Florida Division of Emergency Management
State Watch Office

Morning Situation Report

Thursday, November 19, 2026

State Emergency Operations Center Activation Level

Level 1: Full Activation

SERT On-Call Personnel

Position	Personnel	Phone	Email
Operations Chief	Amy Godsey	(850) 519-8483	Amy.Godsey@em.myflorida.com
Watch Officer	Woody Harvey	(850) 591-7939	Woodham.Harvey@em.myflorida.com
Duty Officer	Austin Johnson	(850) 296-5680	Austin.Johnson@em.myflorida.com
Operations Officer- Day	Ahnaya Benjamin	(850) 815-4001	SWP@em.myflorida.com
Operations Officer- Swing	Wyatt Duclos	(850) 815-4001	SWP@em.myflorida.com
Operations Officer- Night	Jim Lawhon	(850) 815-4001	SWP@em.myflorida.com
Meteorologist	Connor Stoll	(850) 228-1082	Connor.Stoll@em.myflorida.com
Plans Chief	Claudia Riddle	(850) 755-2924	Plans_Command@em.myflorida.com
Logistics Chief	Christina Goetzman	(850) 519-8581	Christina.Goetzman@em.myflorida.com
Human Services Branch Director	Pam Hughes	(850) 528-5638	Pamela.Hughes@em.myflorida.com
Emergency Services Branch Director	Tim Kenyon	(850) 591-7732	Tim.Kenyon@em.myflorida.com
Infrastructure Branch Director	Paige Lay	(850) 591-9933	Paige.Lay@em.myflorida.com
ESF 8: Health & Medical On-Call	Hunter Stafford	(866) 786-4673	DLDOHDutyOfficers@flhealth.gov
ESF 14: Public Information Officer	Stephanie Hartman	(850) 570-3053	Stephanie.Hartman@em.myflorida.com
Finance Chief	Jeremy Smith	(850) 273-1273	Jeremy.Smith@em.myflorida.com

Response Regional Coordination Team

Team	County Location	Visits
Region 1: Jim Roberts	Out of Service	Leave (See Coverage)
Region 2: Enrique Gaston	Jefferson	County EM Meeting / RCT Meeting
Region 3: Glen Hammers	Columbia	Response Coordination Team Meeting
Region 4: Tara Kostich	Duval	Jacksonville EPU Meeting
Region 5: Austin Beeghly	Brevard, Volusia, Seminole	Flood Response
Region 6: Paul Siddall	Hillsborough	RCT Meeting / Vehicle/Equipment Maintenance
Region 7: Brian Carey	Polk	SWFL LEPC Meeting / RCT Meeting
Region 8: Keila Puello	St Lucie, Martin, Palm Beach	Flood Response / RCT Meeting
Region 9: Brittany Bremer	Lee	SWFL LEPC Meeting / RCT Meeting
Region 10: Claudia Baker	Miami-Dade, Broward	Flood Response / RCT Meeting

