## **MGNWC Water Meter Vault and Pipeline Connection**

August 3, 2018

---

### **Project Background**

The City of Evanston is beginning construction of a new water meter vault located east of McCormick Boulevard and north of Emerson Street as shown on the following location map. This work is part of the new water supply to the Morton Grove / Niles Water Commission (MGNWC).

### **Project Details**

Work by the City of Evanston includes the construction of a new below-grade meter vault. A new fiber optic communications cable to the Ecology Center will also be installed. Once the meter vault is in place, a contractor managed by MGNWC will then construct the pipeline that will connect to the vault from Emerson Street.

During construction, a temporary multi-use path will be built around the work site to maintain pedestrian traffic through the south end of the Ladd Arboretum. Contractors are working closely with the City's Forestry Department to minimize disruption to the Arboretum throughout construction. The south-east lane of McCormick Boulevard will also be used for construction staging.

### **Schedule**

The construction crew plans to mobilize the week of August 6, 2018. Construction of the meter vault will be complete by December 2018, and construction of the pipeline connection will follow. Temporary restoration will be complete as soon as construction is complete, but final restoration of the site will be completed in May 17, 2019.

### **Contractor**

The contractor for the meter vault project is Bolder Contractors, Inc. (316 Cary Point Drive, Cary, Illinois 60013).

The MGNWC contractor for the pipeline connection is Berger Excavating Contractors, Inc. (101 West Grand Avenue, Chicago, Illinois 60654).

