Survey Background

The Village of Oak Park contracted with Polco to conduct a community-wide resident survey. The primary goal of the survey was to assess the attitudes and opinions of residents regarding:

- Their personal overall health
- The prevalence of health conditions
- The frequency of preventive health care treatments
- The primary sources of health information
- Financial health security

Survey Administration

A postcard was mailed to 3,000 Oak Park households, selected at random, notifying residents that they had been chosen to participate in the survey. A paper copy of the survey followed in the mail one week later. Both mailings included a web link so that residents could take the survey online, if desired. The survey was also available online in Spanish, including instructions in Spanish on how to access the online survey. There were 326 responses to the mailed questionnaire, yielding a response rate of 11%. The margin of error for the scientific survey is plus or minus five percentage points around any given percentage for all respondents.

In addition to the scientific, random sample, a link to an online "opt-in" survey was publicized through various community channels. This opt-in survey was identical to the scientific survey and open to all community residents. A total of 239 online surveys were completed, yielding a grand total count of 565 survey responses. There were no completed surveys in Spanish.

Survey results were weighted so that respondent race, gender, and age are represented in proportions reflective of the entire adult population of the Village. More information about the survey methodology can be found in *Appendix F: Survey Methodology.*

How the Results Are Reported

The body of this report discusses the results of the address-based survey. For the most part, the full set of frequencies or the "percent positive" are presented in the body and narrative of the report. The percent positive is the combination of the top or top two most positive response options (i.e., "yes" or "very satisfied" and "somewhat satisfied").

On many of the questions in the survey, respondents could give an answer of "don't know." The proportion of respondents giving this reply is shown in the full set of responses included in *Appendix B: Complete Survey Frequencies* and is discussed in the body of this report if it is 20% or greater. However, these responses have been removed from the analyses presented in the body of the report, unless otherwise indicated. In other words, the majority of the tables and graphs in the body of the report display the responses from respondents who had an opinion about a specific item.

For some questions, respondents were permitted to select multiple responses. When the total exceeds 100% in a table for a multiple response question, it is because some respondents are counted in multiple categories. When a table for a question that only permitted a single response does not total to exactly 100%, it is due to the customary practice rounding values to the nearest whole number.

Key Findings

Most Oak Park residents describe their overall personal health positively.

- Around 8 in 10 Oak Park residents described their general health as excellent or good, while fewer than 2 in 10 rated it as fair. Almost no respondent rated their general health as poor.
- When asked specifically about a list of 21 common health conditions, the most frequently reported issues were high cholesterol (30%), high blood pressure (24%), and asthma (20%). Other conditions reported by at least 10% of respondents included generalized anxiety disorder (17%), arthritis (16%), prediabetes (13%), clinical depression (12%), and other mental health disorders (11%).

At least two-thirds of respondents reported having conducted several preventive exams, tests, and checks.

- The survey asked how frequently respondents underwent 11 preventive exams, tests, and checks. About 9 in 10 reported having had a blood pressure check, dental exam, or routine physical within the past year. Similarly, around 8 in 10 said they had a blood cholesterol check or received a flu vaccine during the same period. About three-fourths of residents reported having a diabetes screening or receiving a COVID-19 vaccine or booster in the last 12 months.
- In contrast, fewer than one-third said they had undergone a mammogram, Pap test, colonoscopy, or HIV test within the past year.

Most Oak Park residents have a healthcare provider that they are satisfied with.

- About 9 in 10 respondents reported being able to identify one person as their personal doctor or health care provider.
- About 9 in 10 respondents also reported being very (62%) or somewhat (33%) satisfied with the health care they received in the past 12 months. Levels of satisfaction with health care were slightly higher among females and white respondents than among males and non-white respondents.
- Two-thirds of the respondents reported using health insurance through an employer or union to pay for medical care. Medicare was the second most reported source at 21%, indicating its significance among older adults. Medicaid and individually purchased health insurance each accounted for 6% of responses.

Medical professionals are the primary source of medical information for Oak Park residents.

- When asked where they obtain health information, the vast majority of respondents (96%) identified medical professionals—such as doctors, nurses, or pharmacists—as their primary source. This was followed by local, state, or federal health departments (50%) and family or friends (35%), indicating strong reliance on both official channels and personal networks.
- Traditional media also remained significant, with printed news cited by 29%, social media by 25%, broadcast news by 20%, and radio by 14%. In contrast, fewer respondents reported using online resources (8%), health/wellness coaches or leaders (6%), medical literature (4%), or other sources (11%), suggesting these play a more limited role in health information dissemination.

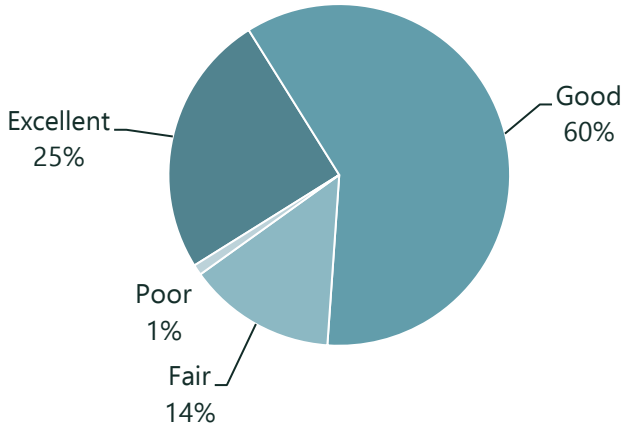

Survey Results

Overall Personal Health

The 2025 Oak Park Community Health Survey included several questions assessing residents' personal health, including their overall condition and the frequency of preventive screenings and services. Around 8 in 10 Oak Park residents described their general health as excellent or good, while fewer than 2 in 10 rated it as fair. Almost no one rated their health as poor.

Figure 1: Overall Personal Health Assessment

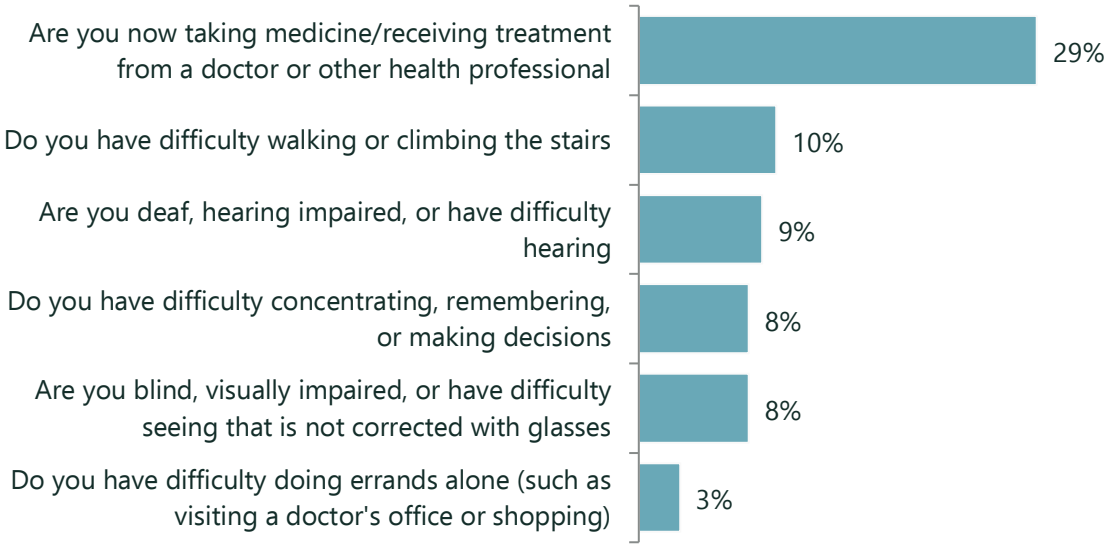

How would you describe your general health?

When asked about their day-to-day health, about one-third of respondents reported taking medication or receiving medical treatment at the time of the survey. Around 10% indicated difficulties with walking or climbing stairs—similar to the proportions who reported challenges with hearing, vision, and mental health. Finally, around 3% said they had difficulty completing errands on their own.

Figure 2: Key Aspects of Personal Health

Please indicate if any of the following describes you.
(percent yes)

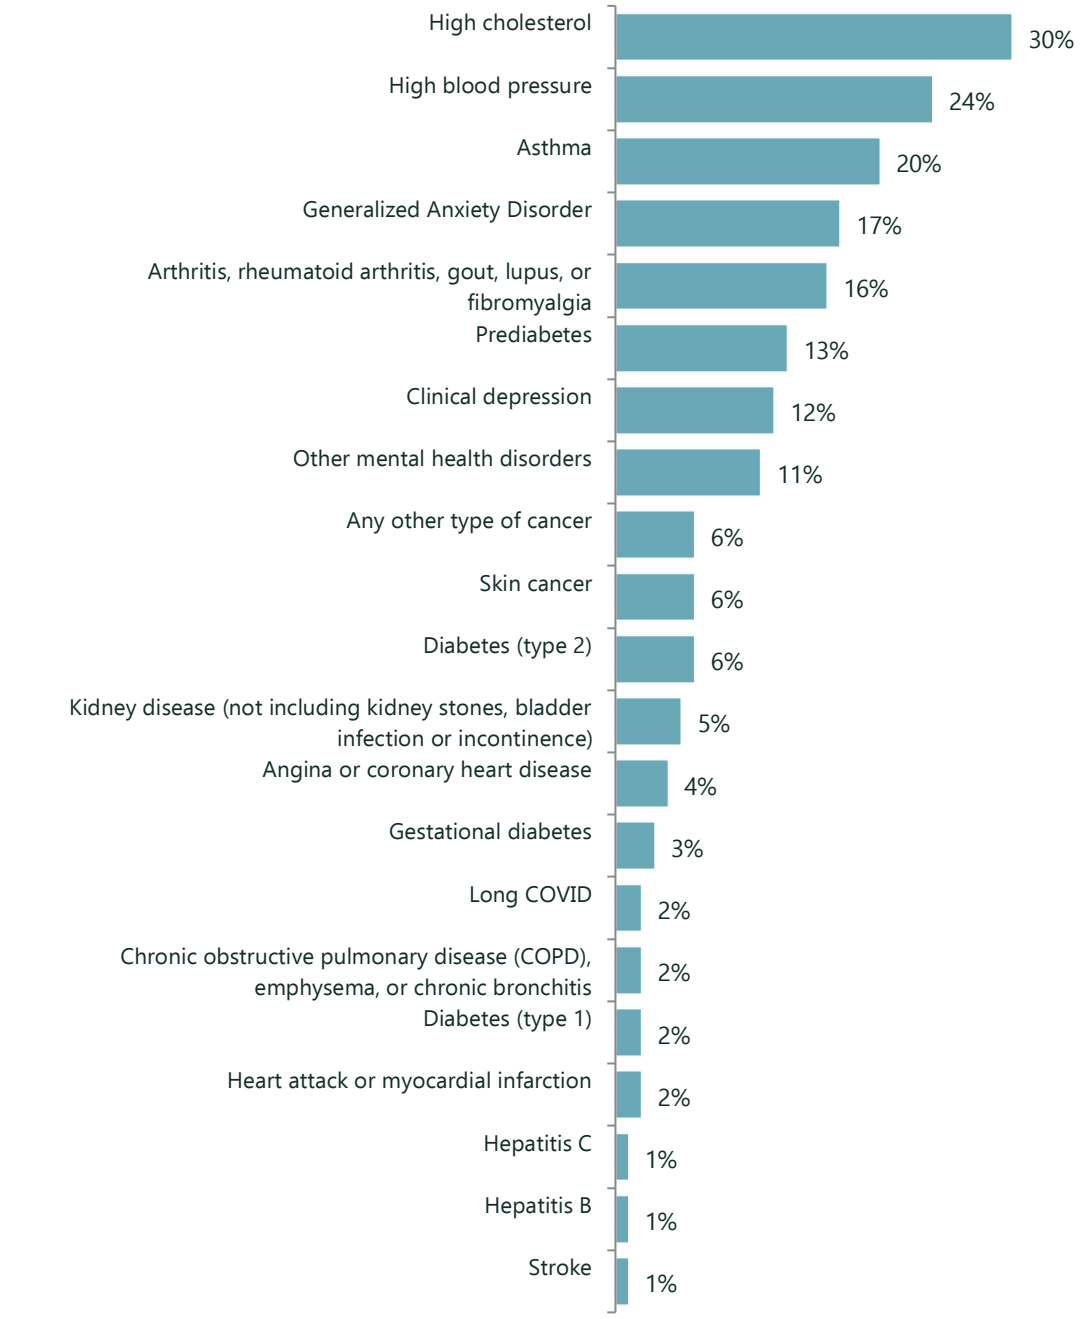

When asked specifically about a list of 21 common health conditions, the most frequently reported issues were high cholesterol (30%), high blood pressure (24%), and asthma (20%). Other conditions reported by at least 10% of respondents included generalized anxiety disorder (17%), arthritis (16%), prediabetes (13%), clinical depression (12%), and other mental health disorders (11%).