Region 1 Coverage Provided by Recovery Coordinator 1

Status
Normal Operations
Out of Service / Unavailable

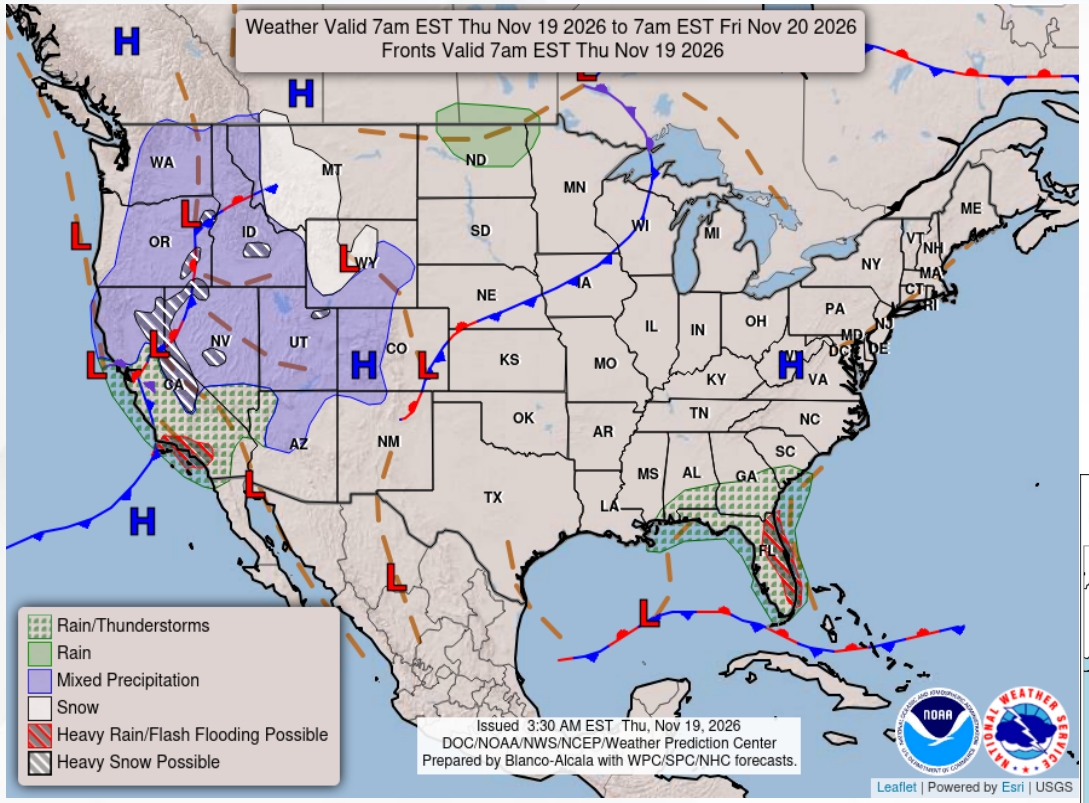

Recovery Regional Coordination Team

Team	County Location	Status / Activities
Region 1: Allison Blevins	Walton	Admin Duties / On Call Region 1
Region 2: Justin Lazzara	Jefferson	EM Meeting
Region 3: Kevin Blom	Taylor	LTRG Meeting
Region 4: Joshua Saunders	St Johns	LMS Meeting
Region 5: Vacant	N/A	N/A (See Coverage)
Region 6: Rick Rogers	Out of Service	Leave (See Coverage)
Region 7: Vacant	N/A	N/A (See Coverage)
Region 8: Vacant	N/A	N/A (See Coverage)
Region 9: Vacant	N/A	N/A (See Coverage)
Region 10: Brian Lee	Broward	Fall Flooding

Region 5 Coverage Provided by Recovery Coordinator 4
Region 6 Coverage Provided by Recovery Coordinator 3
Regions 7, 8 & 9 Coverage Provided by Recovery Coordinator 10

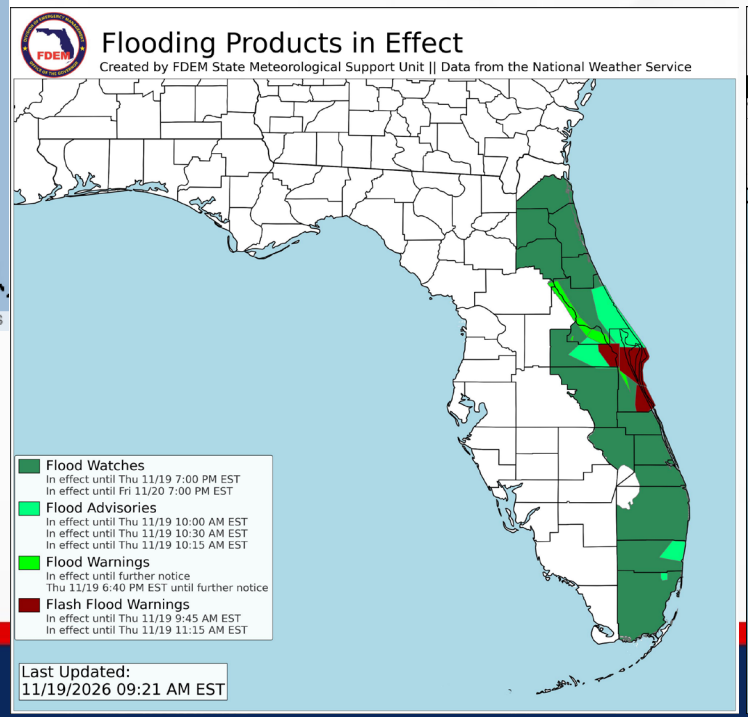

Status
Normal Operations
In Region / Delayed Response
Deployed / Delayed Response
Out of Service / Unavailable

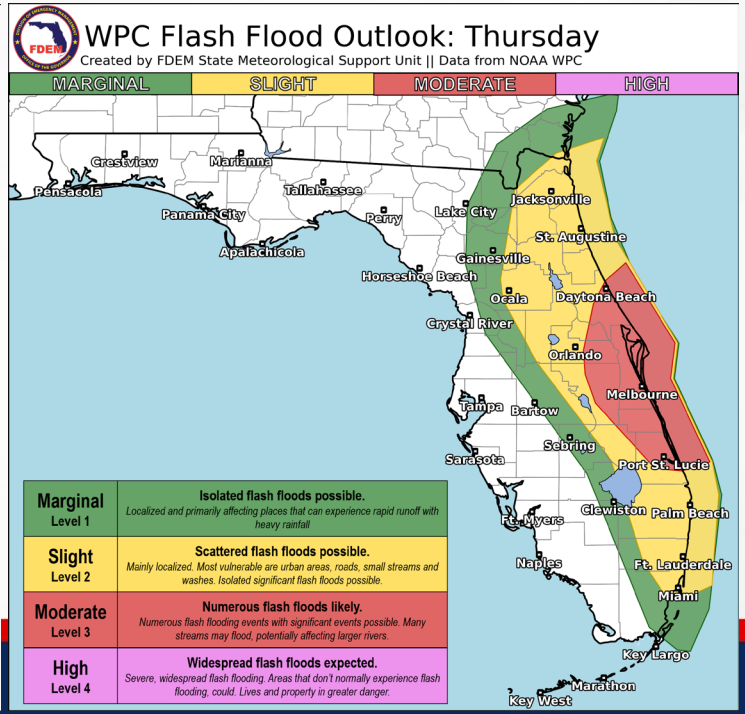

Meteorology Summary

Lightning			L	L	M		L	L		L
Tornado										
Damaging Wind										
Hail										
Flash Flooding			L	M	H		M	H		M
Cold Weather Hazards										
Fog (Overnight)										
Wildfire										
Rip Currents	H	H	H	H	H	L		H	L	H
Lake Okeechobee Elevation	14.68 ft. (0.25 ft. Below Normal)									
Keetch-Byram Drought Index	193 (-37) on a scale from 0 (very moist) to 800 (very dry)									

