COVID-19 Confirmed and Probable Cases by Onset* Week

*When onset date is unavailable, specimen collection date, date of death, or date reported is used instead.

**Probable cases are antigen positive tests received since August 1, 2020.

December 8, 2020

Data through week ending 12/5/2020

Table 1. Confirmed COVID-19 Cases and Deaths

Summary of San Diego County Confirmed COVID-19 Cases and Deaths			
Confirmed cases	92,171	Deaths	1,062
Hospitalizations	4,871 (5%)	Underlying Conditions	1,015 (96%)
Illness onset date range*	2/14/2020-12/5/2020	Death date range	3/21/2020-12/4/2020
Median age	35 years	Median age	77 years
Age range	0-107 years	Age range	23-102 years
Male	44,557 (49%)	Male	618 (58%)
Female	47,328 (51%)	Female	444 (42%)
Healthcare workers	6,143 (7%)	Case Fatality Ratio	1.2%
Summary of Non-County Resident COVID-19 Cases			
Confirmed cases	7,497	Hospitalizations	614 (8%)

*When onset date is unavailable, specimen collection date, date of death, or date reported is used instead.

Note: percentage hospitalized and healthcare workers are calculated based on the total number of cases; information may be unknown in some cases.

COVID-19 Potential Exposure Settings

Table 2. COVID-19 Potential Exposure Settings, San Diego County Residents

Confirmed COVID-19 Case Summary	Last 2 Weeks (11/22 – 12/5)		Cumulative (6/5 – 12/5)	
Total Positive Cases	20,539		83,932	
Number Interviewed	9,537		58,467	
Selected Exposures among those with Completed Interviews	Count	%	Count	%
Potential Community Exposure Settings^a				
At least one potential community exposure setting ^b	4,493	47.1%	27,233	46.6%
Bars and Restaurants	867	9.1%	5,508	9.4%
Casinos	82	0.9%	547	0.9%
Group Gatherings	367	3.8%	2,749	4.7%
Gyms	33	0.3%	250	0.4%
Hair Salons or Barbers	230	2.4%	1,451	2.5%
Places of Worship	300	3.1%	1,236	2.1%
Protests	0	0.0%	47	0.1%
Retail locations	969	10.2%	5,275	9.0%
Workplaces ^c	3,427	35.9%	19,119	32.7%
No potential community exposure setting reported	5,044	52.9%	31,234	53.4%
Average number of community settings visited	1.5		1.5	
Range of community settings visited	1-14		1-24	
Household Exposures^d	3,617	37.9%	20,079	34.3%
Any On-site Education-related Exposures	519	5.4%	2,216	3.8%
Childcare/Preschools	106	1.1%	506	0.9%
K-12 schools	327	3.4%	1,059	1.8%
Colleges/Universities	98	1.0%	685	1.2%
Any Travel-related Exposures	1,387	14.5%	9,865	16.9%
Travel within the United States	829	8.7%	5,845	10.0%
Travel to Mexico	532	5.6%	3,827	6.5%
Travel to Another International Location	13	0.1%	97	0.2%

^a Potential community exposure settings are defined as indoor or outdoor locations in which cases came within 6 feet of anyone who was not a household member for at least 15 minutes during the 2-14 days prior to symptom onset, even if the case wore a mask or facial covering. Potential exposure settings are places case-patients visited during their exposure period, not confirmed sources of infection. Persons may have visited more than one location.

^b Effective 11/24/2020, travel exposures are excluded from community exposure settings.

^c Workplaces may include other community settings (e.g., bar/restaurant, hair salon, retail).

^d Persons with household exposures reported having close contact with someone in their household with laboratory-confirmed COVID-19, though this was not independently verified. Household exposures may have occurred outside the 2-14 days prior to symptom onset.

Data through week ending 12/5/2020

Emergency Department Data

Figure 16. Percent of Emergency Department Visit Chief Complaints for ILI, Respiratory Symptoms, Fever, or COVID-like Illness* by Week, San Diego County

Categories are not mutually exclusive. *COVID-like Illness includes fever and cough, shortness of breath, or difficulty breathing OR coronavirus diagnostic codes.