Respondents aged 55 and older tended to report higher rates of being diagnosed with most health conditions, except for clinical depression, asthma, gestational diabetes, generalized anxiety disorder, and other mental health disorders, which were more prevalent among respondents aged 34 or younger (see *Appendix D: Responses to Selected Survey Questions by Respondent Characteristics*).

Figure 3: Prevalence of Health Conditions

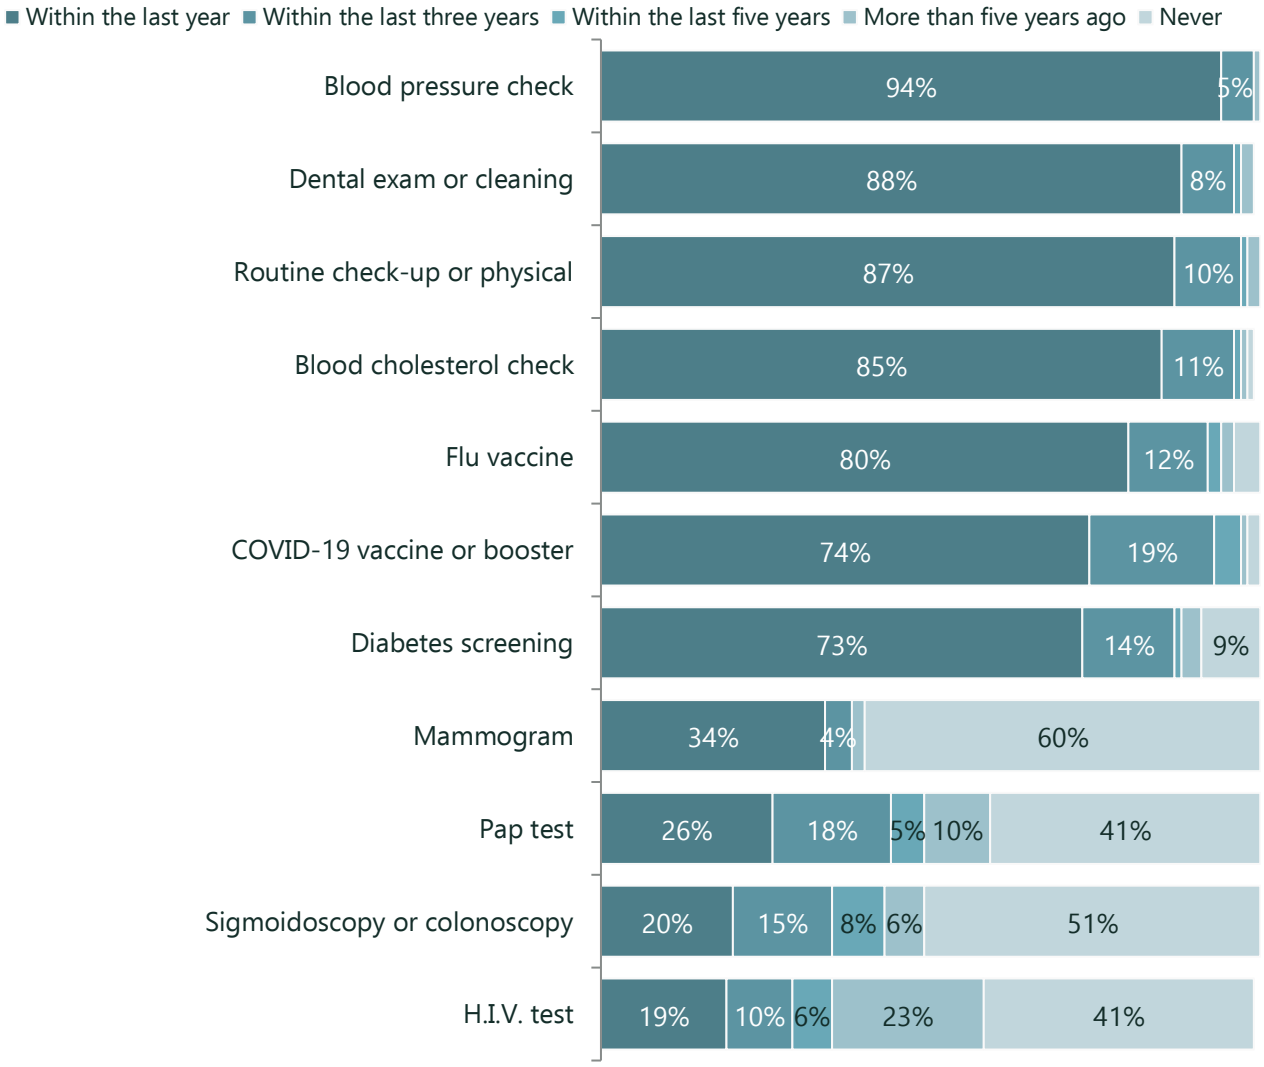

Please indicate if any of the following describes you.
(percent yes)

The survey also asked how frequently respondents underwent 11 preventive exams, tests, and checks. About 9 in 10 reported having had a blood pressure check, dental exam, or routine physical within the past year. Similarly, around 8 in 10 said they had a blood cholesterol check or received a flu vaccine during the same period. About three-fourths of residents reported having a diabetes screening or receiving a COVID-19 vaccine or booster in the last 12 months. In contrast, fewer than one-third said they had undergone a mammogram, Pap test, colonoscopy, or HIV test within the past year.

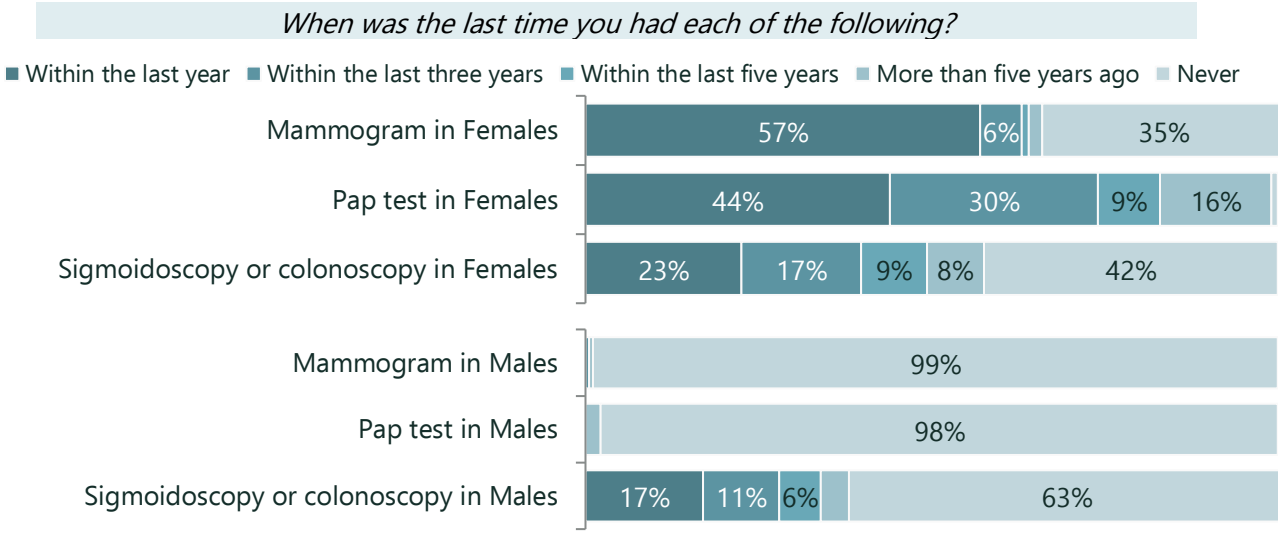

Figure 4: Preventive Health Care

When was the last time you had each of the following?

As expected, nearly all mammograms and pap tests conducted within the last year were done by females. On the other hand, the proportion for reported sigmoidoscopy or colonoscopy was not statistically different between males and females (see *Appendix D: Responses to Selected Survey Questions by Respondent Characteristics*).

Figure 5: Preventive Health Care by Gender

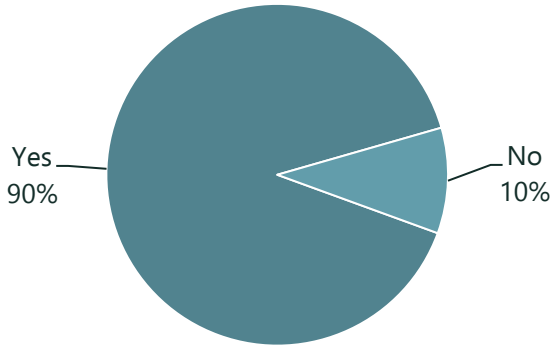

Health Access

About 9 in 10 respondents reported being able to identify one person as their personal doctor or health care provider. This rate was slightly higher among females and those aged 35 or older (see *Appendix D: Responses to Selected Survey Questions by Respondent Characteristics*).

Figure 6: Access to a Personal Health Care Provider

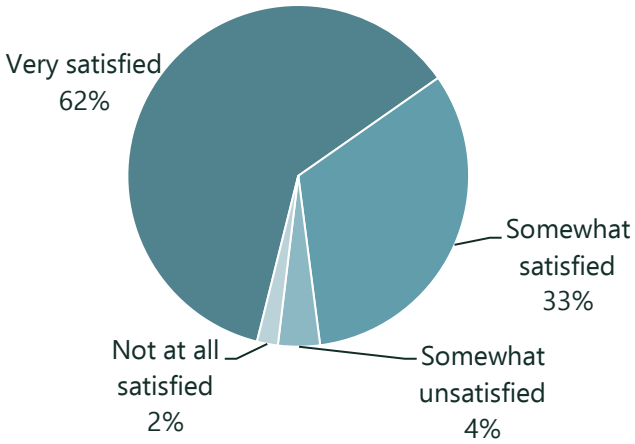

Do you have at least one person you think of as your personal doctor or health care provider?

Also, about 9 in 10 respondents reported being very (62%) or somewhat satisfied (33%) with the health care they received in the past 12 months. Levels of satisfaction with health care were slightly higher among females and white respondents than among their counterparts (see *Appendix D: Responses to Selected Survey Questions by Respondent Characteristics*).

Figure 7: Satisfaction with Health Care

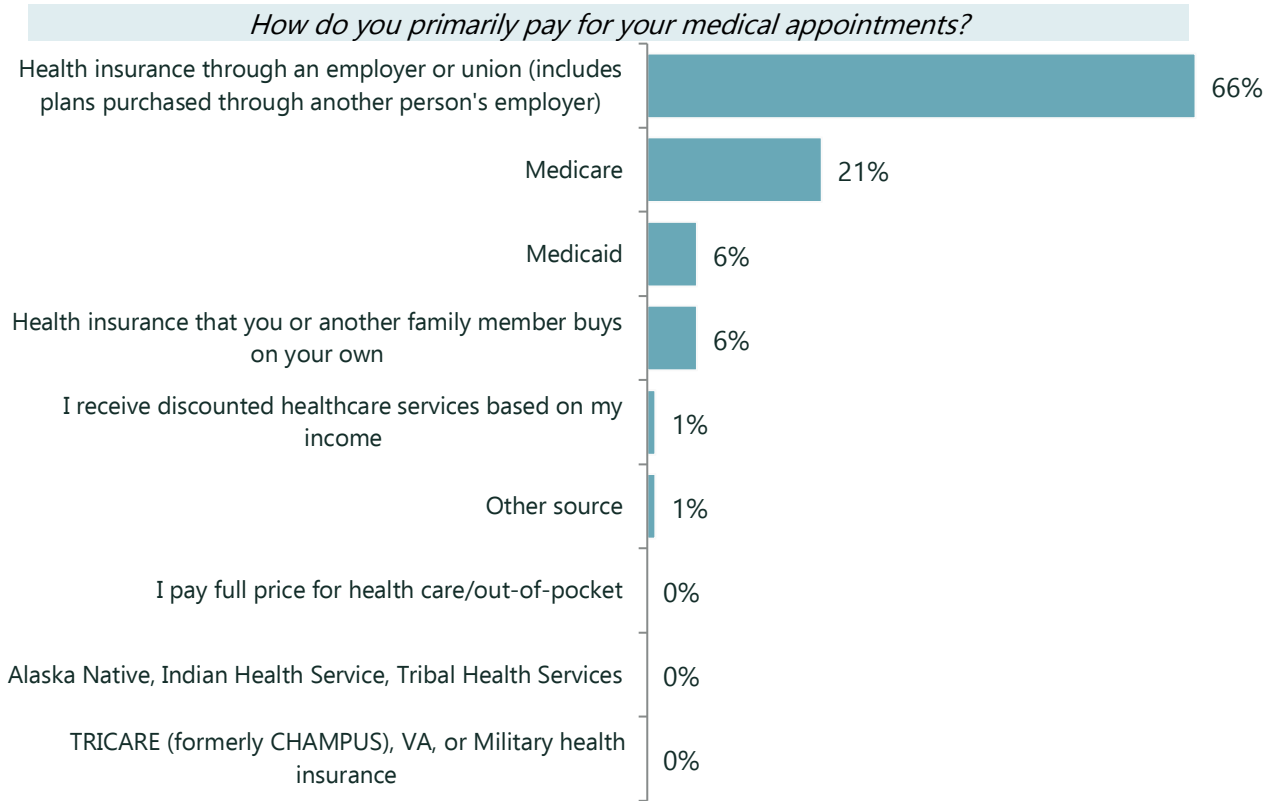

In general, how satisfied are you with the health care you have received in the past 12 months?