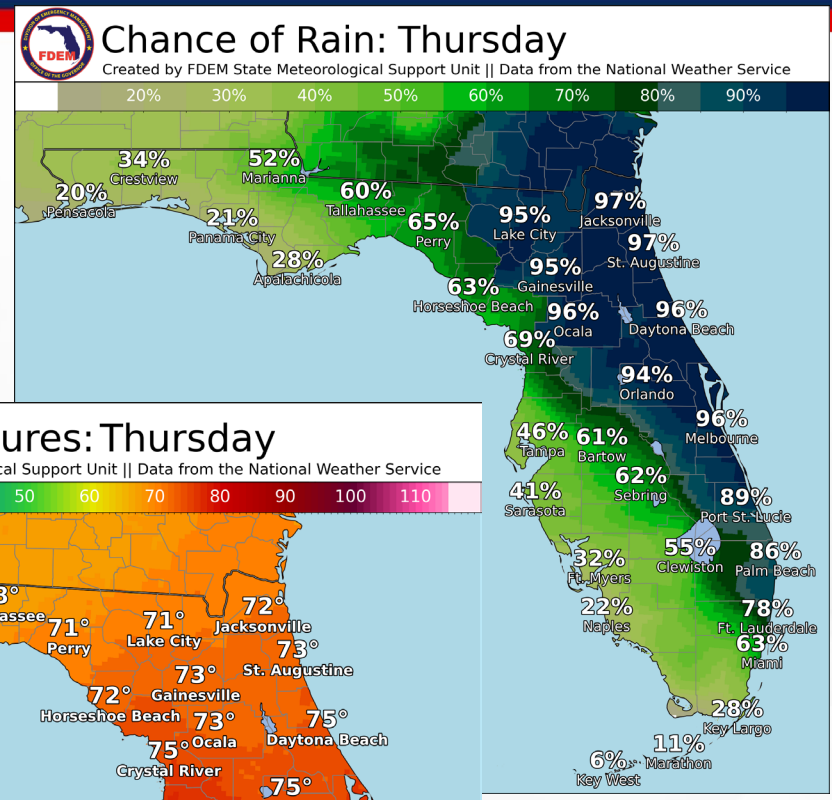

Meteorology Summary

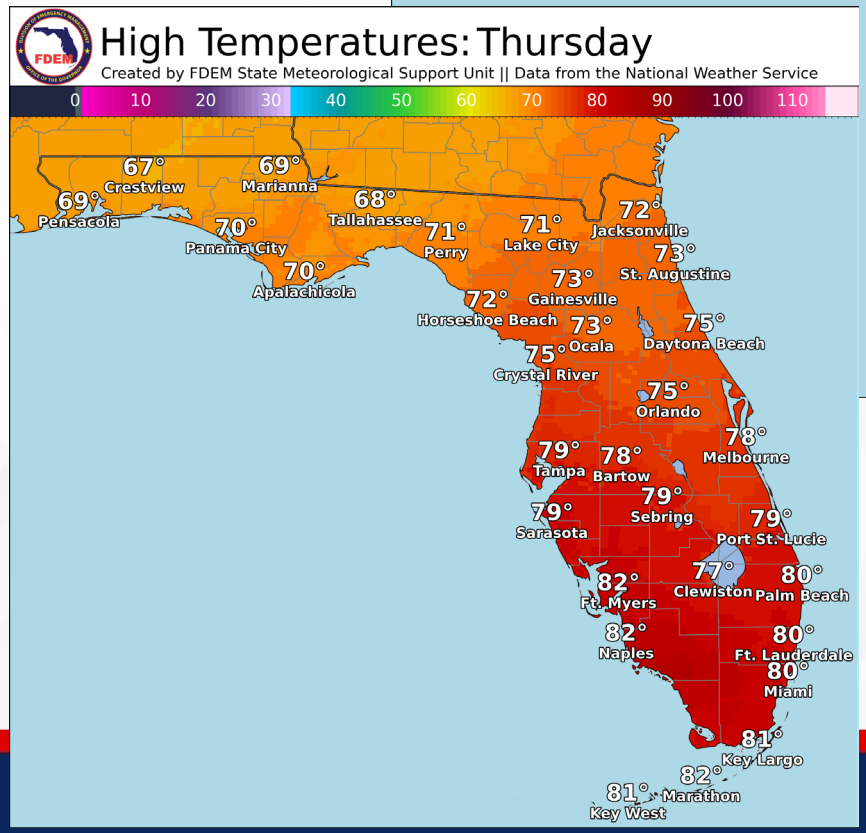

Statewide Overview, Next 24 Hours:

