To Whom It May Concern:

The City of Evanston is preparing to begin asphalt pavement crack sealing at approximately 45 sites across the community, starting the second week of May 2026. This project is expected to span one to three weeks, weather permitting.

Work is anticipated to begin on May 11. Drivers should expect short delays in specific work zones as flaggers route traffic around the work crews. No Parking restrictions will be short in duration and specific to each work area, if needed, and will be posted at least 48 hours in advance of work beginning. The work at each location will typically take 1 to 4 hours to complete. Street sweeping of excess debris is typically done the day after crack sealing is complete, as needed.

This project includes grinding out sections of longitudinal and transverse cracks that have reflected through the asphalt surface. Once the cracks are routed, a fluid, rubberized sealing material is injected back into the cracks to seal them against water infiltration. This is an important step in preserving pavement infrastructure. The contractor will utilize a dust-reducing process during grinding and implement mastic crack sealing, expanding the scope of repairs to include cracks up to 2 inches wide.

Every effort will be made to complete the work in a timely manner to minimize any inconveniences caused by the construction.

Contractor

Patriot Pavement Maintenance, located at 825 Seegers Rd. in Des Plaines, IL, has been designated as the project contractor. This firm maintains full contractual responsibility for the specific methods and operational means employed during the construction process.

City Monitoring

The Public Services Bureau oversees this project. Should you have inquiries or specific concerns, please reach out to Project Management Supervisor Lucio Jimenez by dialing 3-1-1 while in Evanston or calling (847) 448-4311. For all other matters related to routine roadway upkeep, contact 3-1-1 directly.

Sincerely,

Lucio Jimenez
Project Management Supervisor