Two-thirds of the respondents reported using health insurance through an employer or union to pay for medical care. Medicare was the second most reported source at 21%, indicating its significance among older adults. Medicaid and individually purchased health insurance each accounted for 6% of responses.

Only 1% of respondents reported receiving discounted healthcare services based on income, and another 1% cited other sources. Notably, 0% of respondents reported using TRICARE/VA/Military health insurance, Alaska Native or Tribal Health Services, or paying the full price out-of-pocket.

Figure 8: Primary Method of Paying for Medical Care

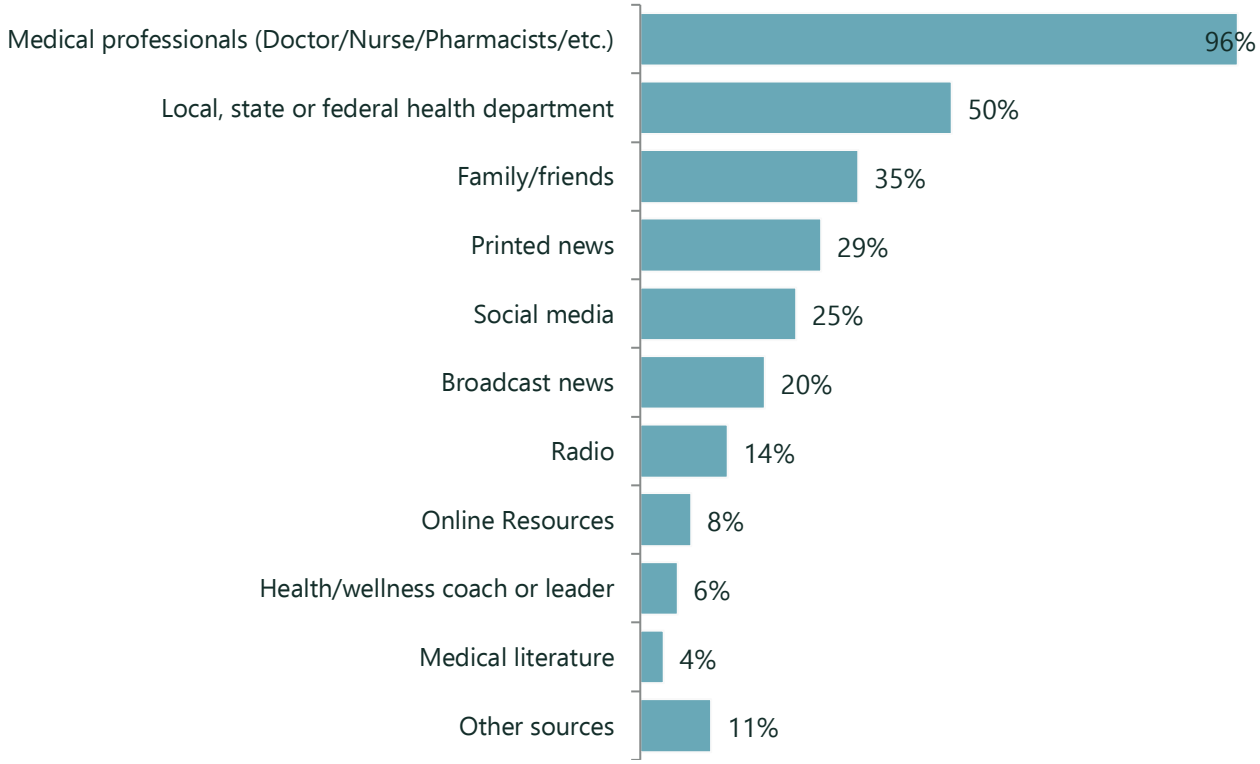

When asked where they obtain health information, the vast majority of respondents (96%) identified medical professionals—such as doctors, nurses, or pharmacists—as their primary source. This was followed by local, state, or federal health departments (50%) and family or friends (35%), indicating strong reliance on both official channels and personal networks.

Traditional media also remained significant, with printed news cited by 29%, social media by 25%, broadcast news by 20%, and radio by 14%. In contrast, fewer respondents reported using online resources (8%), health/wellness coaches or leaders (6%), medical literature (4%), or other sources (11%), suggesting these play a more limited role in health information dissemination.

When analyzed by age group, social media was a more important source of health information for respondents aged 34 and younger, while printed news gained importance among those aged 35 and older *(see Appendix D: Responses to Selected Survey Questions by Respondent Characteristics)*.

Figure 9: Sources of Health Information

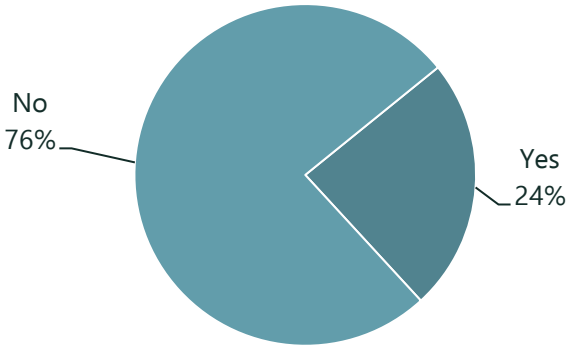

Where do you get your health information? Select all that apply.

About one fourth of respondents acknowledged having received medical care at a community health center, county health clinic, or other federally qualified health facility. This percentage was higher among those living in households earning less than $75,000 a year compared to those in higher-income households *(see Appendix D: Responses to Selected Survey Questions by Respondent Characteristics)*.

Figure 10: Use of Community or Federally Qualified Health Centers for Medical Care

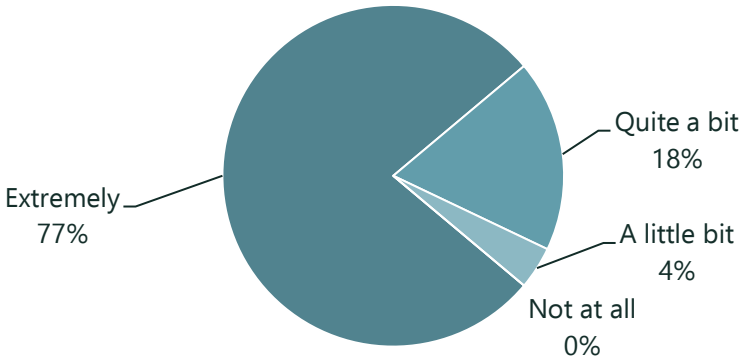

Have you ever received medical care at a community health center, county health clinic, or other federally qualified health facility?

About three-fourths of the respondents reported being extremely confident in completing medical forms independently. Of the remaining respondents, most felt quite a bit confident (18%), while very few felt only a little bit confident (4%). No respondents reported having no confidence at all in filling out medical forms.

Figure 11: Confidence in Completing Medical Forms Independently

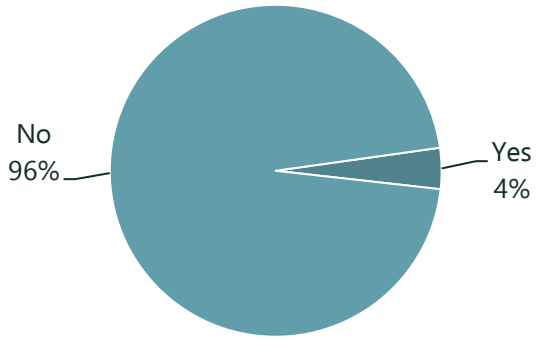

How confident are you in filling out medical forms by yourself?

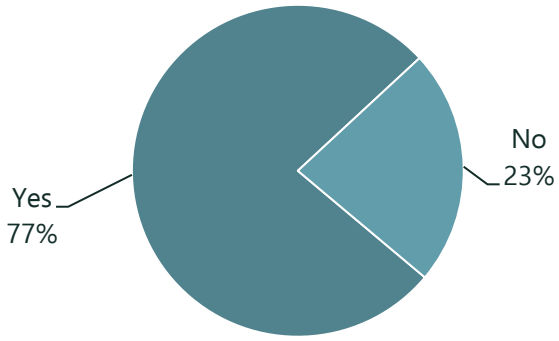

Only 4% of respondents reported seeking healthcare accommodation due to a disability or underlying health condition in the past 12 months. Of those, 77% received the accommodation they requested.

Figure 12: Healthcare Accommodations Due to Disability or Health Conditions

In the past 12 months, have you sought accommodation for your healthcare services because of a disability or underlying health condition?

*Was the requested accommodation provided?**

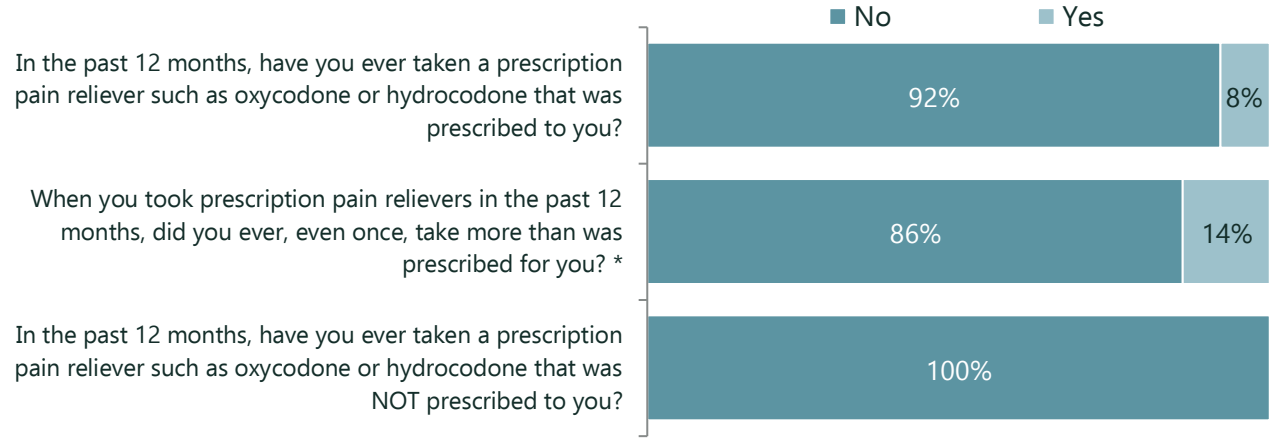

*Asked only to those who reported having sought accommodation for health services (4%).

Substance Use

The survey also included three questions related to the use of pain relievers. Approximately 1 in 10 respondents reported taking prescription pain relievers, such as oxycodone or hydrocodone, in the past 12 months. Those who had taken a prescription pain reliever were then asked a follow-up question: 'Did you ever, even once, take more than was prescribed to you?' Fourteen percent reported having done so. No respondents reported taking a prescription pain reliever, such as oxycodone or hydrocodone, that was not prescribed to them.

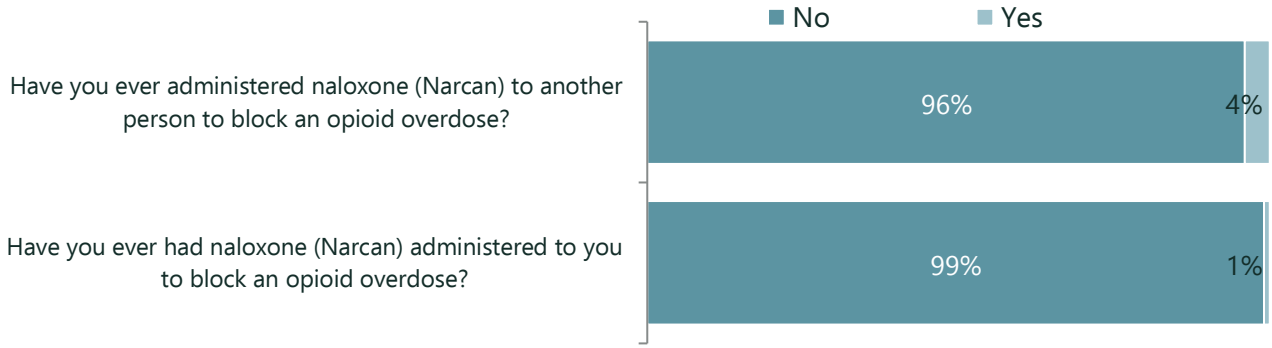

Figure 13: Pain Reliever Use

*Asked only to those who reported having taken a prescribed pain reliever (8%).