A multi-day and impactful flash flooding event continues today across Florida's East Coast. The atmosphere over the state of Florida remains moist enough to support ongoing flash flooding. Strong onshore, easterly flow will continue today and worsen along the East Coast. This will help promote the development of widespread showers and storms piling up along the East Coast of FL, moving westward with easterly surface flow. This setup favors intermittent development of training bands of showers and storms that repeatedly impact the same area. It is in these areas where the flash flood risk will be maximized. A **Moderate Risks (level 3 of 4) for Flash Flooding** is outlooked from Port St. Lucie to Daytona Beach, with **Slight Risk (level 2 of 4) for Flash Flooding** along the remaining East Coast, extending inland as well. Widespread rainfall accumulations of **4-6"** can be expected today, with locally higher totals **in excess of 10"** in the Moderate Risk Area. **Flood Watches** are in effect from Duval County southward, including some interior Peninsular counties in Central FL.

High temperatures will be warmer today in North Florida, but continued and persistent cloud coverage with rainfall should limit the degree of solar heating. High temperatures will peak in the lower 70s in the Panhandle as a result. In Northeast Florida and the Peninsula, high temperatures will be slightly warmer today and generally range from the lower 70s in northern locations to the lower 80s in southern locations. Overnight low temperatures will range from the upper 50s to lower 60s across the Panhandle, to the mid-60s to lower 70s across Northeast Florida and the Peninsula.

Flash Flood Warnings are in effect in Brevard and Orange County. **Flood Warnings** remain in effect along the St. Johns River until further notice. Further river rises are expected as a result of the expected multi-day heavy rainfall event.

