## City of Evanston **Oakton Street Water Supply Connection**

October 4, 2019

### **Project Background**

The City of Evanston is beginning construction of approximately 2,500 feet of new 24-inch water transmission main and a new below-grade flow meter vault as part of a new water supply to the Village of Lincolnwood. Construction will extend along Hartrey Avenue between Cleveland Street and Oakton Street and along Oakton Street between Hartrey Avenue and the North Shore Channel, as shown on the following location map.

Once the meter vault is in place, a contractor managed by the Village of Lincolnwood will construct the pipeline that will connect to the meter vault on Oakton Street east of the canal.

A replacement bulk water filling station will also be installed as part of this project, located at the South Standpipe southwest of the intersection of Cleveland Street and Hartrey Avenue.

### **Schedule**

Construction is anticipated to begin on October 15, 2019, with traffic control being established shortly thereafter. The exact date that construction activities will begin will be noted on no parking signs posted a minimum of 48 hours in advance of the work. Construction of the water main and meter vault will be complete by March 2020. Temporary concrete road restoration will be in place as soon as construction is complete, and final restoration of the site will be completed in the spring of 2020.

### **Traffic Control**

#### Hartrey Avenue- Cleveland Street to Oakton Street:

Traffic will be one-way headed north and parking will be prohibited. The contractor will coordinate with business owners as needed to maintain driveway access for the duration of the project.

#### Oakton Street – Hartrey Avenue to the North Shore Channel:

Traffic will be restricted in most areas to one lane in each direction due to construction work on the north side of Oakton Street. Additionally, there will be a temporary change in signal patterns at the intersection directly east of the gas station at 2494 Oakton Street. The contractor will coordinate with business owners as needed to maintain driveway access for the duration of the project.

### **Contractor**

The contractor for this project is Bolder Contractors, Inc. (316 Cary Point Drive, Cary, Illinois 60013).

### **City Monitoring**

This project is monitored by the City's Capital Planning & Engineering Bureau. If you have any questions or concerns, please do not hesitate to contact Paul Moyano, P.E., Senior Project Manager at (847) 448-8217 or [pmoyano@cityofevanston.org](mailto:pmoyano@cityofevanston.org).
