

INVESTING IN OUR WATER AND SEWER SYSTEM

It takes a **team** to provide **safe, reliable service** to Lake County communities.

High quality, clean water that meets or exceeds all state water quality standards.

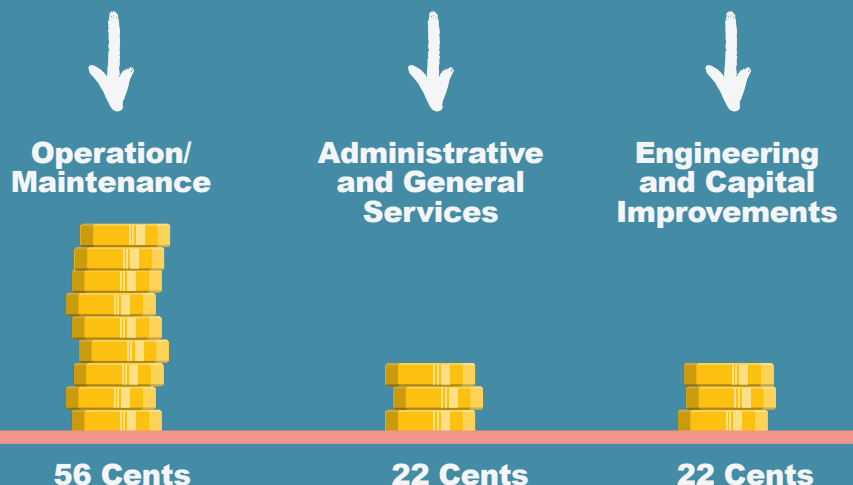

↘ **Cost: about 2 cents per gallon**

We are investing \$10 million in infrastructure each year.

We maintain and operate three wastewater treatment plants, 86 lift stations, 38 wells, 18 water storage facilities and more than 770 miles of water and wastewater pipe. We reinvest the money we receive from water and sewer fees to upgrade and replace parts of our water system.

REVENUE HELPS US
BUILD AND MAINTAIN
INFRASTRUCTURE
TO PROVIDE **WATER**
AND **SEWER SERVICE**
FOR YOU EACH AND
EVERY DAY.
