

# Florida Division of Emergency Management State Watch Office

**Morning Situation Report** 

Friday, November 21, 2025

# State Emergency Operations Center Activation Level

Level 2 Activation

### SERT On-Call Personnel

Position	Personnel	Phone	Email
<b>Operations Chief</b>	Amy Godsey	(850) 519-8483	Amy.Godsey@em.myflorida.com
Watch Officer	Woody Harvey	(850) 591-7939	Woodham.Harvey@em.myflorida.com
<b>Duty Officer</b>	Jay Griffin	(850) 524-4094	Kellen.Griffin-Jay@em.myflorida.com
<b>Operations Officer- Day</b>	Caleb Pitts	(850) 815-4001	SWP@em.myflorida.com
<b>Operations Officer- Swing</b>	Daniel Leader	(850) 815-4001	SWP@em.myflorida.com
<b>Operations Officer- Night</b>	Jim Lawhon	(850) 815-4001	SWP@em.myflorida.com
Meteorologist	Evan Newman	(850)-241-5606	Evan.Newman@em.myflorida.com
Plans Chief	Kaylynn Perry	(850) 254-5657	Plans_Command@em.myflorida.com
Logistics Chief	Christina Goetzman	(850) 519-8581	Christina.Goetzman@em.myflorida.com
<b>Human Services Director</b>	Pam Hughes	(850) 528-5638	Pamela.Hughes@em.myflorida.com
<b>Emergency Services</b>	Tim Kenyon	(850) 591-7732	Tim.Kenyon@em.myflorida.com
Infrastructure Branch Director	Paige Lay	(850) 591-9933	paige.lay@em.myflorida.com
ESF 8 On-Call	Brandon Gore	(866) 786-4673	DLDOHDutyOfficers@flhealth.gov
Public Information Officer	Stephanie Hartman	(850) 570-3053	Stephanie.Hartman@em.myflorida.com
DEM Finance and Admin	Jeremy Smith	(850) 273-1273	Jeremy.Smith@em.myflorida.com

#### Response Regional Coordination Team

Team	County Location	Visits	
Region 1: Jim Roberts	Out of Service	Leave (See Coverage)	
Region 2: Enrique Gaston	Leon	Sheltering Coordination Meeting	
Region 3: Glen Hammers	Columbia	EOC Visit / Office Admin	
Region 4: Tara Kostich	Clay	G-400 Course Instruction Prep / Meeting w/ R4 Recovery Coordinator	
Region 5: Austin Beeghly	Seminole	Pandemic TTX / Cyber Coalition Meeting	
Region 6: Paul Siddall	Pasco	EM Director Meeting / Fuels Meeting	
Region 7: Kathryn Hollenbeck	Lee	L-449 Course / Return to R7 Travel	
Region 8: Amber Durden	Palm Beach	FAU EM Meeting	
Region 9: Brittany Bremer	Lee	FGCU Disaster Day Exercise	
Region 10: Claudia Baker	Broward	DEMES RM Training	

Region 1 Coverage Provided by Recovery Coordinator 1 Region 7 Coverage Provided by Recovery Coordinator 7 Region 10 Coverage Provided by Recovery Coordinator 8

**Status** 

**Normal Operations** 

Out of Service / Unavailable

#### Recovery Regional Coordination Team

Team	County Location	Status / Activities
Region 1: Allison Blevins	Walton	Administrative Duties
Region 2: Justin Lazzara	Leon	Internal Stakeholders Meeting
Region 3: Vacant	N/A	See Coverage
Region 4: Joshua Saunders	Clay	Regional Counterpart Meeting
Region 5: Elizabeth Caison	EMAC Deployment	See Coverage
Region 6: Rick Rogers	Citrus	Administrative Duties
Region 7: Antonio Zapata	Polk	Administrative Duties
Region 8: Ja-Pheth Butler-Miller	Indian River	FROC Assistance
Region 9: Jacob Ginsberg	Lee	County/FGCU Exercise
Region 10: Vacant	N/A	See Coverage

Region 3 Coverage Provided by Recovery Coordinator 2 & 4 Region 5 Coverage Provided by Recovery Coordinator 4 Region 10 Coverage Provided by Recovery Coordinator 8