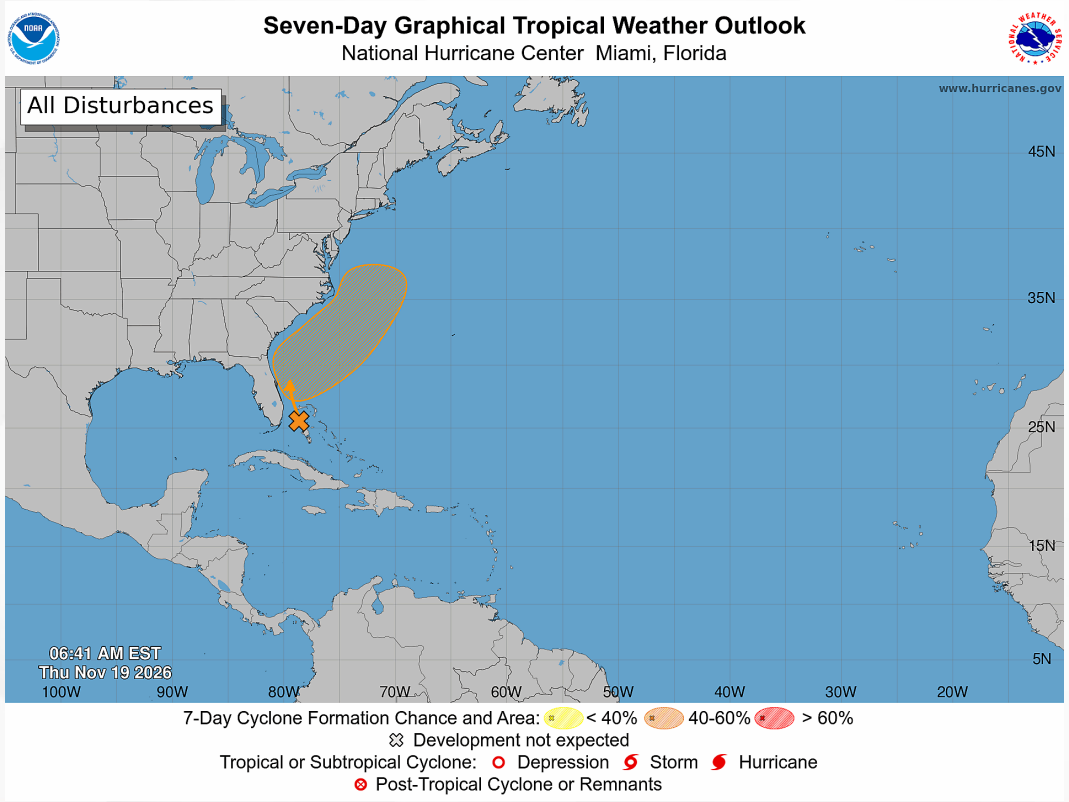

Tropical Weather

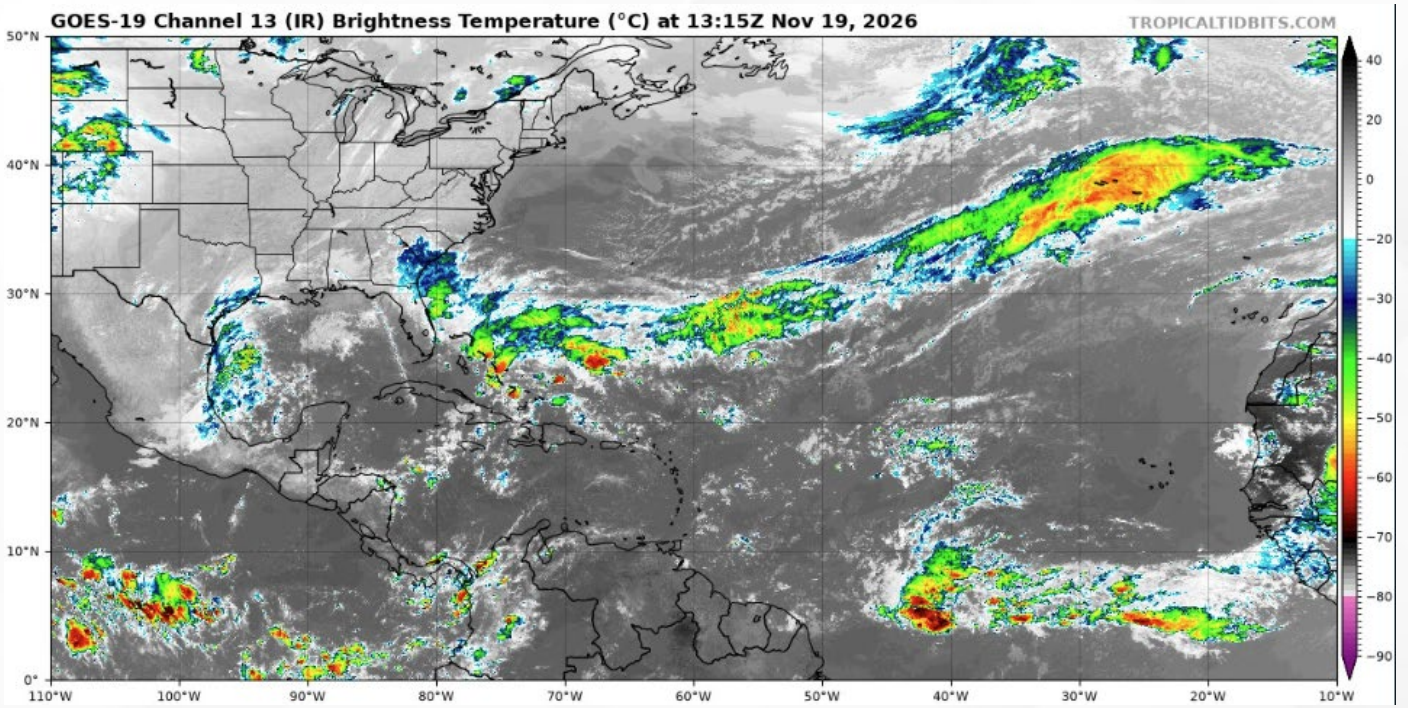

For the latest on the tropics, please visit the National Hurricane Center (NHC) at www.hurricanes.gov.

Southeast Atlantic:

Disorganized showers and thunderstorms near the northwestern Bahamas and Florida are associated with a frontal system. A non-tropical low pressure system is expected to form along the front near the northwest Bahamas on Friday. This system could become a subtropical or tropical storm while it moves northward or northeastward near or just offshore of the southeastern U.S. coast through the weekend. ***This system poses no threat to Florida.***

- Formation chance through 48 hours... low... 20 percent.
- Formation chance through 7 days... medium... 60 percent.

Coastal Hazards & Hydrology

Rip Currents: There is a **High Risk for Rip Currents** today across all East Coast and most Panhandle Beaches today. A low risk for rip currents is outlooked across the remainder of the state. For the latest Rip Current Outlook, visit www.weather.gov/beach.

Marine Hazards: **Poor marine conditions** continue today with strong easterly winds of **25-35 knots** across all Florida waters. A **Small Craft Advisory** is in effect this afternoon for all Florida Waters today north of the Keys. **Gale Warnings** are in effect across offshore Panhandle waters today, and coastal waters of the East Central Florida. Wave heights increase to **9-12'** across the East Coast and up to **4-6'** across Panhandle beaches. West Coast Beaches will remain comparatively lower, at 2-3'.

