City of Evanston

Asphalt Pavement Crack Sealing Program to Begin September 17

September 10, 2018

Project Description

The City of Evanston will be performing asphalt pavement crack sealing at various locations throughout the city beginning the week of September 17, 2018. This scheduled work is anticipated to take two to three weeks to complete, weather permitting.

During crack sealing activities, motorists should expect minor delays near work zones as flaggers route traffic around the work crews. These delays should be short in duration and specific to the daily work zones. In addition, certain areas may be posted for “No Parking” in order for contractors to have a clear work zone to apply the material. **“No Parking”** signs will be posted 48 hours in advance of when parking restrictions are enforced and will be removed as soon as work is completed.

This project will grind out sections of longitudinal and transverse cracks that have reflected through to the surface. After the cracks are “routed”, a fluid rubberized sealing material is injected back into the crack to seal it against water infiltration; an important step in preserving our pavement infrastructure. After the contractor finishes, the street will be immediately ready for traffic. The work in each location should take approximately one to four hours to complete.

This work is anticipated to seal 190,000 linear feet of cracks in asphalt pavement at various locations around the City. Please reference attached map for crack sealing locations. Priority locations will be completed first, followed by secondary locations, as funding allows.

Contractor

The contractor for this project is Patriot Pavement Maintenance, 825 Seegers Rd., Des Plaines, IL 60016. The contractor is contractually responsible for the means and methods of the work.