The survey also assessed the use of naloxone, a medication used to rapidly reverse opioid overdoses. Virtually all respondents (99%) reported not having used naloxone themselves, while approximately 1 in 20 (4%) reported having administered it to another person during an opioid overdose.

Figure 14: Naloxone Use

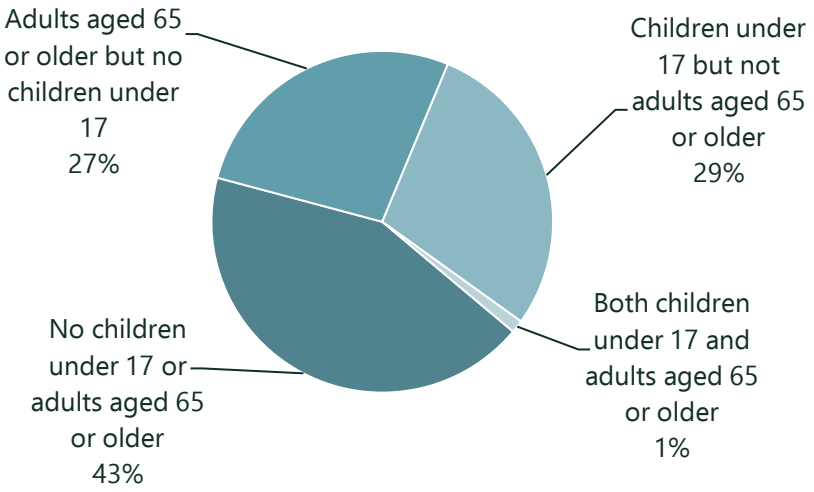

Household Composition

About 4 in 10 households surveyed did not include members under 17 or over 64 years old. In contrast, 30% of households included children under 17, but no adults aged 65 or older. A comparable proportion of households included adults aged 65 or older, but no children under 17. There were virtually no households having children under 17 and adult over 65 years of age.

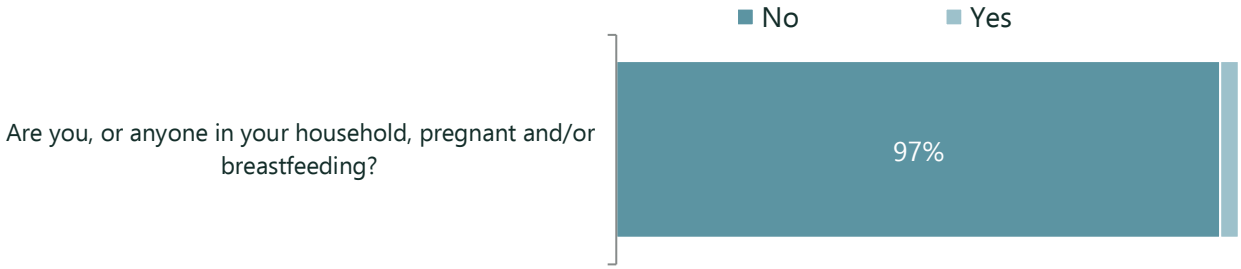

Figure 15: Presence of children under 17 and adults aged 65 or older in the household

Do any children 17 or under live in your household? Are you or any other members of your household aged 65 or older?

In the surveyed sample, very few households included pregnant or breastfeeding women (3%).

Figure 16: Household Pregnancy

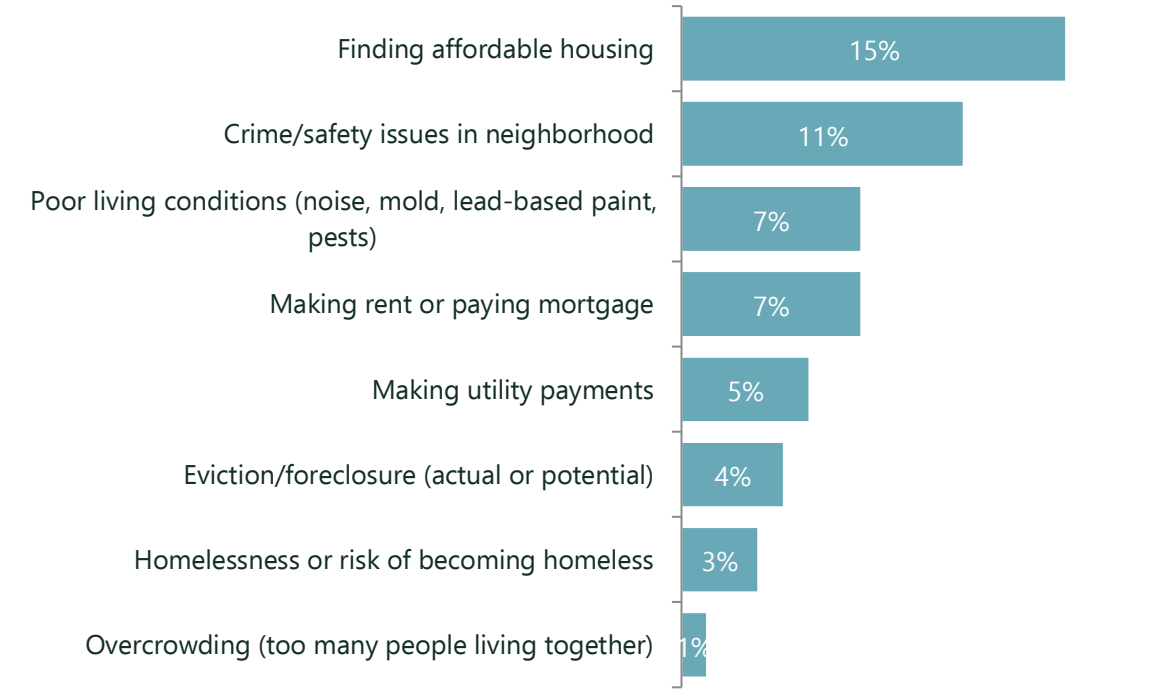

Financial Security

In addition to health-related questions, respondents were also asked how likely or unlikely they were to experience a range of housing-related challenges. The most commonly reported concern was finding affordable housing, with 15% of respondents indicating it as a major or moderate problem. This was followed by crime and safety issues in their neighborhood (11%), and poor living conditions, such as noise, mold, lead-based paint, pests, etc. (7%). Additionally, 7% reported difficulties making rent or mortgage payments, and 5% noted trouble making utility payments. Less commonly reported were concerns about eviction or foreclosure (4%), homelessness or risk of becoming homeless (3%), and overcrowding, which was cited by just 1% of respondents.

Residents aged 34 or younger, as well as respondents who were not white or lived in household making less than $75,000 a year, tended to rate most issues as major or moderate problems compared to older, white, and wealthier residents *(see Appendix D: Responses to Selected Survey Questions by Respondent Characteristics)*.

Figure 17: Housing Insecurity and Neighborhood Safety

How much of a problem, if at all, have the following housing issues been for you in the past 12 months?
(percent major or moderate problem)

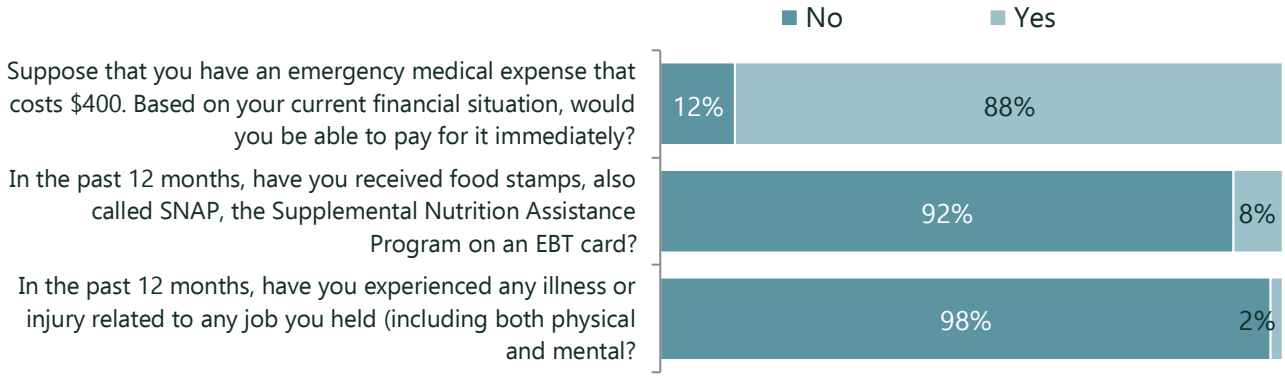

About 1 in 10 respondents acknowledged that they would not be able to immediately pay a $400 emergency medical expense. This proportion was higher among respondents who were not currently employed and among those living in households earning less than $75,000 per year, compared to employed respondents and those in higher-income households *(see Appendix D: Responses to Selected Survey Questions by Respondent Characteristics)*.

The survey also asked if respondents have received food stamps on an EBT card in the last 12 months. Less than 1 in 10 respondents reported receiving SNAP benefits. This doubled among non-employed residents (17%) and in households making less than $75,000 a year (23%).

Finally, almost no respondent reported having experienced any illness or injury related to any job they held (including both physical and mental health conditions).

Figure 18: Financial and Health Security

Appendix A: Respondent Characteristics

The following tables summarize the demographic characteristics of respondents to the Village of Oak Park Community Health survey.

Table 1: Ethnicity

Are you of Hispanic, Latino/a/x, or Spanish origin?	Percent of respondents
No	92%
Yes	8%
Total	100%

Table 2: Race

What is your race? (Select all that apply)	Percent of respondents
American Indian or Alaska Native	2%
Asian	10%
Black or African American	20%
Native Hawaiian or Other Pacific Islander	2%
White	72%
A race not listed	4%

Total may exceed 100% as respondents could select more than one option.

Table 3: Respondent Age

In which category is your age?	Percent of respondents
18-24 years old	1%
25-34 years old	22%
35-44 years old	22%
45-54 years old	16%
55-64 years old	11%
65-74 years old	15%
75 or older	13%
Total	100%

Table 4: Highest Level of Education Completed

What is your highest completed level of education?	Percent of respondents
Some high school	1%
Completed high school/GED	3%
Some college/technical degree/associates degree	13%
Bachelor's degree	28%
Master's degree or Doctoral degree/Professional degree	55%
Total	100%

Table 5: Marital Status

What is your marital status?	Percent of respondents
Never married	25%
Married	56%
In a domestic partnership	3%
Separated	2%
Divorced	9%
Widowed	6%
Total	100%

Table 6: Respondent Gender

What is your gender?	Percent of respondents
Woman	55%
Man	43%
Identify in another way	2%
Total	100%

Table 7: Respondent Sexual Orientation

What is your sexual orientation?	Percent of respondents
Heterosexual	88%
Lesbian	4%
Gay	3%
Bisexual	4%
Identify in another way	2%
Total	100%

Table 8: Employment Status

Please describe your current employment status.	Percent of respondents
Employed	59%
Self-employed	8%
Unemployed, seeking employment	5%
Unemployed, not seeking employment	2%
Student	1%
Retired	23%
Unable to work	1%
Other	1%
Total	100%

Table 9: Employment Status

Thinking about your main job, what kind of work do you do?	Percent of respondents
Manufacturing	1%
Arts, audio, video technology, and communications	4%
Marketing, sales, and services	4%
Banking/financial services/credit unions	2%
Non-profit charitable organization	10%
Business, industry, and trade associations	2%
Other services (cleaning, dog walking, beauty, etc.)	11%
Construction	1%
Professional and business services/consulting	9%
Education and training	8%
Public service and government	7%
Financial activities	2%
Shopping and retail	1%
Health care and health services	10%
Technology and computers	9%
Information/media	1%
Transportation and automotive services	3%
Legal	4%
Leisure and hospitality (travel, lodging, restaurants, bars, entertainment)	2%
Wholesale trade/sales	1%
Other	9%
Total	100%

Table 10: Household Income

How much do you anticipate your household's total income before taxes will be for the current year? (Please include in your total income money from all sources for all people living in your household)	Percent of respondents
Less than $25,000	8%
$25,000 to $49,999	9%
$50,000 to $74,999	13%
$75,000 to $99,999	9%
$100,000 to $149,999	13%
$150,000 to $199,999	18%
$200,000 to $299,999	19%
$300,000 or more	12%
Total	100%

Table 11: Geographic Area of Residence

What is your zip code?	Percent of respondents
60301	8%
60302	62%
60304	30%
Total	100%

Appendix B: Complete Survey Frequencies

The following pages contain a complete set of responses to each question on the survey. For questions that included a "don't know" or "no opinion" response option, two tables for that question are provided: the first excludes the "don't know" or "no opinion" responses and the second includes those response options.

