COVID-19 Confirmed and Probable Cases by Onset* Week

*When onset date is unavailable, specimen collection date, date of death, or date reported is used instead.

**Probable cases are antigen positive tests received since August 1, 2020.

July 13, 2021

Data through week ending 7/10/2021

Table 1. Confirmed COVID-19 Cases and Deaths

Summary of San Diego County Confirmed COVID-19 Cases and Deaths			
Confirmed cases	284,399	Deaths	3,785
Hospitalizations	15,598 (6%)	Underlying Conditions	3,631 (96%)
Illness onset date range*	2/14/2020-7/10/2021	Death date range	3/21/2020-7/8/2021
Median age	35 years	Median age	77 years
Age range	0-112 years	Age range	10-106 years
Male	137,412 (49%)	Male	2,250 (59%)
Female	145,040 (51%)	Female	1,535 (41%)
Healthcare workers	12,624 (4%)	Case Fatality Ratio	1.3%
Summary of Non-County Resident COVID-19 Cases			
Confirmed cases	21,495	Hospitalizations	1,271 (6%)

*When onset date is unavailable, specimen collection date, date of death, or date reported is used instead.

Note: percentage hospitalized and healthcare workers are calculated based on the total number of cases; information may be unknown in some cases. Hospitalization counts are likely underreported and may increase as additional information is obtained.

Demographic Summary of Confirmed COVID-19 Cases

**Figure 2. Confirmed COVID-19 Cases by Age Group
San Diego County Residents, N=284,236***

*Age is unknown for 163 cases.

July 13, 2021

Data through week ending 7/10/2021

Demographic Summary of Confirmed COVID-19 Cases (continued)

**Figure 3. Confirmed COVID-19 Cases by Sex and Age Group
San Diego County Residents, N=282,316***

*Sex and age are unknown for 2,083 cases.

**Figure 4. Confirmed COVID-19 Cases by Race/Ethnicity
San Diego County Residents, N=230,364***

*Race and ethnicity are unknown for 54,035 cases.

COVID-19 Potential Exposure Settings

Table 2. COVID-19 Potential Exposure Settings, San Diego County Residents

Confirmed COVID-19 Case Summary	Last 2 Weeks (6/27/2021 – 7/10/2021)		Cumulative (6/5/2020 – 7/10/2021)	
	Count	%	Count	%
Total Positive Cases	2,040		276,130	
Number Interviewed	1,111		133,901	
Selected Exposures among those with Completed Interviews	Count	%	Count	%
Potential Community Exposure Settings^a				
At least one potential community exposure setting ^b	578	52.0%	58,510	43.7%
Bars and Restaurants	171	15.4%	9,958	7.4%
Casinos	7	0.6%	1,074	0.8%
Group Gatherings	64	5.8%	3,306	2.5%
Gyms	23	2.1%	641	0.5%
Hair Salons or Barbers	35	3.2%	2,465	1.8%
Places of Worship	48	4.3%	2,734	2.0%
Protests	0	0.0%	47	0.0%
Retail locations	116	10.4%	12,681	9.5%
Workplaces ^c	377	33.9%	42,370	31.6%
No potential community exposure setting reported	533	48.0%	75,391	56.3%
Average number of community settings visited	1.8		1.5	
Range of community settings visited	1-11		1-24	
Household Exposures^d	250	22.5%	48,192	36.0%
Any On-site Education-related Exposures	61	5.5%	6,142	4.6%
Childcare/Preschools	10	0.9%	1,304	1.0%
K-12 schools	45	4.1%	3,720	2.8%
Colleges/Universities	9	0.8%	1,227	0.9%
Any Travel-related Exposures	293	26.4%	18,541	13.8%
Travel within the United States	198	17.8%	11,643	8.7%
Travel to Mexico	78	7.0%	6,451	4.8%
Travel to Another International Location	15	1.4%	272	0.2%

^a Potential community exposure settings are defined as indoor or outdoor locations in which cases came within 6 feet of anyone who was not a household member for at least 15 minutes during the 2-14 days prior to symptom onset, even if the case wore a mask or facial covering. Potential exposure settings are places case-patients visited during their exposure period, not confirmed sources of infection. Persons may have visited more than one location.

^b Effective 11/24/2020, travel exposures are excluded from community exposure settings.

^c Workplaces may include other community settings (e.g., bar/restaurant, hair salon, retail).

^d Persons with household exposures reported having close contact with someone in their household with laboratory-confirmed COVID-19, though this was not independently verified. Household exposures may have occurred outside the 2-14 days prior to symptom onset.

