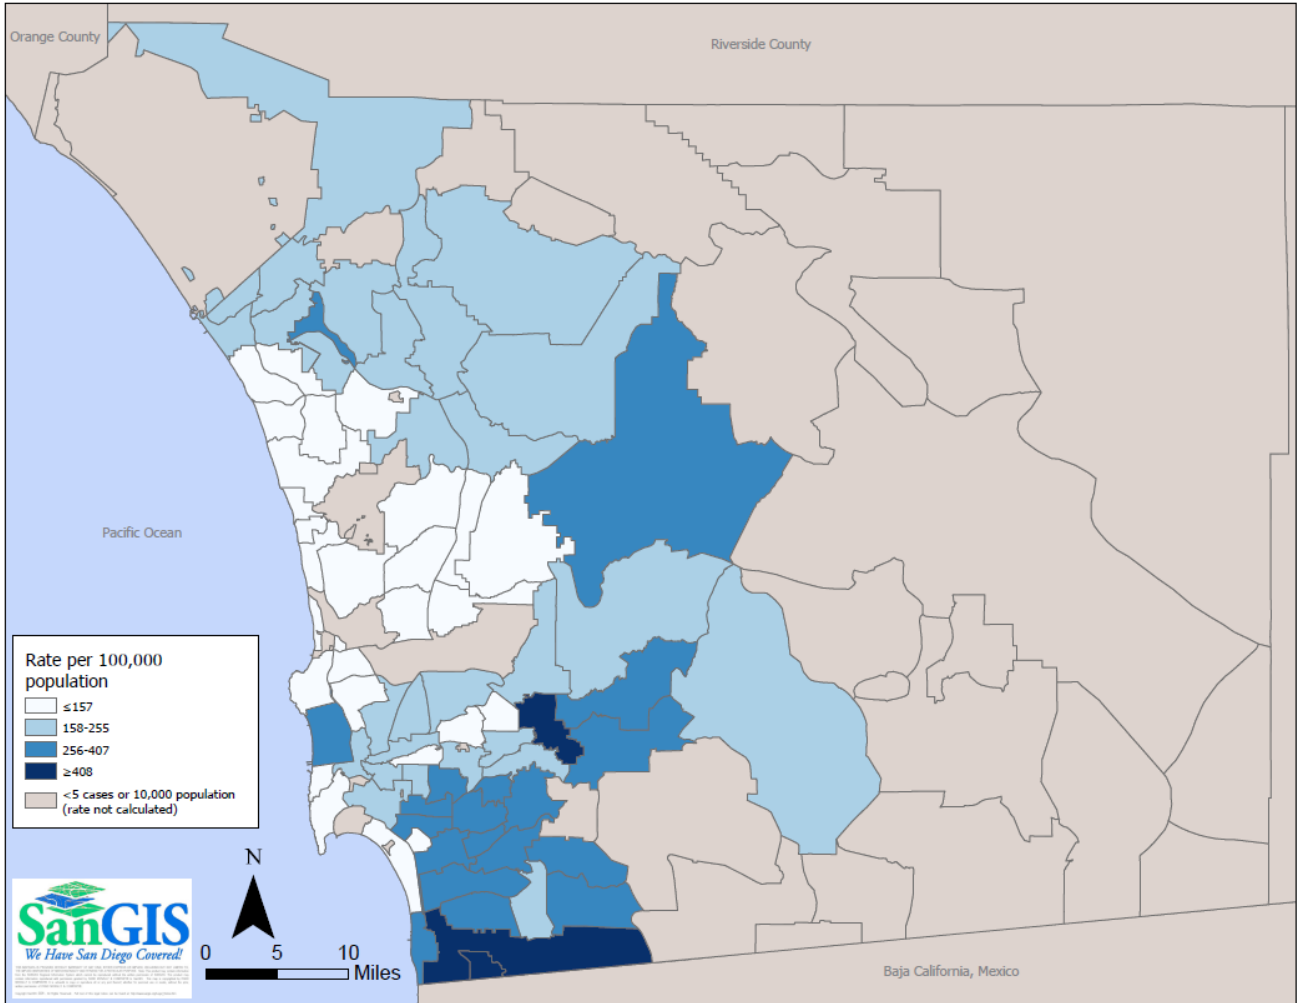

Rates calculated using 2019 population estimates from the San Diego Association of Governments. Rates not calculated for counts under 5 cases or populations less than 10,000. Zip code is zip code of residence, which may not be location of exposure. Case [counts and rates](#) for each zip code are updated routinely on the County of San Diego COVID-19 website.