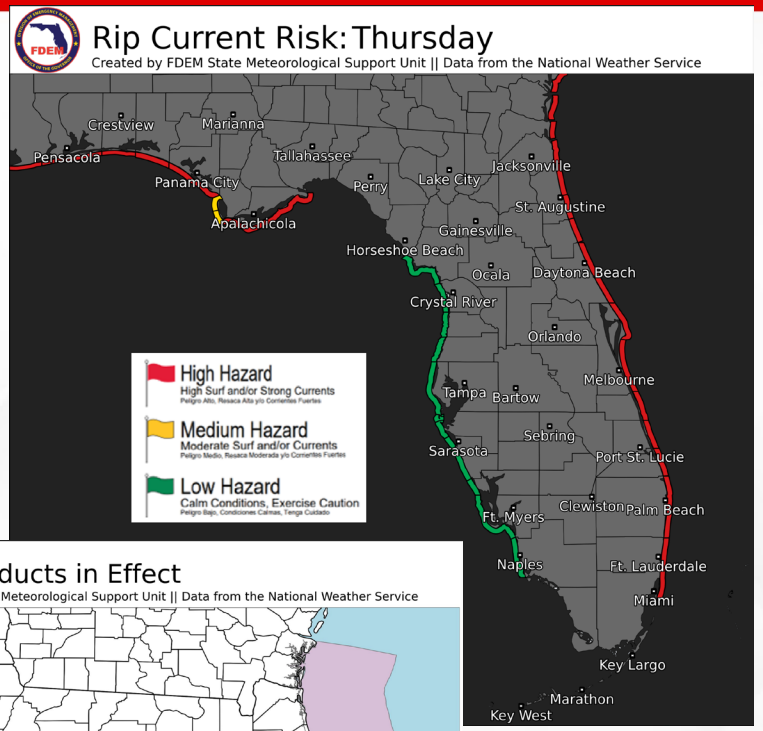

Red Tide: Red tide was observed at background concentrations in Pinellas, Sarasota, Escambia, and Collier counties. **Low concentrations** were observed in Walton County. **Medium concentrations** were observed in Bay County. **High concentrations** were observed in Gulf County (11/13).

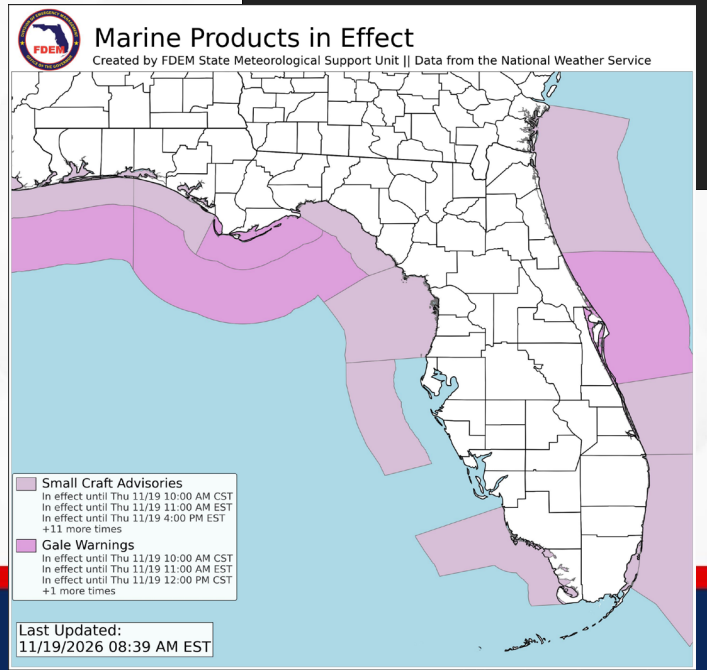

Coastal Flooding: A **Coastal Flood Statement** is in effect today across the Upper Keys. A **Coastal Flood Advisory** is in effect for the Tidal St. Johns and Coastal Flagler County.

Flash Flooding: A multi-day and impactful flash-flooding event begins today across Florida's East Coast. A **Moderate Risks (level 3 of 4) for Flash Flooding** is outlooked today from Port St. Lucie to Daytona Beach as strong and moist onshore flow promotes prolific shower and thunderstorm development. Along the remaining East Coast and further inland, a **Slight Risk (level 2 of 4) for Flash Flooding** is in effect. This setup favors the development of training and back-building bands that could repeatedly impact the same areas. It is in these bands where the flash flooding threat is maximized. For today, widespread **4-6"** is expected East Coast. Some locations could be **in excess of 10"** of rainfall today, with more on the way in the coming days. For more information, visit the Weather Prediction Center.

Riverine Flooding: The St Johns River near Cocoa is in ***Record*** **Major Flood Stage** and is expected to stay in **Major Flood Stage** with the potential for more rises. The St Johns River above Lake Harney is in **Moderate Flood Stage** and is expected to reach **Record** **Major Flood Stage** this weekend. The St. Johns River near Sanford and the St. Johns River near Deland will rise into **Major Flood Stage** by end of next week. Finally, the St Johns River at Astor has fallen into **Minor Flood Stage** but is expected to rise into **Major Flood Stage** by next week. The flash-flooding event has exasperated riverine flooding, and rain continues to fall over many of the same areas that saw flash flooding two weeks ago. The Little Wekiva River near Altamonte Springs is now forecast to go into **Minor Flood Stage**. There could be changes in these river flooding forecasts in the coming days. For information, visit the River Forecast Center.

Lake Okeechobee's average elevation is 14.68 feet, which is 0.26 feet below normal for this time of year and within the normal operating band.