Table 12: Question 2

How tall are you without shoes?	Percent	Number
Under 5' tall	3%	N=11
Between 5' 1" and 5' 6"	49%	N=158
Between 5' 7" and 6'	39%	N=127
Between 6' 1" and 6' 6"	8%	N=26
Over 6' 6" tall	1%	N=3
Total	100%	N=325

Table 13: Question 3 with "no opinion" responses

How much do you weigh without shoes? If you are currently pregnant, how much did you weigh before your pregnancy?	Percent	Number
Under 100 lbs	0%	N=1
100-149 lbs	30%	N=98
150-199 lbs	52%	N=170
200-249 lbs	13%	N=41
Over 250 lbs	5%	N=16
Prefer not to say	0%	N=0
Total	100%	N=326

Table 14: Question 3 without "no opinion" responses

How much do you weigh without shoes? If you are currently pregnant, how much did you weigh before your pregnancy?	Percent	Number
Under 100 lbs.	0%	N=1
100-149 lbs.	30%	N=98
150-199 lbs.	52%	N=170
200-249 lbs.	13%	N=41
Over 250 lbs.	5%	N=16
Total	100%	N=325

Table 15: Question 4 with "no opinion" responses

How would you describe your general health?	Percent	Number
Excellent	25%	N=81
Good	60%	N=193
Fair	14%	N=46
Poor	1%	N=2
Don't know	0%	N=0
Total	100%	N=322

Table 16: Question 4 without "no opinion" responses

How would you describe your general health?	Percent	Number
Excellent	25%	N=81
Good	60%	N=193
Fair	14%	N=46
Poor	1%	N=2
Total	100%	N=321

Table 17: Question 5 with "no opinion" responses

Please indicate if any of the following describes you.	No		Yes		Don't know		Total	
Are you deaf, hearing impaired, or have difficulty hearing	90%	N=291	9%	N=30	0%	N=1	100%	N=322
Are you blind, visually impaired, or have difficulty seeing that is not corrected with glasses	92%	N=296	8%	N=25	0%	N=0	100%	N=321
Do you have difficulty concentrating, remembering, or making decisions	92%	N=298	8%	N=25	0%	N=1	100%	N=323

Appendix C: Verbatim Responses to Open-Ended Questions

The following are verbatim responses to the open-ended questions on the survey. Because these responses were written by survey participants, they are presented here in verbatim form, including any typographical, grammar or other mistakes. The responses are grouped by category and are in alphabetical order.

Q7: If a physician or other medical professional ever diagnosed you with another condition not listed, please specify:

- 6/7 cervical impingement.
- Achalasia.
- ADHD
- ADHD
- ADHD.
- Adrenal condition, gastric issue.
- Adult ADHD
- Adult ADHD
- Afibrillation, pernicious anemia, congestive heart disease, breast cancer, fx femur
- ALLERGIC TO ALL SEA FOOD.
- Anemia.
- Anemia.
- atrial fibrillation
- Atrial fibrillation
- Bad needs. Got knees replaced. Cataracts, had surgery.
- Birth detect - surgery to fix.
- Brain cyst/operated 2x fine. Cystocele, hysterectomy, cataract, retina edemi glaucomd.
- Breast cancer in 2019 stage 1 treated c surgery & radiation and RX for 5 years.
- Carpal tunnel.
- cataracts.
- Celiac
- Chronic lymphedema
- Chronic Miofascial pain syndrome
- Cluster Headaches
- COLLAGEONOS COLITIS.
- Complex regional pain syndrome
- Crohn's disease
- DNA
- Don't understand this question. Over 12 years ago had issues that were addressed at that time.
- Dr. Steven Smrah PCC Wellness Center
- Dysautonomia.
- Endometriosis.
- Gall bladder disease, thyoid disease, knee replacement.
- Gender dysphoria

- GERD, allergies
- Gerd/reflux.
- Gluten allergy
- Graves Disease/Hyper thyroid
- Guillain-barre syndrome.
- Hashimoto's thyroiditis
- Herniated disc
- high blood pressure
- Hiopathic thrombocytopenia.
- Hypo-Lipidermia.
- Hypothyroidism
- Hypothyroidism
- Hypothyroidism.
- Hypothyroidism.
- Idiopathic sub glottal stenosis, cardiomyopathy
- ITP
- laryngeal pharyngeal reflux disorder
- leukocytoclastic vasculitis
- Low Vitamin D
- ME/CFS
- ME/CFS.
- Metro value replace at - rologicus space metro.
- Mitral valve prolapse
- myasthenia gravis caused by covid vaccine.
- Narcolepsy
- Osteopenia.
- Osteoporosis
- Osteoporosis
- OSTEOPOROSIS.
- Parking in's.
- Parkinson's
- PCOS
- PCOS, PTSD
- Pinched nerve in neck, acid reflux, stenosis.
- PMR osteopenia and osteoarthritis.
- Polycystic Ovarian Syndrome, Heart Arrhythmia
- Postural Orthostatic Tachycardia Syndrome; Hypermobility Spectrum Disorder
- PTSD, agoraphobia, panic disorder
- Pulmonary dementia due to a fib.
- RETROPERITONEAL FIBROSIS.
- Sacral agenesis, chronic pain, endometriosis.
- Sarcoidosis.
- Sleep apnea, IBS, cataract
- spinal stenosis, knee replacement (arthritis)
- Spinal stenosis.

- SpinoCerebellar ataxia27B
- Supraventricular tachycardia.
- Tbi.
- Thyroid issues corrected with 88 mcgs of synthroid
- Thyroid modules.
- Thyroid.
- Tuberculosis.
- ulcerative colitis
- Ulcerative Colitis, Bipolar Disorder
- Ulcerative colitis; Gerd; Hysterectomy.
- Underactive thyroid
- Unexplained Infertility
- VERY VERY MILD SEIZURES.

Q17: How do you primarily pay for your medical appointments? (Resp: Other)

- Aetna medicare ppo.
- For some specialties.
- Group plan for retirees.
- Insurance.

- Medicare advantage plan.
- Secondary - Blue Cross/Blue Shield.
- Supplement insurance.
- Through husbands coverage plan.

Q22: Where do you get your health information? (Resp: Other)

- AARP.
- Academic papers / research published.
- Am a RN and use online sources
- Books
- BOOKS.
- Google.
- Google/internet.
- Health app
- health newsletters from health care providers, medical professional websites
- Health websites on line
- High-quality, credible websites (Mayo Clinic, eg.).
- I am a healthcare provider, so I get information from peer-reviewed health publications
- I'm an MD. Medical texts and resources
- INSURANCE COVERAGE NOTICES.
- Internet

- SECURITY OFFICER.
- Small biz owner.
- Statistician
- stay at home parent - spouse is employed
- Warehouse work.
- WRITER.
- WRITER.

Q34: What makes it easy or hard to keep you or your family healthy in our village? Think about the places, people, and community:

- (+)Easy-many university [?] health facilities. (-)Hard-need more parking at some health facilities.
- (1) Plentiful doctors in our neighborhood - makes it easy. (2) Construction & poor clean up of construction - make it hard.
- A Food Dessert In Our Community Not Enough Stores To Buy Healthy Foods. Travel Is Too Long Not Adequate Or Close Public Transportation To Get To Healthy Food Stores. No Public Transportation Runs Out Here Because Bus Service Has Been Cut By Pace Mainly The #320 Pace Bus. It Feels Like A Dessert Out Here Homeless People Sleeping In Empty Bus Depots. Rent Is Too Hight More Than What I Make Can't Afford To Buy Healthy Food Because I Have To Make A Decision To I Eat Or Pay Rent.
- ABILITY TO TAKE WALKS IF SIDEWALKS ARE CLEAN & NOT BUMPY.
- Ability to walk without being harassed by people on the street or in the park. It is important for the village keeps sidewalks clear so people can walk in cold or snowy weather.
- Access to affordable groceries and better access to farmers, community gardens
- Access to care, groceries, pharmacies and transportation make it easy
- Access to grocery stores, healthcare, places to ride my bike or walk. Access to the CRC and other gyms for fitness. Good examples from a number of friends and older community members. Having a health-obsessed 18 year old son.
- Access to health insurance, transportation, childcare, financial resources makes it easy to keep me and family healthy.
- Access to healthy food choices and exercise
- Access to healthy food in grocery stores close by. Access to parks and safe places to walk close to our house.
- Access to quality medical care. Ability to excercise.
- Access to quality providers.
- Access to safe walking in neighborhood
- Accessible and high quality healthcare makes it easier to stay healthy.
- Adequate resources; sometimes lacking in communication of location & availability/accessibility.
- Air quality in unit makes it hard.
- Be MUCH less car dependent. More dedicated protected bike lanes. Safer pedestrian crossings on Harlem, Chicago, Roosevelt, Madison and North Ave. More public transportation within the village to destinations the people really use.
- Because of incontinences issues, I can take only short walks - more public restrooms would allow busy longer walks.

- Bike lanes and accessibility to downtown by foot. - EVs to reduce air pollution. - Open minded, diverse community is good for overall mental health.
- Bus service, stores, hospital etc. are all within reach.
- children live nearby and spend time with me, doctors close
- Church, medical care, diversity, extended family, stores.
- Close proximity to major health care centers
- Cost, taxes
- CRC (community rec center) - fitness class & fitness center is conveniently located & affordable.
- CRIME - CAUSES STRESS. COST OF LEAF COLLECTING - FINANCIAL BURDEN = STRESS. LAKC OF LAW ENFORCEMENT ON DRIVERS - CAUSES STRESS WHEN DRIVING.
- Crime, air polution, old building materials, lead water lines, cost of healthcare/prescriptions/vaccines
- Crime, dangerous drivers, and poor air quality make it hard to keep my family healthy. Access to the CRC helps keep us healthy though.
- Currently unemployed last week insurance runs out end of May & the money. Hard to park at Rush.
- DIESEL FUME FROM SCHOOL BUSES AND RAILROAD ENGINES.
- Difficult to purchase healthy affordable accessible prepared foods and groceries. Difficult to enroll in the otherwise affordable exercise classes at PDOP, especially the new CRC because of very few class offerings. Difficultly enrolling children in summer camps and after school care because of available spots.
- Doctors and hospitals
- Doctors rush hospital rentists.
- ease of medical access
- Easy - ability to walk to services & businesses.
- Easy - access to CRC, several grocery stores, overall feeling of safety
- Easy - accessibility of op rush.
- EASY - ACESS TO DOCTORS IN THE VILLAGE, RUSH HOSPITAL NEAR BY.
- Easy - lots of parks, very walkable, plenty of gyms/community centers
- Easy - park district, block parties (social relationships), walkability, school athletics hard - traffic danger, air pollution.
- Easy : good doctors and hospitals, I now know of health care places where we can have same days appointments if needed.
- Easy access to a pediatrician, urgent care, dentist office, etc. Easy access to pharmacies & grocery stores. Walk/bike-friendly + public transit to allow us to be more active.
- Easy access to Chicago hospitals, esp. NWM.
- Easy access to downtown Chicago where my doctors & hospital are located; kind canny neighbors and friends make it easy; Easy access to grocery stores and pharmacy.
- Easy access to good, healthy food, means of exercise, and good health care.
- Easy access within walking to many health care providers in Oak Park [?] , good sidewalks for outdoor exercise plus parks.
- Easy due to local and city resources, especially Rush Medical Center and Oak Park Rush
- Easy- Elmhurst and Rush are here. Hard - more physical therapy places need to me available
- Easy- my doctor's office is a few minutes walk away
- Easy, fast connection to medical providers - I'm aware that we're really fortunate.