Figure 17. Percent of Emergency Department Visit Chief Complaints for ILI, Respiratory Symptoms, Fever, or COVID-like Illness* by Week, San Diego County Among Patients Age 60 Years or Older

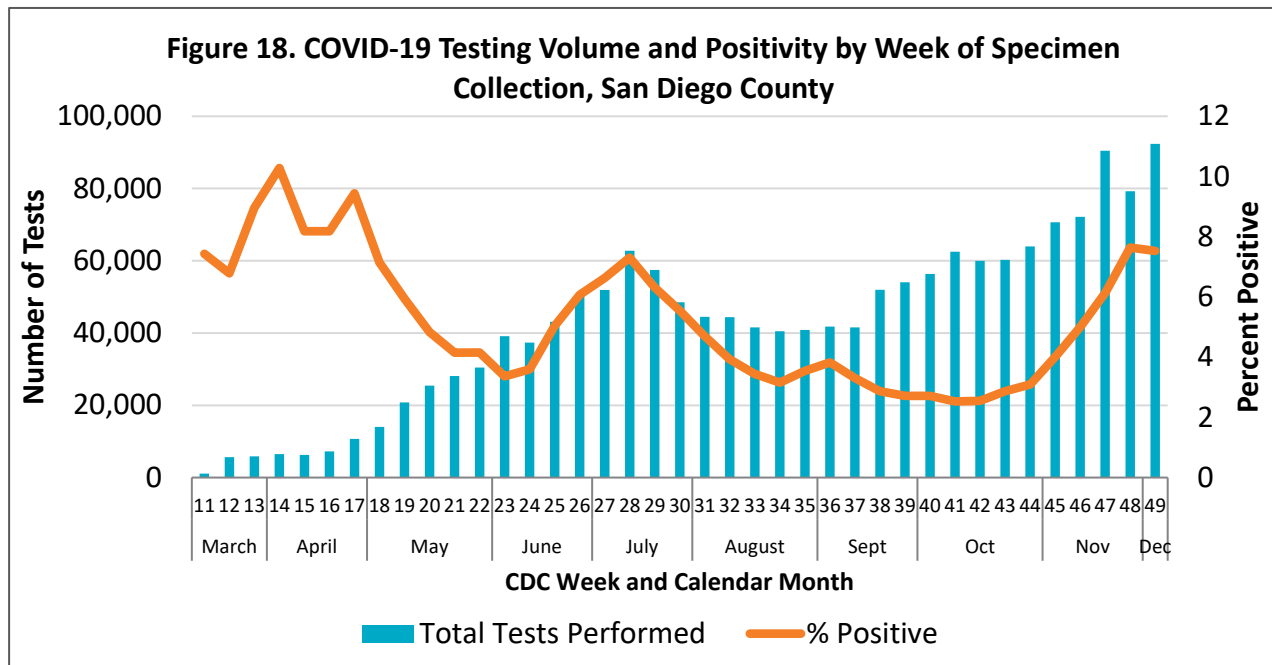

Categories are not mutually exclusive. *COVID-like Illness includes fever and cough, shortness of breath, or difficulty breathing OR coronavirus diagnostic codes.

December 8, 2020

Data through week ending 12/5/2020

COVID-19 Laboratory Test Positivity Rate

Includes PCR tests performed by COSD Public Health, hospital, and reference laboratories and reported via Electronic Laboratory Reporting (ELR) and line lists. Excludes invalid, indeterminate, and unsatisfactory results.

COVID-19 Watch Data Sources

The following sources of data are used to produce this report:

- **COVID-19 case reports:** Medical providers and laboratories report individual cases of PCR-confirmed COVID-19 via fax or electronic laboratory reporting (ELR) to the County of San Diego Epidemiology Unit.
- **COVID-19 deaths:** The County of San Diego requests that all deaths related to COVID-19 be reported for surveillance purposes. Medical facilities may report these deaths directly to the Epidemiology Unit or they may be identified by the Office of Vital Records through death certificate registration. The Epidemiology Unit compiles the data, and only reports deaths that can be verified by a death certificate.
- **Emergency Department Chief Complaint Data:** Electronic emergency department data are reported to the Epidemiology Unit daily. The number of respiratory chief complaints and the number of total emergency department visits are used to calculate percentages for all respiratory-related visits and visits specific to influenza-like illness, fever, and COVID.
- **COVID-19 outbreaks:**
 - Skilled Nursing Facilities: at least one case of laboratory-confirmed COVID-19 in a resident.
 - Non-SNF Institution/Congregate Settings: at least one case of laboratory-confirmed COVID-19 in the setting of ≥2 cases of acute illness compatible with COVID-19 in residents or staff members of residential congregate settings with onset within a 14-day period.
 - Community settings: three or more laboratory-confirmed COVID-19 cases in different households in a cluster of 2 or more acute illnesses compatible with COVID-19** with onset within a 14-day period.
- **SANDAG population estimates, vintage 2019:** Rates are calculated using 2019 population estimates from the San Diego Association of Governments. Rates are not calculated for counts under five cases.

The purpose of the weekly **COVID-19 Watch** is to summarize current COVID-19 surveillance in San Diego County.

Data are preliminary and may change due to delayed reporting and additional information obtained during investigations.