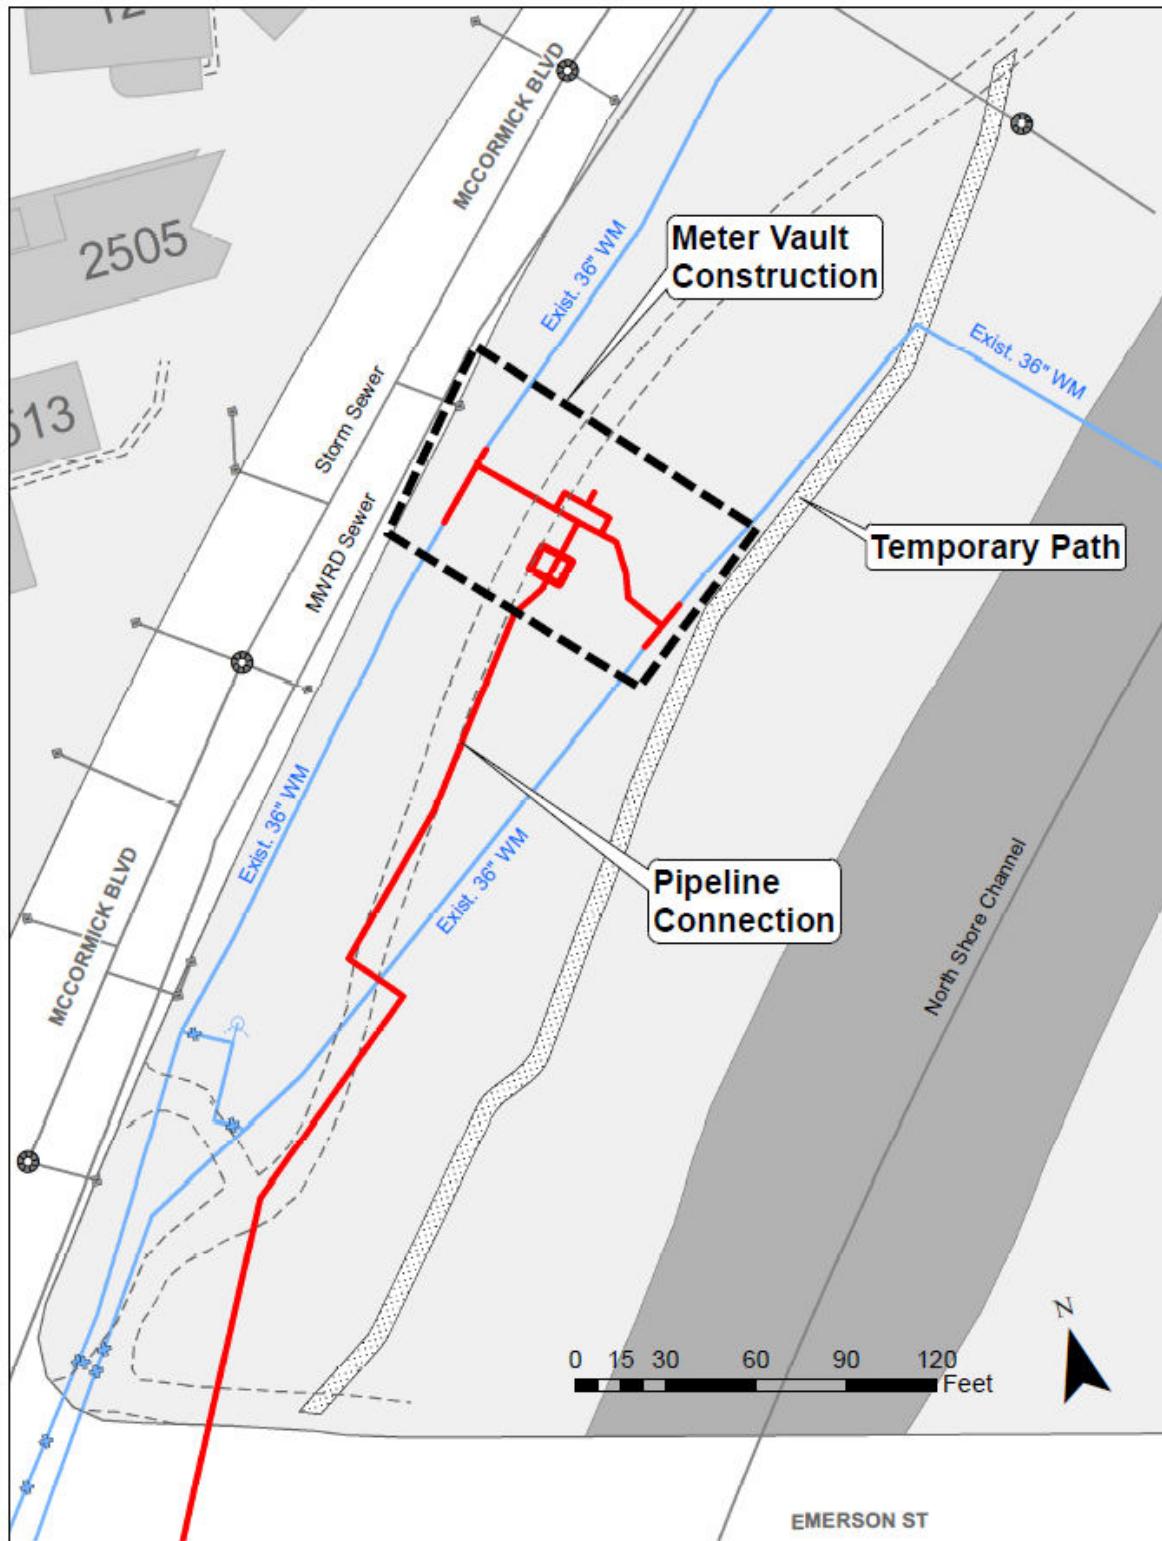

### **City Monitoring**

This project is monitored by the City's Capital Planning & Engineering Bureau. If you have any questions or concerns, please do not hesitate to contact Paul Moyano, P.E., Senior Project Manager at (847) 448-8217 or [pmoyano@cityofevanston.org](mailto:pmoyano@cityofevanston.org). The work by MGNWC is being monitored by Eric Rose of Thomas Engineering Group who can be reached directly at (630) 636-0943 or [ercr@thomas-engineering.com](mailto:ercr@thomas-engineering.com).