Emergency Department Data

Figure 16. Percent of Emergency Department Visit Chief Complaints for ILI, Respiratory Symptoms, Fever, or COVID-like Illness* by Week, San Diego County

Categories are not mutually exclusive. *COVID-like Illness includes fever and cough, shortness of breath, or difficulty breathing OR coronavirus diagnostic codes.

Figure 17. Percent of Emergency Department Visit Chief Complaints for ILI, Respiratory Symptoms, Fever, or COVID-like Illness* by Week, San Diego County Among Patients Age 60 Years or Older

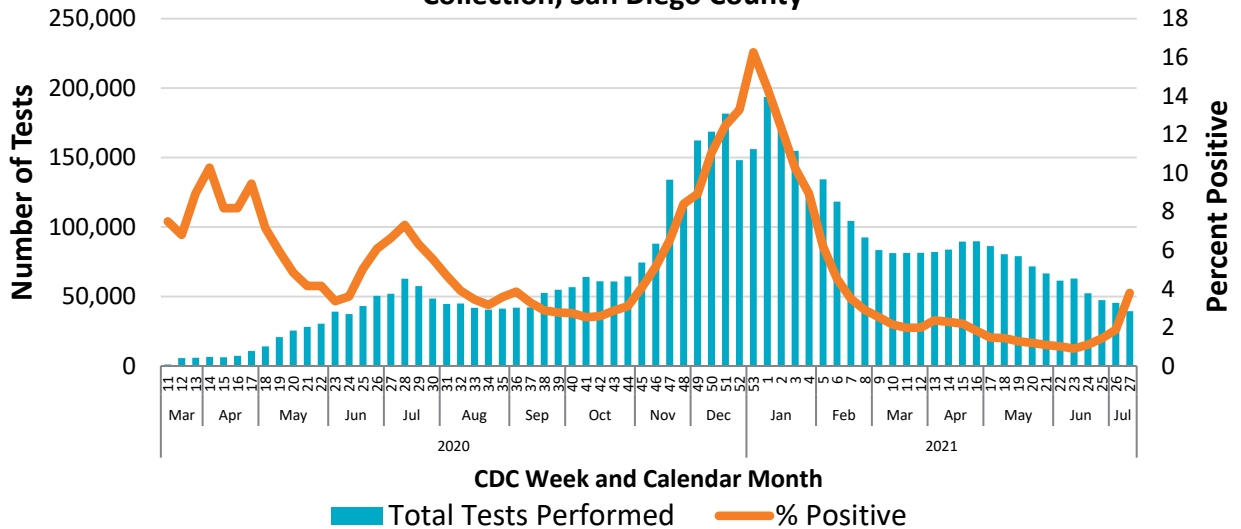

Categories are not mutually exclusive. *COVID-like Illness includes fever and cough, shortness of breath, or difficulty breathing OR coronavirus diagnostic codes.

July 13, 2021

Data through week ending 7/10/2021

COVID-19 Laboratory Test Positivity Rate

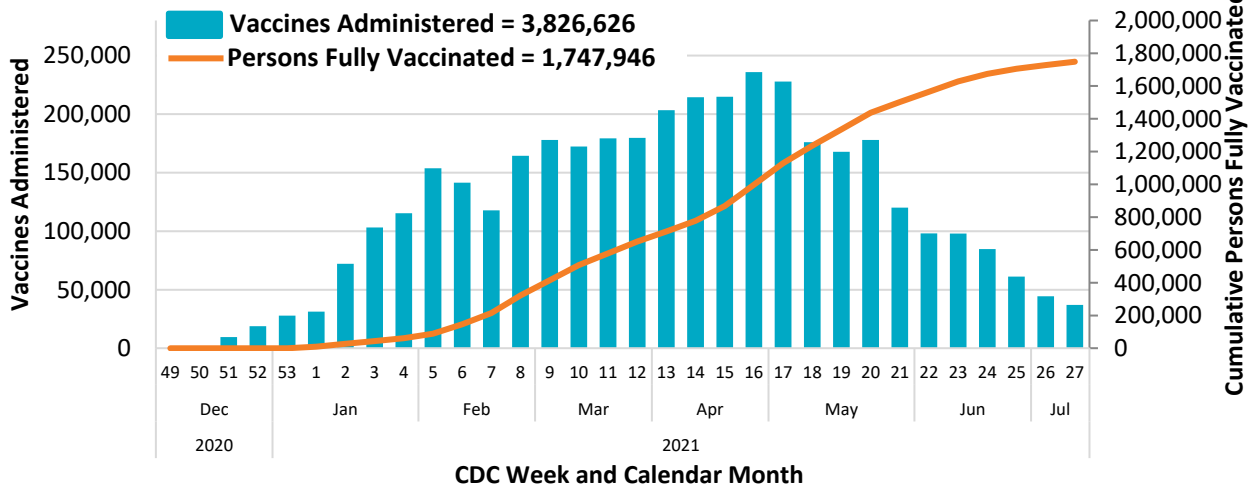

Figure 18. COVID-19 Testing Volume and Positivity by Week of Specimen Collection, San Diego County

Includes PCR tests performed by COSD Public Health, hospital, and reference laboratories and reported via Electronic Laboratory Reporting (ELR) and line lists. Excludes invalid, indeterminate, and unsatisfactory results.