#### Meteorology Summary

**Today's Weather Map** 

Threat	R1	R2	R3	R4	R5	R6	R7	R8	R9	R10
Lightning										
Tornado										
Damaging Wind										
Hail										
Flash Flooding										
Freeze (Overnight)										
Fog (Overnight)	L	L	M	Н	Н	Н	M	M	L	L
Wildfire	L	M	M	M	L	L	L	L	L	
Rip Currents	M	M	L	L	M	L		M	L	L
Lake Okeechobee Elevation	13.76 ft. (1.16 ft. <u>Below</u> Normal)									
Keetch-Byram Drought Index		494 (+6) on a scale from 0 (very moist) to 800 (very dry)								

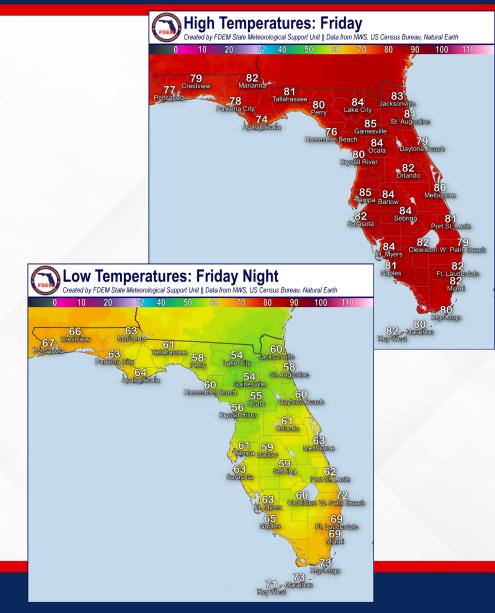

## Meteorology Summary

Statewide Overview, Next 24 Hours:

Locally dense fog has developed across much of the Panhandle and interior Northeast Florida this morning and Dense Fog Advisories will remain in effect until mid-morning. This morning fog will dissipate during the morning hours giving way to another sunny and dry day across the Sunshine State as an area of high pressure continues to dominate the local weather. A weak upper-level disturbance traversing the Ohio Valley will have an attendant cold front draped southward across the Southeast U.S. which may bring an isolated shower to the far western Panhandle this afternoon, though any activity will remain brief and light in nature (10-15% chance of rain). High temperatures will remain above average for mid to late November standards, reaching the upper 70s to middle 80s statewide. A few locations may approach record high temperatures this afternoon across North Florida.

Although winds will remain light and relative humidities will remain above critical thresholds this afternoon (40-50% RH values), **sensitive** to **locally elevated wildfire conditions** may develop this afternoon across North Florida where ongoing drought and extremely dry soils/vegetation may lead to easier wildfire ignition. *Please use extreme caution when dealing with any activities involving flame, or with materials that can cause sparks*.

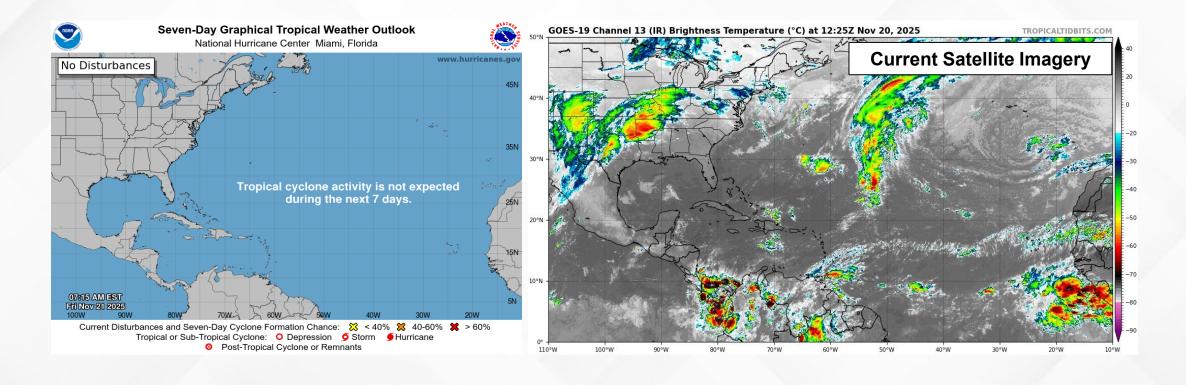

An isolated shower is possible across the western Panhandle overnight (10-15% chance of rain), with clear and calm conditions prevailing elsewhere encouraging another round of **fog and low clouds** early Saturday morning across portions of North and Central Florida. **Locally dense fog** cannot be ruled out, especially across interior Northeast and West-Central Florida. Low temperatures will fall into the middle to upper 50s across the Big Bend and Suwannee Valley, with upper 50s to middle 60s throughout the remainder of the Panhandle and Florida Peninsula. Lows will only reach the upper 60s to lower 70s across coastal Southeast Florida and the Florida Keys.