- Easy: Availability of ways to be passively active through non-personal vehicle transportation; hard: property taxes cut into money available for healthier food options/investing in fitness
- EASY: Good options for groceries and fresh food in the area. There are a lot of parks and open outdoor spaces for the kids to play and get fresh air in a safe environment. Regional access to a wide variety of doctors and medical specialists.
- Easy: Other residents who care about their health; nearby hospitals and pharmacies
- Easy: park district makes it very easy and affordable hard: too many people asking for the same services.
- EASY: RUSH OP hospital, its physicians and staff. Getting free Covid tests from various sources. CVS pharmacy in Target. OP Township help with LINK card and vaccinations. Mills Park Tower offering affordable housing and activities like Yoga and Tai Chi.
- Easy: We use the senior ride services for my mom who is 73. Hard: people smoking on the "L" trains. Hard: We don't have a car + use bikes and some areas are not safe to ride.
- Excellent access to many hospitals and docs
- Excellent health care options - doctors, rush hospital. Many places to buy fresh, healthful foods, farmers market. CRC.
- Excellent health care options since I have excellent insurance
- Expensive food, poor urban planning in areas that could be walkable, too little time off of work
- Expensive to live here, taxes.
- Extremely expensive childcare eating up a large portion of our spending and then not having an affordable community system to support with childcare.
- Family member not in household affected by the high level Op alcohol/drugs available, used by local youth -> 30s. Access to drugs on CTA lines fix this w/ city/ suburb cooperanon.
- Farmer's market. The village has little impact on my health & my partner's health. We have easy access to work-outs, though not through village funded activities. We would go anywhere for that though.
- Finding services or medications that comply with complicated health insurance structure.
- Finding time to certain appointments/scheduling - allowing health to slide down the priority list due to all we do with our family of 5.
- Fortunately we haven't my issues. Our medical needs have been met, and our health is good because of lifestyle choice & health care providers.
- Genetic neurological disease
- GOING TO NAMI DROPIN CENTER COUPLE TIMES A WEEK.
- Good access to public transit, walkable town, healthy food nearby.It would be nicer if Oak Park, and the surrounding communities, were more bike friendly. I previously lived in California and felt much safer commuting by bike there.
- Good hospital (Rush) and good doctors.
- Good village services and infrastructure maintenance
- Hard to find a good P.C.P. Concerned about the quality of local emergency rooms.
- Hard to find a nearby primary care doctor.
- HARD TO FIND PARKING WHEN VISITING SOME FACILITIES (MEDICAL) EASY - GOOD HEALTH FECILITIES IN TOWN OR CLOSE TO OAK PARK.
- Have a place for people to go buy low cost medication and talk about their health issues.

- Having a family physians close by; village ambulance service; hospitals, pharmacy within blocks, senior services by OP government & township and friendly & helpful neighbors plus food stores & transportation.
- Having a large number of parks and sidewalks is beneficial.
- Having assets
- Health care is near me
- I am concerned about the increasing use of the main library as a de facto homeless shelter during the day. Many are also mentally ill. Oak Park can do better.
- I appreciate that the village has parks with trees, and that we can now enjoy the CRC. The tree population in the village is good. I will always remember that I got my first COVID-19 vaccine through the village and I am very grateful for that.
- I can walk to work and many other things, I can access physical recreation for free (at parks) or low cost (CRC, Park District, YMCA) I can access inexpensive entertainment by walking or public transportation, I walk to my medical care at Rush Oak Park, I have access to healthy whole, minimally packaged food at Sugar Beet Coop and, seasonally, the OP Farmers Market.
- I chose not to have a car. OP makes it easy to walk everywhere for health and for shopping and going to the gym. If my backpack is too full or it's raining or freezing outside I can jump on a bus across the street from my condo. I also have 2 parks close by that I walk in every day for nature bathing.
- I don't enjoy calling for an app't or information, it is all recorded & takes a long time to be connected.
- I don't like or trust pandhandlers, street women with children & swarms of teen gatherings
- I eat will and exercise.
- I feel like the people in Oak Park have concern for their neighbors and I appreciate the pride everyone seems to take in their homes and yards. I enjoy walking around and I feel safe doing so, even at night. The Park District makes it easy and affordable for me to get exercise and find community.
- I feel that there is a sense of community in Oak Park, though I struggle to get connected with it. There are many healthcare options in Oak Park that make it easy to access and use.
- I FIND IT EASY AS I AM NON ALONE AND IN GOOD HEALTH.
- I get to walk to my doctors offices - pro. There are many local specialists - pro.
- I have a GP we've seen for 20 years. He knows us and advocates for us.
- I have a high deductible health care plan so out of pocket costs are high when need healthcare and makes me question if I should seek care as wait.
- I have concerns about mold/indoor air quality in my home. I am hopeful that the houses on the OPCAN tour may have had similar considerations when upgrading some of their systems for energy efficiency and can provide some inspiration. But it would be nice if the village had some resources about mold in old houses given that most homes here are 100+ years old.
- I like my proximity to grocery stores, libraries, movie theaters, coffee shops, restaurants. However, if I decide to move to another Oak Park residence, I would have difficulty finding an affordable home. Home prices & rents are too high for middle income individuals.
- I like that most residents in Oak Park are vaccinated about Covid & the flu!
- I like that there are so many places that are within walking distance.

- I love the people here, and generally feel a sense of shared values with the majority of Oak Parkers. I'm also living beyond my means as a single parent, so it's a challenge to continue to own a home here
- I love the walkability of Oak Park. Walking my dogs is a significant source of physical activity. It's hard to walk in parks where people have their dogs off-leash (despite posted signs).
- I recently moved to O.P from Berwyn to escape car alarms going off all night, congestion, crime (burglary). I was mugged 1x in Oak Park, in 8-2023. Police were very responsive & helpful.
- I think there are plenty of resources available. I appreciate the Edward-Elmhurst urgent care. Our primary physician is also in Oak Park.
- I would prefer not being exposed to smoke from outdoor cooking and/or campfires.
- I'm doing well with the programs I'm in and help from the village.
- I'm lived in Oak Park since 1957.
- IDK
- If I ever need senior services they have them in OP. Interesting library programs. Prompt emergency services. Worry about crime.
- Inaccessible buildings, poor sidewalks, very limited accessible housing stock for families.
- Insurance costs and prescriptions cost of healthy food.
- It doesn't. Just have to know where to go to get the best quality.
- It is easy to have nice and safe parks to enjoy and everything being walkable with stoplights and crosswalks I like that I think welcome more affordable options for dining out that are healthier fresher options
- It is neither easy nor hard. It is something that needs to be done.
- It is walkable and I actually know my nieghbors
- It takes to long to schedule appointments.
- It was very difficult to get an initial covid shot because we were told to get it from the village health department, but they wouldn't give it to us in spite of signs saying it was available for free.
- It would be easier to go out for long walks if there were more public bathrooms that are available in the winter.
- It's difficult to find affordable housing for individuals that are low income to middle class. It's also difficult to purchase a home in the village unless income is significantly high. We need moderate apartments, not luxury and we need houses in the $300-400K range. Additionally, local taxes on food make it more difficult to remain here.
- It's easier for us because of our income and the availability or doctors in the Chicagoland area
- It's easy because we have so many resources.
- It's easy for my family to remain healthy because we have the resources to afford proper nutrition and healthcare.
- It's inconvenient when HMO plans make you go outside the area you live to get medical care. To have lower insurance, you have to do an HMO plans and are stuck with what is allowed which may be in a different town (a family member has to go to facilities in Berwyn for example). PPO plans you can go to convenient places but it costs so much more. Wish there was something that could help, either getting more Oak Park medical facilities on more HMO plans, or start some kind of local plan option.
- Just moved back to OP after 25 years in Seheumsburg. Hoping for better senior services here, but newly exploring options here currently.

- Kids in school/daycare make it hard to stay healthy
- Lack of affordable quality fitness centers within and around the village makes it difficult. I belong to Planet Fitness and the CRC, but both are pretty crowded unless going in the middle of the day, which isn't a reasonable option in most cases. I was attacked and shot while running in OP about 5 years ago and have been followed by men several times since, including one time where a guy tried to trap me in alleys with his car and another when I had to flag down a PO to drive me home. I no longer go running or on walks without my dog that's trained for protection, but off-leash dog enforcement is an increasing problem here. He's been attacked several times while we have been out. These aren't horribly prohibitive, but the barriers start stacking up. I will say I appreciate the numerous options we have for healthy foods (supermarkets and restaurants) is stellar. I am a vegan, and particularly the options at Pete's are much better than anywhere nearby and often their vegetables are more afforable.
- Lack of diversity of worldly experience. Extreme lack of perspective, true adversity, well-rounded education, and common sense. Harassment over non extreme left ideology/ religion. Lack of natural food supply - non chemically sprayed/ treated. Poor air quality with pollution of 290 and Harlem. Poor water quality. Water is extremely dangerous and unnatural. Not great for pregnancy or small children without filtration and RO.
- Lack of pedestrian safety poor hand hygiene of others.
- Lack of primary care providers growing cost of health insurance, the cost I pay for my health insurance, the deductibles, and the cost of services.
- Lack of social opportunities leads to isolation & depression, especially in the winter. - Good = free indoor track at local gym.
- Lead pipes make it hard.
- Lot of anxiety about being able to afford real estate taxes now disabled and retired. Will I lose my house or have to move like most retired Oak parkers?
- Lots of access to medical providers in the area
- LOTS OF PROVIDERS AND O.P. RUSH HOSPITAL.
- Lower cost of rent would be helpful
- MEDICAL CARE IS CLOSE BY AND WE HAVE FINANCIAL RESOURCES AVAILABLE.
- Medical facilities easily accessible.
- More options to healthy food, more outdoor activities to promote good health
- More safe bike routes, a roller / skate park.
- My car - I drive to necessary services.
- My daughters father poses challenges to my health and well being.
- Neighborhood walking & to library, el, grocery - etc. Noise of ambulances disturbs sleep.
- Neighbors, resources, information, morals
- Next to impossible to find a primary care doctor open to new patients. I drive over an hour to see my doctor
- NO COMMENT.
- no mortgage, sidewalks, good infrastructure, services and events and generally nice people
- not sure if this falls under health, but the drivers near Austin/east side of Oak Park STINK. It's very dangerous to drive over there coming off of 290. I'm trying to avoid that area with my family.
- NOT THE VILLAGE.
- Nothing

- NOTHING - WE ARE EXTREMELY PRIVILIGED.
- Nothing is difficulty about healthy living for me.
- Now my main problem is transportation to doctors or specialists I see infrequently for follow-up appointments or periodic check-ups (not in Oak Park.
- Nuisances from dollar tree located at Oak Park ridge mall had continued to litter our neighborhood with debits from their unprotected garbage dumpstons. Delivery trucks run their engines at odd hours in the night. The stress is enormous.
- Oak Park doesn't erect a lot of barriers to getting health care.
- OAK PARK HOSP (RUSH).
- Oak Park is a very walkable city with maintained sidewalks and parks.
- oak park is a very walkable community. It's relatively easy to have an active and healthy lifestyle here.
- Oak Park is near good medical facilities that make it easy for me to get the health care that I need.
- Oak Park is very walkable so easy to exercise. Hospital is nearby. People are friendly & social.
- Or doctors are here. Rush Oak Park is here Sears Pharmacy is here we have access to high-quality care here.
- Our too-high taxes and too-woke local governing bodies
- Parking at Rush!
- Patrol safety is easier hard paying for my medicine out of my pocket have no medical insurance to cover for cost of my medicine.
- Paving people of undetermined health statis in the community.
- Paying attention to my own health, location of services
- Physicians, hospitals & immediate care facilities are all nearby.
- Plenty of good options for doctors
- Post office, library, grocery store, pharmacy, bank, $ store are all within walking distance. Grateful to god for all. Residence is provided by one of my children.
- Private gyms here are expensive + don't participate in any discount programs. Would like more public gym options esp. during winter.
- Property taxes eat up a lot of income.
- PROPERTY TAXES.
- Proximity to many health services is excellent. Walkability of the community is a big health benefit.
- Public transport
- Recently moved here from the city, and as far as mental health I feel less stress and happier due to living situation, yard, less busy feeling, etc.
- Scheduling appointments is difficult. Often long wait to see doctors.
- school kids spreading viruses
- SENIOR SERVICES O.P. TOWNSHIP "CHORES" - EASIER.
- Sidewalk congestion while walking due to bikes and electric scooters.
- taxes
- The condo building I live in has filthy air. Common vents are filthy and not filtered 201 S. Maple.
- The high rents that increase every year along with increase in parking. Lack of a good, varied and flourishing downtown oak park. Leaders that care more about "TAKEOUT 25" than the actual people in this village! - Hello Ravi Parakeet!

