Citywide Asphalt Pavement Patching

May 15, 2020

Project Description

The City of Evanston will be patching large areas of asphalt pavement throughout the city beginning the week of May 18, 2020. The work is scheduled to be completed within 3 weeks, weather permitting.

During construction, motorists should expect minor delays near work zones as flaggers route traffic around the work crews. **“No Parking”** restrictions for this project should be short in duration and specific to the daily work zones. The **“No Parking”** signs will be posted 48 hours in advance of when the restriction is enforced and will be removed as soon as the work is completed.

Work at most locations should only take a few hours with a few exceptions where larger areas of pavement will be resurfaced. This project will involve removing the top 2 inches of distressed and failing asphalt and replacing it with a fresh, smooth asphalt surface material. Once the asphalt is laid, compacted, and cooled, the street will be opened and ready for traffic.

This work is anticipated to improve the condition of nearly 27,300 square yards of pavement at approximately 180 locations across the city.

Contractor

The contractor for this project is J.A. Johnson Paving, Inc. 1025 Addison Court, Arlington Heights, IL 60005. The contractor is contractually responsible for the means and methods of the work.

City Monitoring

This project is monitored by the City's **Public Services Bureau**. If you have any questions or concerns regarding this project, please contact Project Manager Don Cornelius at 3-1-1 or 847-866-2944. Questions about general street maintenance should be directed to Edgar Cano, Bureau Chief of Public Services, at 3-1-1.