#### **Tropical Weather**

For the latest on the tropics, please visit the National Hurricane Center (NHC) at <a href="https://www.hurricanes.gov">www.hurricanes.gov</a>.

Tropical cyclone activity is *not expected* during the next 7 days in the Atlantic basin.

# Coastal Hazards & Hydrology

**Rip Currents**: A moderate risk of rip currents can be expected for most Florida Panhandle, Space Coast, and Treasure Coast beaches. Low risk conditions are expected for all other beaches across the state. For the latest Rip Current Outlook, visit <a href="https://www.weather.gov/beach">www.weather.gov/beach</a>.

**Marine Hazards**: Wave heights of around 1' can be expected for all Gulf facing beaches today, with waves of 1-2' along all East Coast beaches.

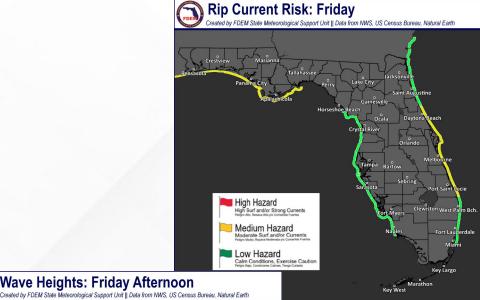

Red Tide was observed at background to low concentrations in Bay County, and background to very low concentrations in Gulf and Franklin Counties. Red tide was not observed in Southwest Florida or along the Florida East Coast over the past 7 days (*valid 11/14*).

Coastal Flooding: There is no risk for coastal flooding across Florida.

Flash Flooding: Flash flooding is not expected across Florida.

**Riverine Flooding:** Water levels at the headwaters of the St. Johns, including Lake Harney and Sanford, remain at Action Stage (bank-full) this morning. There are no other riverine concerns statewide. For more information, visit the River Forecast Center.

<u>Lake Okeechobee's</u> average elevation is 13.76 feet, which is within the operational band and is 1.16 feet <u>below</u> normal for this time of year.

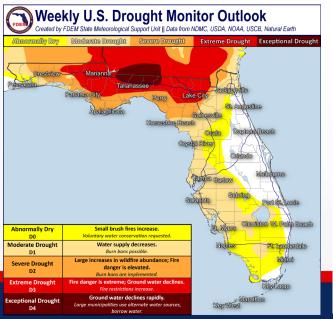

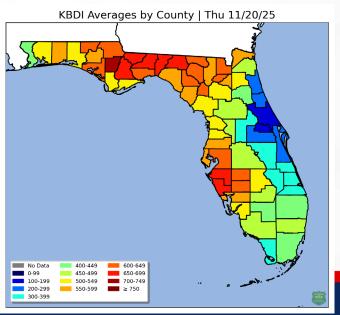

#### Drought & Fire Weather

<u>Fire Weather:</u> Dry air will continue across the Sunshine State, courtesy of a dominant area of high pressure. Relative humidity values will remain above critical thresholds this afternoon across the state (40-50% RH values), though ongoing drought and very dry soils/vegetation may still lead to <u>sensitive</u> to <u>locally elevated wildfire concerns</u> this afternoon, especially for locations that are experiencing the most significant long-term drought. Areas of <u>fog</u> that develop near any ongoing wildfires or active burns may locally further reduce visibilities. According to the <u>Florida Forest Service</u>, there are 57 active wildfires across the state burning approximately 641 acres.