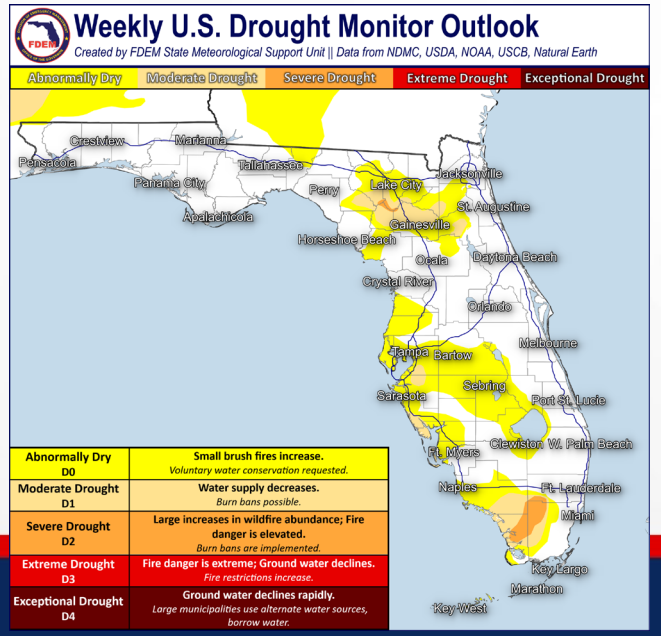

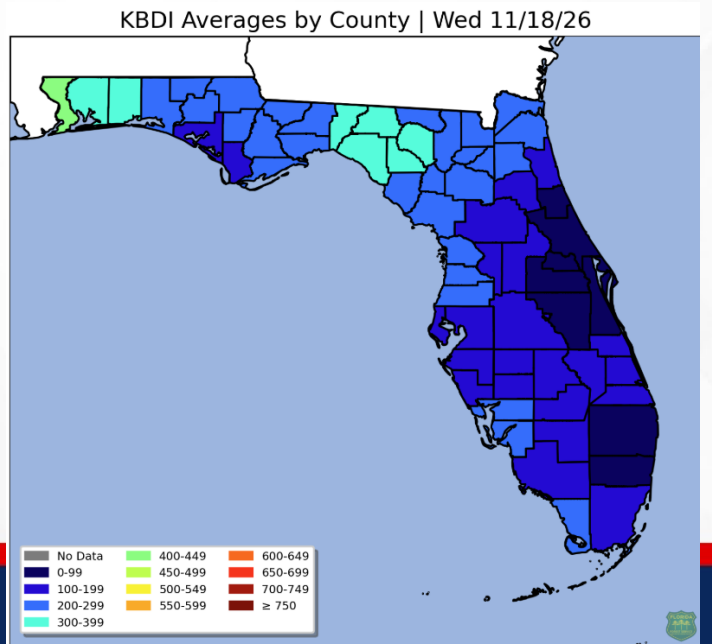

Drought & Fire Weather

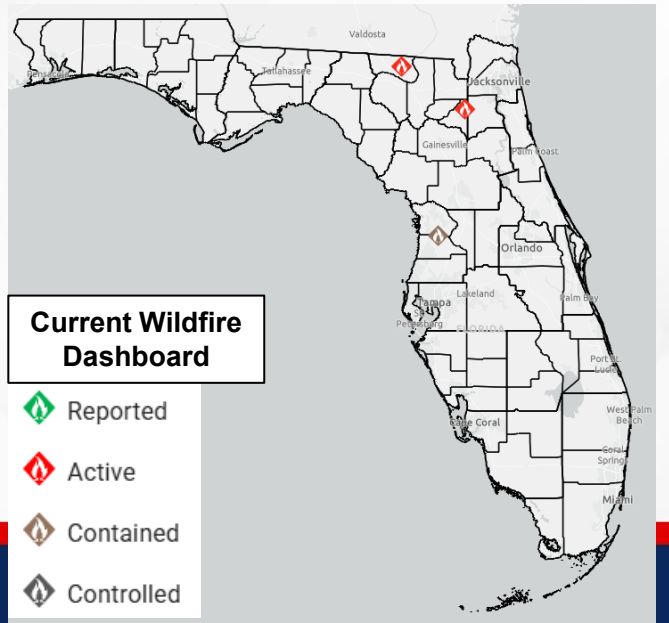

Fire Weather: No fire weather concerns are forecast today. Minimum relative humidities will remain unseasonably moist across the state as heavy rainfall and flash flooding develops along the East Coast. According to the Florida Forest Service, there are 3 active wildfires burning approximately 2078 acres.

Drought (11/12/26): Modest improvements were made in Northeast Florida this week due to rainfall and higher river levels. 1 category level improvements in South Florida led to a smaller area of moderate drought (level 1 of 4) in the Everglades between Monroe and Miami-Dade County. The severe drought (level 2 of 4) remains the same across South Florida. Along the Florida West Coast, small 1 category drought improvements through the Tampa metro and Fort Myers, resulted in a smaller area of moderate drought (level 1 of 4) near Port Charlotte and Cape Coral. There was a large 1 category improvement in the Santa Fe River Basin this week. The area of moderate drought (level 1 of 4) decreased to the areas around the Suwannee River. A small area of in severe drought (level 2 of 4) remains in North Central Florida. Much of the state is not in a drought designation this week. Only about 1% of the state remains in severe drought (level 2 of 4). About 67% of the state has no drought designation.

