

Village of Oak Park

Program Overview

Since the start of the ComEd Energy Efficiency Program in 2008, our business and residential customers have saved more than \$13.3 billion on their electric bills and 111.6 million megawatt hours of energy - that's enough to power approximately 12.9 million homes for a year. Our energy efficiency offerings are structured to ensure that all communities in our service territory benefit from participation. Here's how your community fared in 2018 - 2025.

Energy Efficiency Results for Village of Oak Park

6,900

Total
Participants

\$1,331,200

In Total
Savings

Residential Customers

-  **1,400** Smart Thermostats Installed