- The noise of loud cars, music screaming, honking can be very stressful to live in downtown op, and it seems bad behavior is constantly tolerated by the village + police dept.
- THE ONLY THING I CAN THINK OF ARE ALL THE BAD QUALITY FOODS FULL OF SUGAR AND OTHER TOXINS TEMPTING CONSUMERS AT EVERY CORNER. THESE ARE THE SOURCE OF MANY PROBLEMS LISTED HERE.
- THE PARKS !
- The parks and outdoor spaces make it easy to stay healthy. It is difficult to find safe places to cycle with my family, as we have almost no bike paths or lanes (protected or otherwise)
- The pool passes are expensive there is no gym park near me.
- The proximity and safety of being able to walk to so many places. The safety of being able to run in the streets early morning. The ease of buying high-quality food shout out to Sugar Beet Coop. Proximity to quality healthcare.
- The Trump assault on expertise, science, and the federal government broadly.
- the variety of grocery stores is very helpful
- The village makes it easy to live here by offering community services (i.e park, library, school, festivals/programs) that have a sense of belongings, inclusion & well-being. Taxes are high though.
- There isn't an affordable mental health hospital. Not that I know at least.
- Time and multiple commitments as a single mom.
- To go running or walking for exercise, there are a lot of "near misses" when you cross streets in the designated crosswalks. The air quality is often poor. The stress of crime and mentally ill on the streets is considerable.
- TOO MANY DOGS IN CERTAIN AREAS... NO RESTRICTIONS-NEED MORE NICE AFFORDABLE APTS. FOR SENIORS-INDEPENDENT LIVING!
- Too many rodents in living spaces (indoors and outdoors);
- township level is great + health department is great
- Unable to go outside and exercise due to gang activity and crime.
- Unhealthy & unsanitary homeless. Piles of litter where they sleep in hallways, on park benches. These cause anxiety which in turn cause health problems. The fact that guns are being used.
- Vaccines offered by the health department the quarterly newsletter that lets Oak Parkers know what is available as far as services.
- Vehicle noise when they pass the ALDI parking lot!!!
- Very walkable and resources, but difficult to get appointments with specialists
- Walkability to everything I need keeps me active
- Walkability, food choices/farmers market, library, good hospital in Rush OP
- Walkable destination, park district w/ good fitness options.
- Walkable neighborhood, relatively easy mass transit access, wellness programs available through PDOP, good grocery shopping options. Everything I need on a regular basis can feasibly be reached by walking or biking.
- We are a family of physicians which makes it easy
- WE ARE BLESSED BECAUSE TOWNSHIP OFFICE NEAR, TWO KNOWN HOSPITALS, FIRE DEPT, PUBLIC LIBRARY SOCIAL WORKER. MULTIPLE DRUG STORES NEAR. SIDEWALKS ARE ACCESSIBLE, FOOD STORES ARE NEAR.
- We have access to several health care providers in our village. The fact that my husband and I have health insurance is crucial, however.

- We have an HMO. None of our medical care is in the village. All is approx 45-60 min away also, we cannot find a therapist for our teen who will take our HMO/insurance.
- We have rush op hospital & all of its satellites. Well staffed including many specialists. One issue is that the doctors have limited time with patients.
- We live close to a variety of medical resources.
- We own our own home, can afford utilities, plenty of access to food, easy to get vaccinations, close to doctors
- WHAT MAKES IT EASY IS THE COMMUNITY'S RESIDENCES ARE HELPFUL TOWARDS EACH OTHER. IDK ABOUT THE VILLAGE'S OPE [?] TBH.
- What makes it hard - prices of food to eat health. What makes it easy - surveys like this to show someone is concern about the people in there community.
- Worried about my safety when walking in neighborhood because of bad drivers.
- WORRY ABOUT REAL ESTATE TAXES.
- Would like more clinics. Walgreens used to have them. Useful for UTI and other immediate problems

D2: What is your race? (Resp: Race not listed)

- Caucasian. Eastern Europe.
- Mediterranean
- Mexican.
- Middle Eastern.

Appendix D: Responses to Selected Survey Questions by Respondent Characteristics

The subgroup comparison tables contain the cross tabulations of selected survey questions by respondent characteristics. Most ratings are shown as percent positive ratings (e.g., percent "yes"). Chi-square or ANOVA tests of significance were applied to these breakdowns of survey questions. A "p-value" of 0.05 or less indicates that there is less than a 5% probability that differences observed between groups are due to chance; or in other words, a greater than 95% probability that the differences observed in the selected categories of the sample represent "real" differences among those populations.

For each pair of subgroups that has a statistically significant difference, an upper-case letter denoting significance is shown in the category with the larger column proportion. The letter denotes the category with the smaller column proportion from which it is statistically different. Differences were marked as statistically significant if the probability that the differences were due to chance alone were less than 5%. Categories were not used in comparisons when a column proportion was equal to zero or one.

Items that have no upper-case letter denotation in their column and that are also not referred to in any other column were not statistically different.

For example, in Table 65 on page 64, residents aged 55 and older (C) reported a significantly higher proportion of 'deaf, hearing impaired, or difficulty hearing' (21%) than those aged 18-34 (0%) and 35-54 (3%). This significant difference is denoted by the letters "A B" in the residents' aged 55 and older cell for that line item.

Comparisons by Gender, Age and Race/Ethnicity

Table 64: Question 4 by Gender, Age and Race/Ethnicity

Percentage Excellent or Good.	Female (A)	Male (B)	18-34 (A)	35-54 (B)	55+ (C)	White alone, not Hispanic (A)	Hispanic and/or other race (B)	Overall (A)
How would you describe your general health?	89%	83%	82%	85%	87%	85%	86%	85%

Table 65: Question 5 by Gender, Age and Race/Ethnicity

Please indicate if any of the following describes you. Percentage Yes.	Female (A)	Male (B)	18-34 (A)	35-54 (B)	55+ (C)	White alone, not Hispanic (A)	Hispanic and/or other race (B)	Overall (A)
Are you deaf, hearing impaired, or have difficulty hearing	8%	10%	0%	3%	21% A B	11%	6%	9%
Are you blind, visually impaired, or have difficulty seeing that is not corrected with glasses	7%	9%	8%	8%	7%	4%	14% A	8%
Do you have difficulty concentrating, remembering, or making decisions	7%	7%	10%	6%	8%	9%	5%	8%
Do you have difficulty walking or climbing the stairs	10%	10%	1%	7%	19% A B	10%	11%	10%
Do you have difficulty doing errands alone (such as visiting a doctor's office or shopping)	3%	2%	0%	1%	7% A B	4%	2%	3%
Are you now taking medicine/receiving treatment from a doctor or other health professional for any type of mental health/emotional condition	38% B	18%	44% B C	30%	20%	27%	33%	29%

Table 66: Question 6 by Gender, Age and Race/Ethnicity

Has a physician or other medical professional ever diagnosed you with any of the following conditions? Percentage Yes.	Female	Male	18-34	35-54	55+	White alone, not Hispanic	Hispanic and/or other race	Overall
	(A)	(B)	(A)	(B)	(C)	(A)	(B)	(A)
High blood pressure	20%	29%	6%	7%	51% A B	24%	23%	24%
High cholesterol	27%	35%	4%	21% A	54% A B	32%	25%	30%
Angina or coronary heart disease	2%	6%	0%	0%	11% A B	6%	1%	4%
Heart attack or myocardial infarction	1%	3%	0%	0%	4% A B	2%	1%	2%
Stroke	2%	0%	0%	0%	3% A B	1%	2%	1%
Diabetes (type 1)	2%	2%	0%	4%	2%	2%	2%	2%
Diabetes (type 2)	4%	8%	4%	1%	11% A B	3%	9% A	6%
Gestational diabetes	5% B	1%	11% B C	1%	2%	2%	5%	3%
Prediabetes	18% B	8%	18% B	7%	17% B	12%	16%	13%
Chronic obstructive pulmonary disease (COPD), emphysema, or chronic bronchitis	2%	0%	0%	0%	5% A B	3%	1%	2%
Asthma	27% B	12%	35% B C	18%	13%	11%	36% A	20%

Has a physician or other medical professional ever diagnosed you with any of the following conditions? Percentage Yes.	Female	Male	18-34	35-54	55+	White alone, not Hispanic	Hispanic and/or other race	Overall
	(A)	(B)	(A)	(B)	(C)	(A)	(B)	(A)
Arthritis, rheumatoid arthritis, gout, lupus, or fibromyalgia	17%	15%	2%	9%	32% A B	17%	14%	16%

Other source	23%	21%	20%	27%	20%	23%	22%	23%

Table 82: Question 23 by Gender, Age and Race/Ethnicity

Percentage Yes	Female	Male	18-34	35-54	55+	White alone, not Hispanic	Hispanic and/or other race	Overall
	(A)	(B)	(A)	(B)	(C)	(A)	(B)	(A)
Do any children 17 or under live in your household?	34%	25%	22% C	61% A C	5%	30%	29%	30%

Table 83: Question 24 by Gender, Age and Race/Ethnicity

Percentage Yes	Female	Male	18-34	35-54	55+	White alone, not Hispanic	Hispanic and/or other race	Overall
	(A)	(B)	(A)	(B)	(C)	(A)	(B)	(A)
Are you or any other members of your household aged 65 or older?	31%	26%	0%	2%	72% A B	34% B	18%	28%

Table 84: Question 25 by Gender, Age and Race/Ethnicity

Percentage Yes	Female (A)	Male (B)	18-34 (A)	35-54 (B)	55+ (C)	White alone, not Hispanic (A)	Hispanic and/or other race (B)	Overall (A)
Are you, or anyone in your household, pregnant and/or breastfeeding?	3%	4%	6% C	5% C	0%	5%	1%	3%

Table 85: Question 26 by Gender, Age and Race/Ethnicity

How much of a problem, if at all, have the following housing issues been for you in the past 12 months? Percentage Major or Moderate problem.	Female (A)	Male (B)	18-34 (A)	35-54 (B)	55+ (C)	White alone, not Hispanic (A)	Hispanic and/or other race (B)	Overall (A)
Making rent or paying mortgage	7%	7%	7%	7%	7%	3%	14% A	7%
Making utility payments	4%	5%	0%	5%	7% A	3%	8%	5%
Finding affordable housing	20% B	8%	30% B C	12%	7%	9%	23% A	15%
Eviction/foreclosure (actual or potential)	6%	2%	12% B C	1%	3%	3%	6%	4%
Homelessness or risk of becoming homeless	4%	2%	7% B	1%	3%	1%	6% A	3%
Poor living conditions (noise, mold, lead-based paint, pests)	11% B	4%	15% B C	4%	6%	5%	12% A	7%
Crime/safety issues in neighborhood	13%	7%	19% B C	7%	9%	7%	16% A	11%

How much of a problem, if at all, have the following housing issues been for you in the past 12 months? Percentage Major or Moderate problem.	Female	Male	18-34	35-54	55+	White alone, not Hispanic	Hispanic and/or other race	Overall
	(A)	(B)	(A)	(B)	(C)	(A)	(B)	(A)
Overcrowding (too many people living together)	1%	1%	0%	0%	3% B	1%	1%	1%

Table 86: Question 27 by Gender, Age and Race/Ethnicity

Percentage Yes	Female	Male	18-34	35-54	55+	White alone, not Hispanic	Hispanic and/or other race	Overall
	(A)	(B)	(A)	(B)	(C)	(A)	(B)	(A)
Have you known someone in the past year who died by suicide or survived a suicide attempt?	16% B	6%	19% C	10%	8%	10%	13%	11%

Table 87: Question 31 by Gender, Age and Race/Ethnicity

Percentage Yes	Female	Male	18-34	35-54	55+	White alone, not Hispanic	Hispanic and/or other race	Overall
	(A)	(B)	(A)	(B)	(C)	(A)	(B)	(A)
Suppose that you have an emergency medical expense that costs $400. Based on your current financial situation, would you be able to pay for it immediately?	86%	90%	86%	92%	86%	98% B	71%	88%

Table 88: Question 32 by Gender, Age and Race/Ethnicity

Percentage Yes	Female (A)	Male (B)	18-34 (A)	35-54 (B)	55+ (C)	White alone, not Hispanic (A)	Hispanic and/or other race (B)	Overall (A)
In the past 12 months, have you experienced any illness or injury related to any job you held (including both physical and mental health conditions)?	4%	1%	6% B C	2%	1%	4% B	0%	2%

Table 89: Question 33 by Gender, Age and Race/Ethnicity

Percentage Yes	Female (A)	Male (B)	18-34 (A)	35-54 (B)	55+ (C)	White alone, not Hispanic (A)	Hispanic and/or other race (B)	Overall (A)
In the past 12 months, have you received food stamps, also called SNAP, the Supplemental Nutrition Assistance Program on an EBT card?	10%	5%	11%	6%	8%	2%	16% A	8%

Comparisons by Employment, Income and Area of Residence

Table 90: Question 4 by Employment Status, Income and Area

Percentage Excellent or Good.	Employment Status		Household Income			Area		Overall
	Employed or Self-employed	Everything else	Less than $75,000	Between $75,000 and $199,999	$200,000 or more	North of Madison St.	South of Madison St.	
	(A)	(B)	(A)	(B)	(C)	(A)	(B)	(A)
How would you describe your general health?	89% B	77%	80%	88%	87%	84%	89%	85%

Table 91: Question 5 by Employment Status, Income and Area

Please indicate if any of the following describes you. Percentage Yes.	Employment Status		Household Income			Area		Overall
	Employed or Self-employed	Everything else	Less than $75,000	Between $75,000 and $199,999	$200,000 or more	North of Madison St.	South of Madison St.	
	(A)	(B)	(A)	(B)	(C)	(A)	(B)	(A)
Are you deaf, hearing impaired, or have difficulty hearing	4%	21% A	9%	11%	6%	11%	6%	9%
Are you blind, visually impaired, or have difficulty seeing that is not corrected with glasses	6%	12% A	11% B C	5%	3%	10% B	2%	8%
Do you have difficulty concentrating, remembering, or making decisions	6%	11%	9%	7%	7%	10% B	2%	8%
Do you have difficulty walking or climbing the stairs	5%	22% A	18% B C	9%	5%	12%	6%	10%
Do you have difficulty doing errands alone (such as visiting a doctor's office or shopping)	0%	8% A	4%	3%	0%	3%	2%	3%
Are you now taking medicine/receiving treatment from a doctor or other health professional for any type of mental health/emotional condition	28%	33%	34% B	22%	33%	29%	31%	29%

Table 92: Question 6 by Employment Status, Income and Area

Has a physician or other medical professional ever diagnosed you with any of the following conditions? Percentage Yes.	Employment Status		Household Income			Area		Overall
	Employed or Self-employed	Everything else	Less than $75,000	Between $75,000 and $199,999	$200,000 or more	North of Madison St.	South of Madison St.