Drought (11/20): The past week was almost entirely dry across the entire Sunshine State as temperatures warmed to above seasonable levels. As such, no improvements were made to this week's Drought Monitor and further degradation was seen. Across South Florida, Moderate Drought (level 1 of 4) was introduced across interior Collier, Broward, and Miami-Dade counties with expansion of Abnormally Dry (emerging drought) towards the Southeast coastline. Moderate Drought (level 1 of 4) was also introduced across Lee, Charlotte, Hendry, and Glades county, as well as around Lake Okeechobee where rainfall departures from the past month have neared 2-3 inches. Moderate Drought remains in place across much of West-Central Florida with further expansion into Polk county and northward along the entire Nature Coast. Rainfall departures from the past 60 days have grown to 4-6 inches across West-Central Florida. Across North Florida, Severe (level 2 of 4) to Extreme (level 3 of 4) have remained in place, with expansion southeastward of the Extreme Drought into much of Suwannee, Columbia, and western Baker County. Severe Drought was also added to much of the Forgotten Coast along Taylor and Dixie counties. An Exceptional Drought (level 4 of 4) was introduced to northern Gadsden, Leon, and Jefferson counties where streamflows have reached very low levels, vegetation has become very dry, and agricultural impacts have worsened. This is the first Exceptional Drought seen in the state of Florida since February 2012. Long-term rainfall departures continue to decline across the Panhandle, and significant rainfall is not expected over the next week as temperatures remain above seasonable levels. As such, worsening drought conditions are expected over the next week across much of the state.

The <u>Keetch-Byram Drought Index</u> average for Florida is **494 (+6)** on a scale from 0 (very wet) to 800 (very dry). There are <u>42</u> Florida counties (Alachua, Baker, Bay, Bradford, Calhoun, Charlotte, Citrus, Clay, Columbia, DeSoto, Dixie, Franklin, Gadsden, Gilchrist, Gulf, Hamilton, Hardee, Hernando, Highlands, Hillsborough, Holmes, Jackson, Jefferson, Lafeyette, Lee, Leon, Levy, Liberty, Madison, Manatee, Nassau, Okaloosa, Pasco, Pinellas, Santa Rosa, Sarasota, Suwannee, Taylor, Union, Wakulla, Walton, and Washington) that have an average KBDI above 500 (drought/increased fire danger).

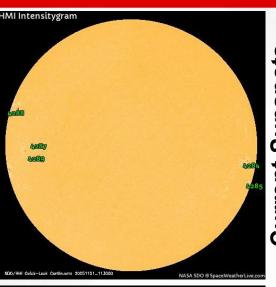

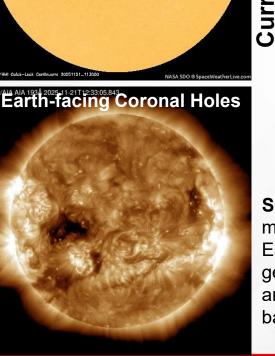

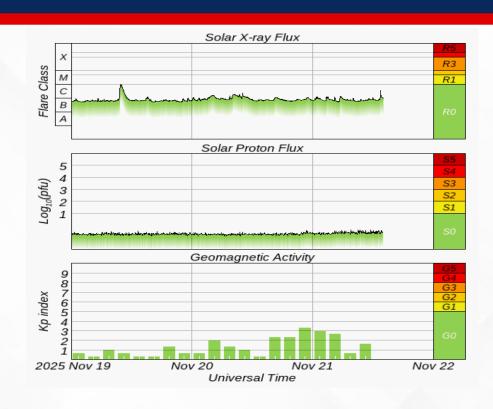

#### Space Weather

Solar Flare	Active Watches &	Past 24
Risk	Warnings	hours
M-class:	Geomagnetic Storm:	C1 Solar
15%	None	Flare
X-class:	Radiation Storm:	No Radio
1%	None	Blackout

48-Hour Geomagnetic Forecast				
11/21	11/22			
Max Kp= 3 (G0)	Max Kp= 3 (G0)			
Chance of minor activity = 15% severe activity = 1%	Chance of minor activity = 5% severe activity = 1%			

Space Weather: Solar activity is expected to remain at low levels through the weekend, with a slight chance for moderate levels. R1-R2 (minor to moderate) radio blackouts may accompany any organized solar flare, though current Earth facing sunspots remain stable. Enhancements in solar wind conditions are expected to continue today, though generally wane into the weekend as coronal hole influences slowly diminish. A return to nominal solar wind conditions are expected by Sunday. The Earth's geomagnetic field is likely to reach active conditions on Friday before diminishing back towards unsettled and quiet conditions this weekend. The overall space weather threat to Florida remains very low.