COVID-19 Vaccinations

Figure 19. Number of COVID-19 Vaccinations Administered and Cumulative Number of Persons Fully Vaccinated by Week

The bars show vaccines administered, not individuals vaccinated. The line shows the cumulative number of persons fully vaccinated per the dose and schedule regimen for the vaccine received. Only includes vaccines that have been recorded in the San Diego Immunization Registry (SDIR). Some healthcare providers, including Veteran's Affairs, the Department of Defense, some tribal entities, and prisons do not report to SDIR. See this [dashboard](#), updated daily, for more detailed vaccine status information for San Diego County.

July 13, 2021

Data through week ending 7/10/2021

COVID-19 Postvaccination Infections

Figure 20. 7-Day Rolling Average COVID-19 Case Rate by Vaccination Status in San Diego County Residents since March 1, 2021

*If case did not have symptoms or illness onset date is unavailable, the earliest of specimen collection date, date of death, or date reported is used instead. San Diego County Population from SANDAG 2019 Population Estimates (Prepared June 2020) = 3,351,784. The fully vaccinated population for each day is the cumulative number of county residents documented to have received the final dose of COVID-19 vaccine more than 14 days prior to that day. The not fully vaccinated population is the estimated total county population minus the fully vaccinated population.

Table 3. COVID-19 Cases Among San Diego County Residents by Vaccination Status Since January 1, 2021

	Fully Vaccinated*	Not Fully Vaccinated	Total Cases
Cases	1,139 (1.1%)	106,724 (98.9%)	107,863
Hospitalizations	15 (0.3%)	5,185 (99.7%)	5,200
Deaths	4 (0.3%)	1,216 (99.7%)	1,220

*Cases who first tested positive (based on specimen collection date) greater than or equal to 14 days after receiving the final dose of COVID-19 vaccine. Percentages are among total cases, hospitalizations, and deaths for the time period.

July 13, 2021

Data through week ending 7/10/2021

COVID-19 Watch Data Sources

The following sources of data are used to produce this report:

- **COVID-19 case reports:** Medical providers and laboratories report individual cases of PCR-confirmed COVID-19 via fax or electronic laboratory reporting (ELR) to the County of San Diego Epidemiology Unit.
- **COVID-19 deaths:** The County of San Diego requests that all deaths related to COVID-19 be reported for surveillance purposes. Medical facilities may report these deaths directly to the Epidemiology Unit or they may be identified by the Office of Vital Records through death certificate registration. The Epidemiology Unit compiles the data, and only reports deaths that can be verified by a death certificate.
- **Emergency Department Chief Complaint Data:** Electronic emergency department data are reported to the Epidemiology Unit daily. The number of respiratory chief complaints and the number of total emergency department visits are used to calculate percentages for all respiratory-related visits and visits specific to influenza-like illness, fever, and COVID.
- **COVID-19 outbreaks:**
 - Skilled Nursing Facilities: at least one case of laboratory-confirmed COVID-19 in a resident.
 - Non-SNF Institution/Congregate Settings: at least one case of laboratory-confirmed COVID-19 in the setting of ≥ 2 cases of acute illness compatible with COVID-19 in residents or staff members of residential congregate settings with onset within a 14-day period.
 - Community settings: three or more laboratory-confirmed COVID-19 cases in different households in a cluster of 2 or more acute illnesses compatible with COVID-19** with onset within a 14-day period.
- **COVID-19 vaccinations:** Number of vaccinations registered in the San Diego Immunization Registry (SDIR) by participating providers. Some providers, including the VA, DoD, other military, some tribal, and prisons do not report to SDIR.
- **SANDAG population estimates, vintage 2019:** Rates are calculated using 2019 population estimates from the San Diego Association of Governments. Rates are not calculated for counts under five cases.

The purpose of the weekly **COVID-19 Watch** is to summarize current COVID-19 surveillance in San Diego County.

Data are preliminary and may change due to delayed reporting and additional information obtained during investigations.