Appendix F: Survey Methodology

About the Survey

The Village of Oak Park Community Health Survey was first administered in 2025. Its goal is to obtain respondent perspectives about their overall health, health conditions, and medical treatments, among other related issues. The Village of Oak Park funded this research. Please contact Emma Betancourt of the Village of Oak Park at EBetancourt@oak-park.us if you have any questions about the survey.

Developing the Questionnaire

The 2025 survey instrument was developed in an iterative process between Oak Park staff and Polco staff. A final five-page questionnaire was created.

Selecting Survey Recipients

"Sampling" refers to the method by which survey recipients are chosen. The "sample" refers to all those who were given a chance to participate in the survey. A list of all households within the zip codes serving Oak Park was purchased from Go-Dog Direct based on updated listings from the United States Postal Service, updated every three months, providing the best representation of all households in a specific geographic location. Polco used the USPS data to select the survey recipients.

A larger list than needed was pulled so that a process referred to as "geocoding" could be used to eliminate addresses from the list that were outside Oak Park's boundaries. Geocoding is a computerized process in which addresses are compared to electronically mapped boundaries and coded as inside or outside desired boundaries; in this case, within the Village of Oak Park. All addresses determined to be outside the study boundaries were eliminated from the list of potential households. A random selection was made of the remaining addresses to create a mailing list of 3,000 addresses.

To choose the 3,000 survey recipients, a systematic sampling method was applied to the list of households. Systematic sampling is a procedure whereby a complete list of all possible households is culled, selecting every *Nth* one, giving each eligible household a known probability of selection, until the appropriate number of households is selected. Multi-family housing units were selected at a higher rate as residents of this type of housing typically respond at lower rates to surveys than those in single-family housing units. In general, because of the random sampling techniques used, the displayed sampling density will closely mirror the overall housing unit density (which may be different from the population density).

The survey was also available online in Spanish, and all mailings contained instructions in Spanish on how to access the online survey.

In addition to the scientific, random sample, a link to an online "opt-in" survey was publicized through various community channels. This opt-in survey was identical to the scientific survey and open to all residents. The open participation survey was also available in Spanish.

Survey Administration and Response Rate

Each selected household was contacted two times. First, a prenotification announcement was sent on February 25, 2025, informing the household members that they had been selected to participate in the 2025 Village of Oak Park Community Health Survey, giving them the opportunity to respond online. Approximately one week after mailing the prenotification, each household was mailed a paper survey containing a cover letter signed by the Oak Park Public Health Department enlisting participation. The packet also contained a postage-paid return envelope in which the survey recipients could return the completed questionnaire directly to Polco. All mailings contained instructions in both English and Spanish, and the online survey was also available in Spanish. Data collection was open through April 16, 2025. The online "opt-in" survey became available to all residents on March 20, 2025, and remained open for the final four weeks of data collection.

Forty-five of the 3,000 surveys mailed were returned because the housing unit was vacant, or the postal service was unable to deliver the survey as addressed. Of the 2,955 households presumed to have received a survey, 326 completed the survey, providing a response rate of 11%. The response rates were calculated using AAPOR's response rate #2[1] for mailed surveys of unnamed persons. Additionally, 239 residents completed the online "opt-in" survey. No surveys were completed in Spanish.

Margin of Error

The 95% confidence interval (or "margin of error") quantifies the "sampling error" or precision of the estimates made from the survey results. A 95% confidence interval can be calculated for any sample size and indicates that in 95 of 100 surveys conducted like this one, for a particular item, a result would be found that is within three percentage points of the result that would be found if everyone in the population of interest was surveyed. The practical difficulties of conducting any resident survey may introduce other sources of error in addition to sampling error. Despite best efforts to boost participation and ensure potential inclusion of all households, some selected households will decline participation in the survey (referred to as non-response error) and some eligible households may be unintentionally excluded from the listed sources for the sample (referred to as coverage error).

While the margin of error for the survey is generally no greater than plus or minus five[2] percentage points around any given percent reported for the entire sample, results for subgroups will have wider confidence intervals. Where estimates are given for subgroups, they are less precise.

[1] *See AAPOR's Standard Definitions here: https://aapor.org/wp-content/uploads/2024/03/Standards-Definitions-10th-edition.pdf for more information*

[2] Although this has become the traditional way to describe survey research precision, when opt-in results are blended with scientific results, assumptions about randomness of responses are not the same as when results come only from the random sample. Consequently other terms sometimes are used in place of "confidence interval" or "margin of error," such as "credibility intervals."

Survey Processing (Data Entry)

Upon receipt, completed surveys were assigned a unique identification number. Additionally, each survey was reviewed and "cleaned" as necessary. For example, a question may have asked a respondent to pick two items out of a list of five, but the respondent checked three; in this case, Polco would use protocols to randomly choose two of the three selected items for inclusion in the dataset. All surveys then were entered twice into an electronic dataset; any discrepancies were resolved in comparison to the original survey form. Range checks as well as other forms of quality control were also performed.

A series of quality control checks were also performed in order to ensure the integrity of the web data. Steps may include, but are not be limited, to reviewing the data for clusters of repeat IP addresses and time stamps (indicating duplicate responses) and removing empty submissions (questionnaires submitted with no questions answered).

Weighting the Data

The demographic characteristics of the survey respondents were compared to those found in the 2020 United States Census and 2023 American Community Survey. The primary objective of weighting survey data is to make the survey sample reflective of the larger population of the community. The variables used for weighting the data were race, sex, and age. No adjustments were made for design effects. The results of the weighting scheme are presented for the address-based and the open participation surveys.

Village of Oak Park Community Health Survey Weighting Table – Address-based Sample

Characteristic	Population Norm	Unweighted Data	Weighted Data
Race*			
White	64%	82%	65%
Not white	36%	18%	35%

Females 35-54	20%	19%	21%
Females 55+	22%	49%	25%

**Source: 2020 U.S. Census Bureau, 2023 American Community Survey Population Estimates*

Analyzing the Data

The electronic dataset was analyzed by Polco staff using the Statistical Package for the Social Sciences (SPSS). For the most part, frequency distributions and mean ratings are presented in the body of the report. A complete set of frequencies for each survey question is presented in *Appendix B: Complete Survey Frequencies.* Also included are results by respondent characteristics (*Appendix D: Responses to Selected Survey Questions by Respondent Characteristics*). Chi-square or ANOVA tests of significance were applied to these breakdowns of selected survey questions. A "p-value" of 0.05 or less indicates that there is less than a 5% probability that differences observed between groups are due to chance; or in other words, a greater than 95% probability that the differences observed in the selected categories of the sample represent "real" differences among those populations. Where differences between subgroups are statistically significant, they have been denoted with capital letters.

Appendix G: Survey Materials

The following pages contain copies of the survey materials sent to randomly selected households within the Village of Oak Park.

Share your story, shape your health

Dear Resident -

The Oak Park Public Health Department invites you to take the 2025 Oak Park Community Health Survey. Your feedback and experiences will provide us with valuable insights as we create our priorities and programming for the coming years.

This survey takes approximately 15 minutes to complete**,** and **your responses will remain anonymous, confidential, and used solely to improve local health services**. When you're finished, you'll have the option to enter your email for a chance to win a gift card from the Downtown Oak Park Business Alliance. If you choose to enter the raffle, your email will be kept separate from your survey responses.

This survey is for randomly selected households only, so **please do not share your survey link.** You can wait a few days for a paper survey to arrive in the mail, or go online now and complete the confidential survey at:

polco.us/oakparkhealth

Para contestar la encuesta en **español**, siga el link adjunto y seleccione la opción 'Español' en el menú desplegable que aparece en la parte superior de la página web.

If you have any questions about the survey, please call the Oak Park Public Health Department at 708-358-5480.

Complete the survey and enter to win a gift card from the Downtown Oak Park Business Alliance!

Oak Park
Public Health

Dear Oak Park Resident -

The Oak Park Public Health Department invites you to take the 2025 Oak Park Community Health Survey. Your feedback and experiences will provide us with valuable insights as we create our priorities and programming for the coming years. If you have already completed the survey online, thank you for your participation.

If you have not yet, please fill out the enclosed survey. This survey takes approximately 15 minutes to complete. After completing the survey, you'll have the option to enter your email for a chance to win a gift card from the Downtown Oak Park Business Alliance. If you choose to enter the raffle, please note that your email will be kept separate from your survey responses.

Important things to keep in mind:

- **Please do not share your survey link.** This survey is for randomly selected households only.
- **Your responses are confidential and no identifying information will be shared.**
- Please do not respond twice.
- Please return the survey by mail in the enclosed postage-paid envelope, or you can complete the survey online at:

polco.us/oakparkhealth

Para contestar la encuesta en **español**, siga el link adjunto y seleccione la opción 'Español' en el menú desplegable que aparece en la parte superior de la página web.

If you have any other questions about the survey, please call the Oak Park Public Health Department at 708-358-5480.

Your feedback is crucial since your household is among a select number invited to participate. The results of this assessment will guide our future priorities and planning. **All responses are confidential, anonymous**, and will be used solely to improve local health services.

Thank you for your time and participation!

Oak Park Public Health Department

Share your story, shape your health

Oak Park Public Health

The Village of Oak Park Community Health Survey

Please have this survey completed by an adult (age 18 or older) who lives in this household.
Your responses will be confidential and anonymous.

The Oak Park Public Health Department thanks you for your participation.
Your responses will help us to better understand our community's needs. Share your story, shape your health.

34. What makes it easy or hard to keep you or your family healthy in our village? Think about the places, people, and community:

_____

_____

_____

Our last questions are about you and your household.
Again, all of your responses to this survey are confidential and no identifying information will be shared.

D1. Are you of Hispanic, Latino/a/x, or Spanish origin?

❍ No ❍ Yes

D2. What is your race? (Mark one or more races to indicate what race you consider yourself to be.)

❑ Indigenous, American Indian, or Alaskan Native
❑ South Asian
❑ Southeast Asian
❑ East Asian
❑ Middle Eastern or North African Native
❑ Black or African American
❑ Native Hawaiian or Other Pacific Islander
❑ White
❑ A race not listed, please specify

_____

D3. In which category is your age?

❍ 18-24 years
❍ 25-34 years
❍ 35-44 years
❍ 45-54 years
❍ 55-64 years
❍ 65-74 years
❍ 75 years or older

D4. What is the highest level of education you completed?

❍ Some high school
❍ Completed high school/GED
❍ Some college/technical degree/ associates degree
❍ Bachelor's degree
❍ Master's degree or Doctoral degree/ Professional degree

D5. What is your marital status?

❍ Never married
❍ Married
❍ In a domestic partnership
❍ Separated
❍ Divorced
❍ Widowed

D6. What is your gender?

❍ Woman
❍ Man
❍ Identify in another way → go to D6a

D6a. If you identify in another way, how would you describe your gender?

❍ Agender/I don't identify with any gender
❍ Genderqueer/gender-fluid
❍ Non-binary
❍ Transgender man
❍ Transgender woman
❍ Two-spirit
❍ Identify in another way
❍ Prefer not to say