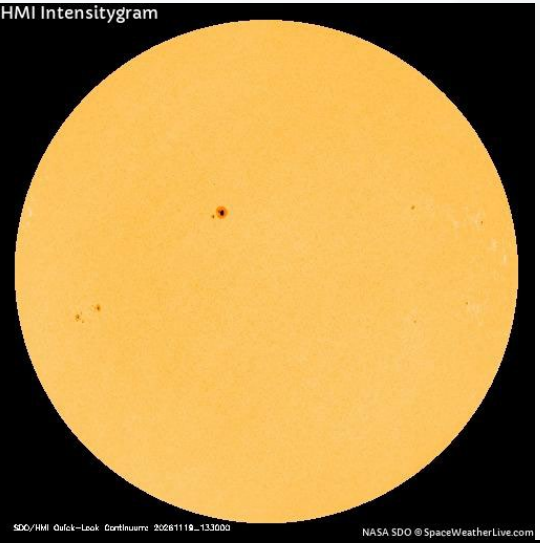

The Keetch-Byram Drought Index average for Florida on Tuesday was **193** **(-37)** on a scale from 0 (very wet) to 800 (very dry).There are **0 out of 67** Florida counties that have an average KBDI above 500 (drought/increased fire danger).

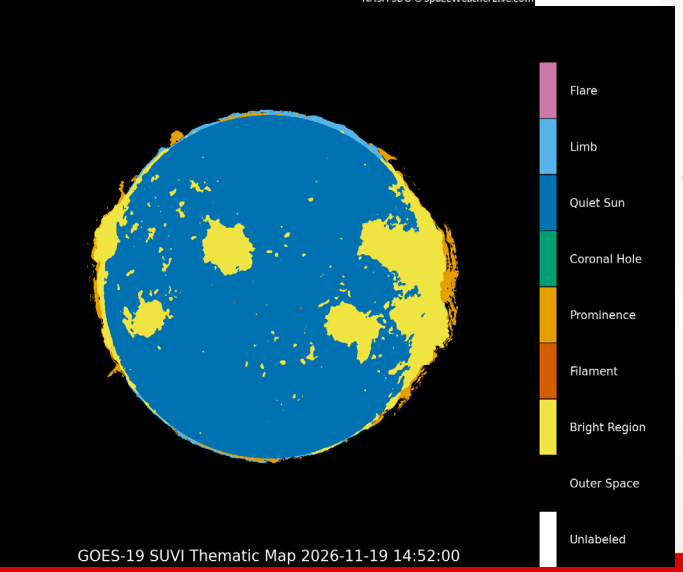

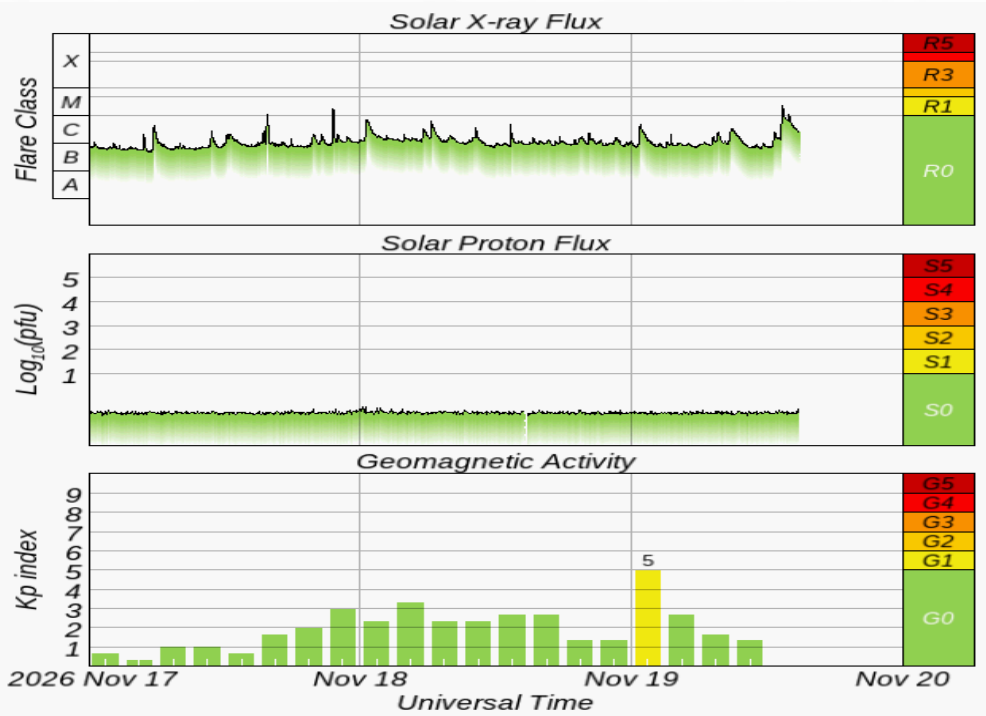

Space Weather

Current Sunspots

Solar Flare Risk	Active Watches & Warnings	Past 24 hours
M-class: 25%	Geomagnetic Storm: None	M2 Solar Flare
X-class: 5%	Radiation Storm: None	R1 Radio Blackout

48-Hour Geomagnetic Forecast

11/19	11/20
Max Kp= 5 (G1)	Max Kp= 3 (G0)
Chance of minor activity = 5% severe activity = 1%	Chance of minor activity = 5% severe activity = 1%

Space Weather: Solar activity is expected to be low with a chance for M-class flares (R1-R2, Minor-Moderate) over 19-20 Nov. Sustained positive polarity CH HSS influences are expected to persist for the remainder of 19 Nov. Primarily quiet to unsettled conditions are expected through 21 Nov with a chance for isolated active periods. The overall space weather threat to Florida is very low.
