

COVID-19 Vaccine Information Brief

February 14, 2023

IMPORTANT/NEW COVID-19 Vaccine Information

- Monovalent Moderna Shelf-Life Extensions
- Update to Cooler Return Process for COVID-19 Vaccine Shipments

Monovalent Moderna Shelf-Life Extensions

Several lots of monovalent Moderna COVID-19 vaccines for children aged 6 months – 5 years received shelf-life extensions. Moderna has verified the new expiry dates below and updated the [Moderna Vial Expiration Checker](#). All lots in the tables below are for primary use only for children aged 6 months – 5 years.

Description	Lot	Original Expiry	New Expiry
Peds 6mo-5y; 10 dose/vial	AR9237B	2/8/2023	5/8/2023
Peds 6mo-5y; 10 dose/vial	AS1412B	2/10/2023	5/10/2023
Peds 6mo-5y; 10 dose/vial	AS1417B	2/14/2023	5/14/2023
Peds 6mo-5y; 10 dose/vial	AS1415B	2/17/2023	5/17/2023
Peds 6mo-5y; 10 dose/vial	AS1416B	2/18/2023	5/18/2023
Peds 6mo-5y; 10 dose/vial	AS1418B	2/19/2023	5/19/2023
Peds 6mo-5y; 10 dose/vial	AS1419B	2/20/2023	5/20/2023

Peds 6mo-5y; 10 dose/vial	AS3794B	3/20/2023	6/20/2023

Update to Cooler Return Process for COVID-19 Vaccine Shipments

Effective 2/14/2023, healthcare providers will no longer receive UPS return labels for any size of frozen shipping containers from McKesson Specialty Health COVID shipments. Please dispose of any frozen shipping containers and packing materials as you would any other waste. Healthcare providers are encouraged to recycle the cardboard components of the frozen shipping containers. A flier about this change will be included in vaccine shipments for the next few weeks to help inform healthcare providers about this change.