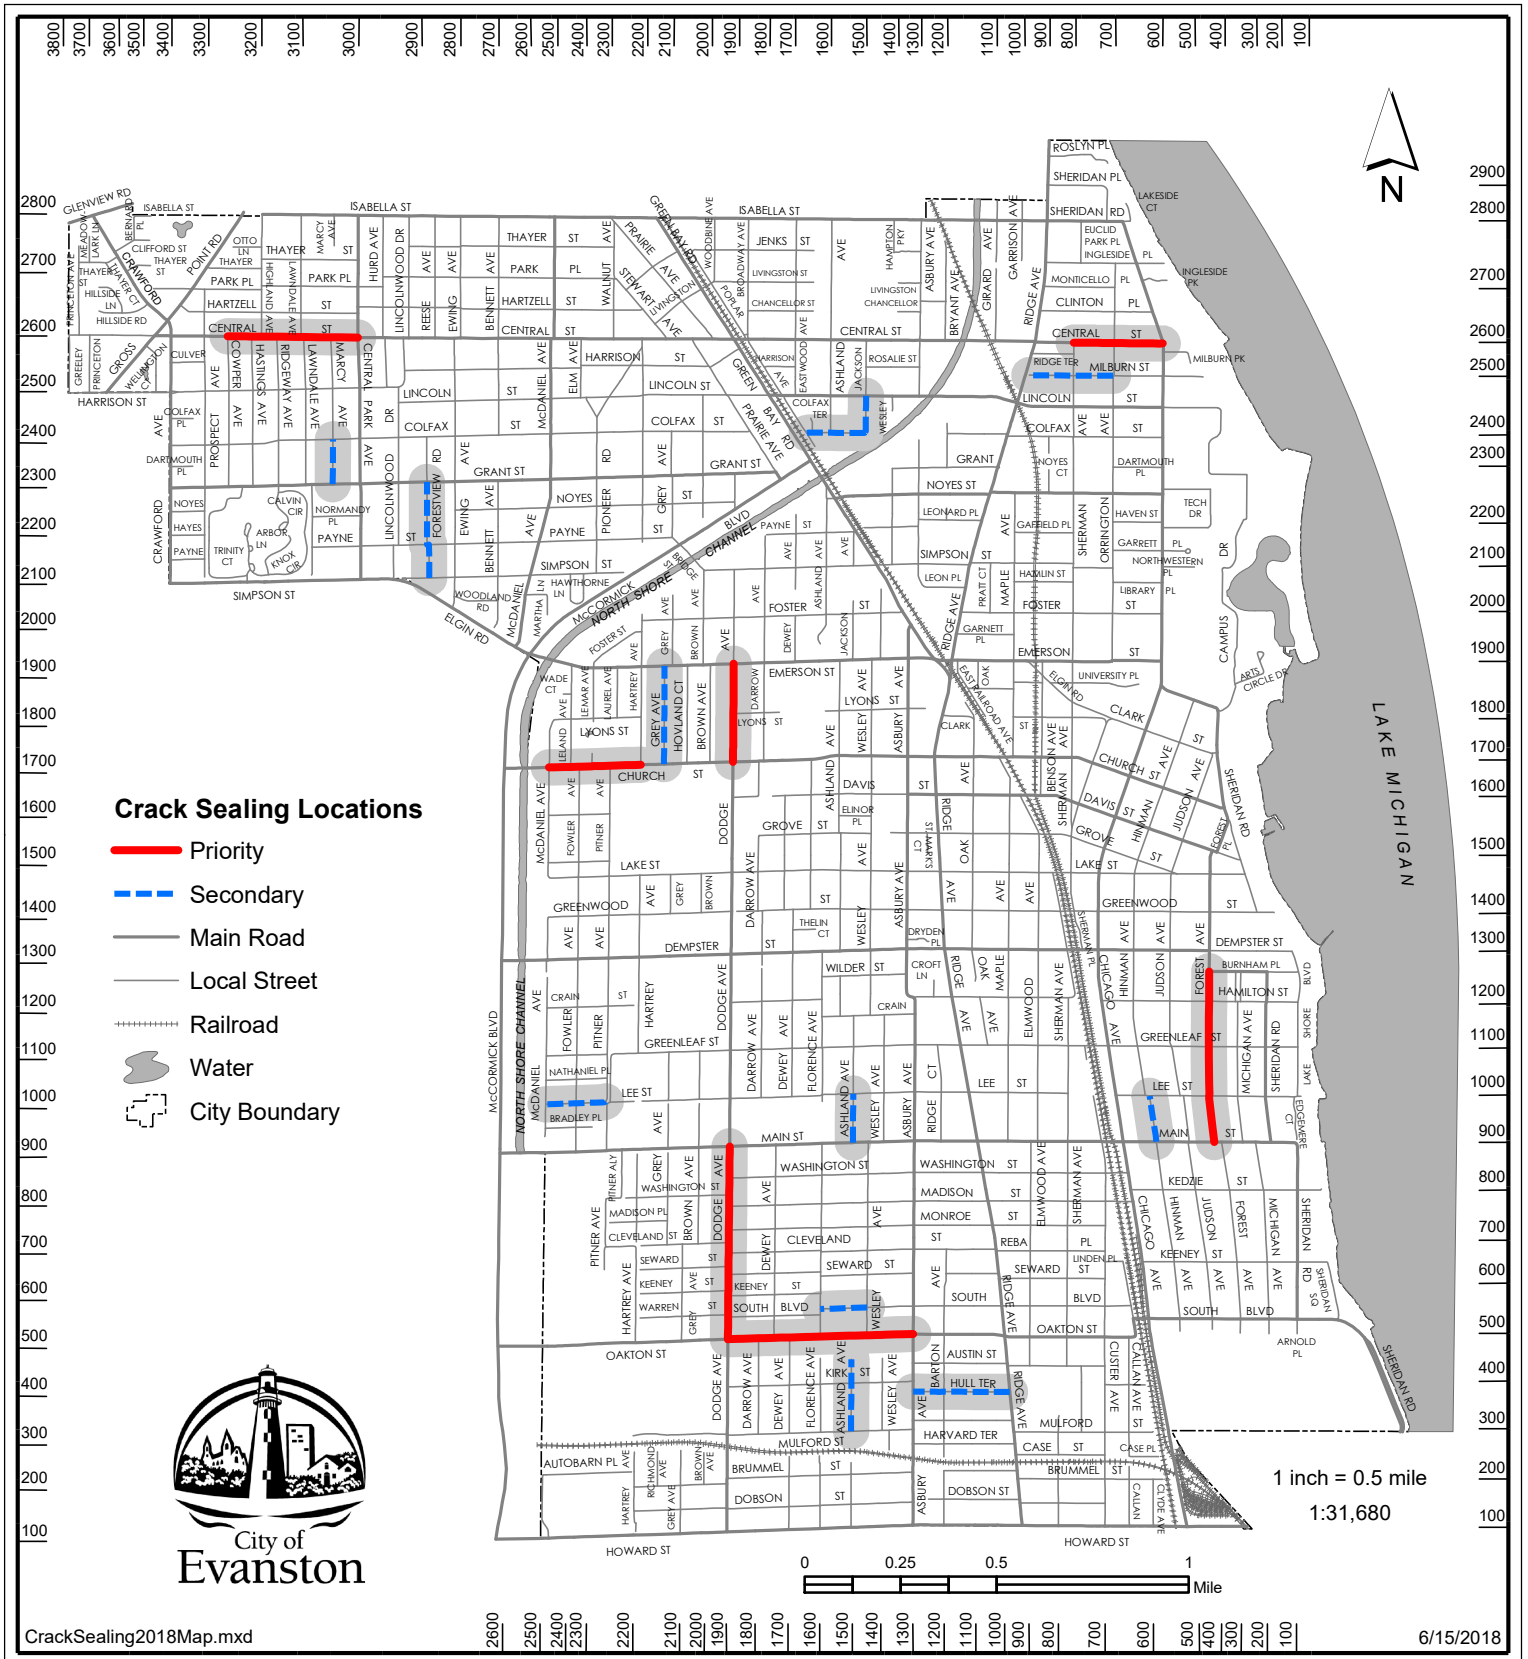

City Monitoring

This project is monitored by the City’s **Bureau of Public Services**. Should you have any questions or concerns, please contact Project Manager, Don Cornelius at 847-866-2944. Questions regarding general street maintenance should be directed to Edgar Cano, Bureau Chief of Public Services at **3-1-1**.
