

HOW TO PLANT: Bare Root Seedlings

Step 1

Dig an ample sized hole for your seedling using guidelines in *Figure 1*.

Step 3

Place seedling into the center of the hole, at the correct planting depth, follow the guidelines in *Figure 1*.

Step 2

Before placing seedling into the hole, gently spread out the roots.

Step 4

Fill in dirt around the seedling halfway. Gently tamp soil around the roots. Fill in the rest of the hole and again gently tamp the soil around the seedling.