COVID-19 Potential Exposure Settings

Table 2. COVID-19 Potential Exposure Settings, San Diego County Residents

Confirmed COVID-19 Case Summary	Last 2 Weeks (11/1 – 11/14)		Cumulative (6/5 – 11/14)	
Total Positive Cases	7,661		56,529	
Number Interviewed	4,917		42,834	
Selected Characteristics among those with Completed Interviews	Count	%	Count	%
Potential Community Exposure Settings*				
At least one potential community exposure setting	2,946	59.9%	23,499	54.9%
Bars and Restaurants	487	9.9%	3,942	9.2%
Beach	11	0.2%	221	0.5%
Casinos	47	1.0%	369	0.9%
Group Gathering	244	5.0%	1,892	4.4%
Gyms	35	0.7%	178	0.4%
Hair Salon or Barber	117	2.4%	1,061	2.5%
Places of Worship	168	3.4%	789	1.8%
Protest	0	0.0%	47	0.1%
Retail	401	8.2%	3,722	8.7%
Workplace**	1,699	34.6%	13,345	31.2%
Other	226	4.6%	1,739	4.1%
No potential exposure setting reported	1,971	40.1%	19,335	45.1%
Average number of community settings visited	1.8		1.7	
Range of community settings visited	1-13		1-24	
Household Exposure***	1,686	34.3%	14,419	33.7%
Any Travel-related Exposure	998	20.3%	7,423	17.3%
Visited Mexico	366	7.4%	2,910	6.8%
Any Education-related Exposure	224	4.6%	1,389	3.2%
K-12 schools	126	2.6%	427	1.0%

*Potential community exposure settings are defined as indoor or outdoor locations in which cases came within 6 feet of anyone who was not a household member for at least 15 minutes during the 2-14 days prior to symptom onset, even if the case wore a mask or facial covering. Potential exposure settings are places case-patients visited during their exposure period, not confirmed sources of infection. Persons may have visited more than one location.

**Workplaces may include other community settings (e.g., bar/restaurant, hair salon, retail).

***Persons with household exposures reported having close contact with someone in their household with laboratory-confirmed COVID-19, though this was not independently verified. Household exposures may have occurred outside the 2-14 days prior to symptom onset.

Data through week ending 11/14/2020

Emergency Department Data

Figure 16. Percent of Emergency Department Visit Chief Complaints for ILI, Respiratory Symptoms, Fever, or COVID-like Illness* by Week, San Diego County

Categories are not mutually exclusive. *COVID-like Illness includes fever and cough, shortness of breath, or difficulty breathing OR coronavirus diagnostic codes.

Figure 17. Percent of Emergency Department Visit Chief Complaints for ILI, Respiratory Symptoms, Fever, or COVID-like Illness* by Week, San Diego County Among Patients Age 60 Years or Older

Categories are not mutually exclusive. *COVID-like Illness includes fever and cough, shortness of breath, or difficulty breathing OR coronavirus diagnostic codes.

November 17, 2020

Data through week ending 11/14/2020

COVID-19 Watch Data Sources

The following sources of data are used to produce this report:

- **COVID-19 case reports:** Medical providers and laboratories report individual cases of PCR-confirmed COVID-19 via fax or electronic laboratory reporting (ELR) to the County of San Diego Epidemiology Unit.
- **COVID-19 deaths:** The County of San Diego requests that all deaths related to COVID-19 be reported for surveillance purposes. Medical facilities may report these deaths directly to the Epidemiology Unit or they may be identified by the Office of Vital Records through death certificate registration. The Epidemiology Unit compiles the data, and only reports deaths that can be verified by a death certificate.
- **Emergency Department Chief Complaint Data:** Electronic emergency department data are reported to the Epidemiology Unit daily. The number of respiratory chief complaints and the number of total emergency department visits are used to calculate percentages for all respiratory-related visits and visits specific to influenza-like illness, fever, and COVID.
- **COVID-19 outbreaks:**
 - Skilled Nursing Facilities: at least one case of laboratory-confirmed COVID-19 in a resident.
 - Non-SNF Institution/Congregate Settings: at least one case of laboratory-confirmed COVID-19 in the setting of ≥ 2 cases of acute illness compatible with COVID-19 in residents or staff members of residential congregate settings with onset within a 14-day period.
 - Community settings: three or more laboratory-confirmed COVID-19 cases in different households in a cluster of 2 or more acute illnesses compatible with COVID-19** with onset within a 14-day period.
- **SANDAG population estimates, vintage 2019:** Rates are calculated using 2019 population estimates from the San Diego Association of Governments. Rates are not calculated for counts under five cases.

The purpose of the weekly **COVID-19 Watch** is to summarize current COVID-19 surveillance in San Diego County.

Data are preliminary and may change due to delayed reporting and additional information obtained during investigations.
