Asphalt Pavement Patching

April 29, 2022

Description

This project will involve removing the top two inches of distressed and failing asphalt and replacing it with a fresh, smooth asphalt surface material. Once the asphalt is laid, compacted, and cooled, the street will be opened and ready for traffic. This work is anticipated to improve the condition of nearly 37,500 square yards of pavement at approximately 230 locations across the city.

During construction, motorists should expect minor delays near work zones as flaggers route traffic around the work crews. “No Parking” restrictions for this project should be short in duration and specific to the daily work zones. The “No Parking” signs will be posted 48 hours in advance of when the restriction is enforced and will be removed as soon as the work is completed.

Schedule

The City began patching large areas of asphalt pavement throughout Evanston on May 9, 2022. The work is scheduled to be completed within three to six weeks, weather permitting.

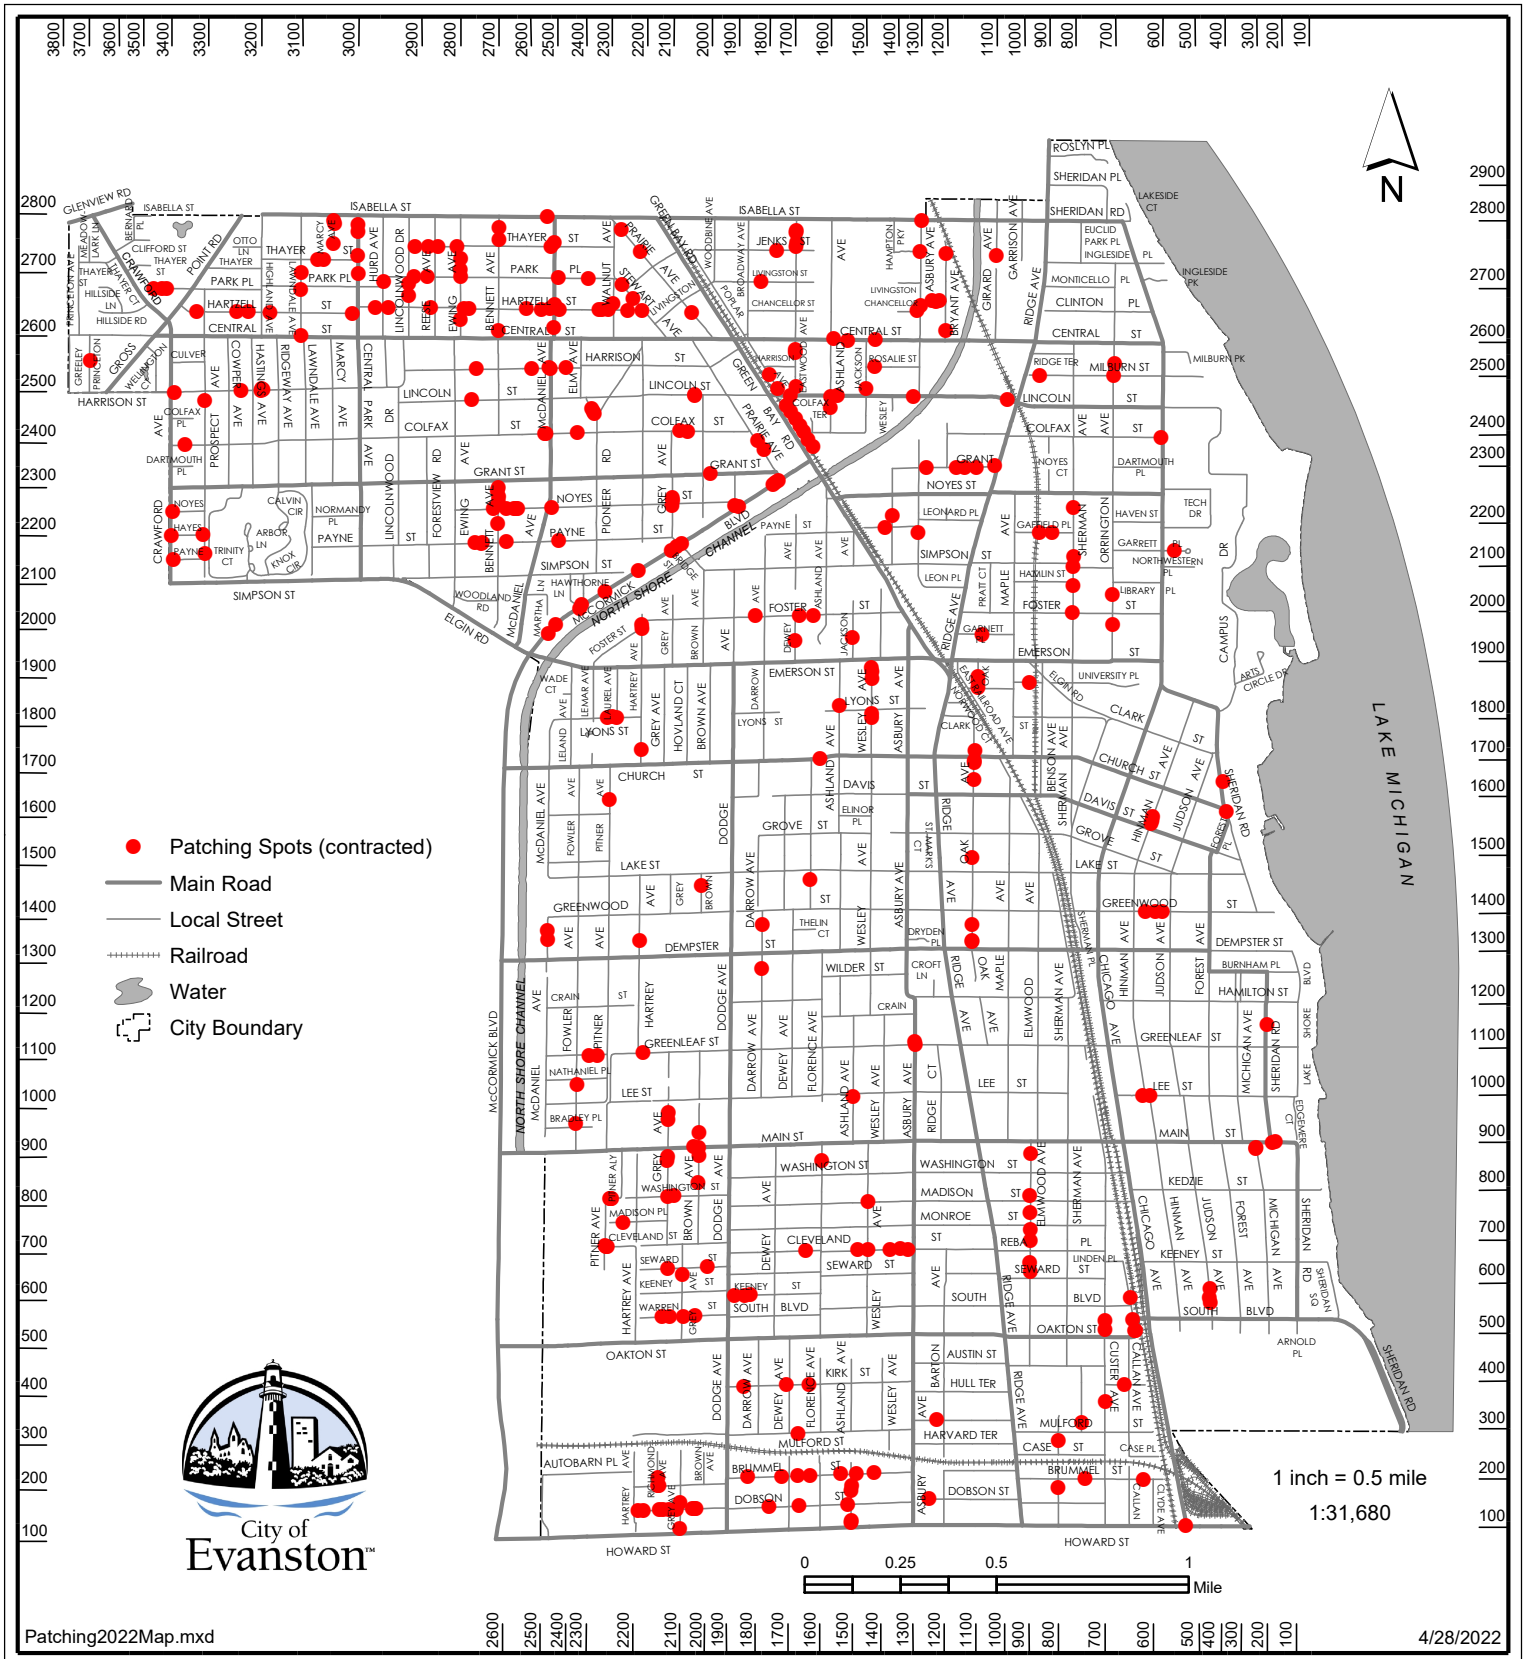

Contractor

The contractor for this project is J.A. Johnson Paving, Inc. at 1025 Addison Court, Arlington Heights, IL 60005. The contractor is responsible for the means and methods of the work.

City Contact

This project is monitored by the City's Public Services Bureau. For questions or concerns regarding this project, contact Project Management Supervisor William Reed III at 3-1-1 or 847-859-7725. Questions about general street maintenance should be directed to Bureau Chief of Public Services Edgar Cano at 3-1-1.
