

KEYSTONE

PARKWAY ROUNDABOUT ▶

The heavily traveled Keystone Avenue began its transformation into Keystone Parkway in 2008. This project included lowering the north/south road under the east/west road to separate traffic. It also included the construction of five full-access, double-teardrop roundabout interchanges followed by the completion of the 96th Street roundabout intersection. The transformation of this corridor has resulted in both environmental and safety benefits and provided greater connectivity for residents and visitors.
