

ILEARN and I AM: Online Reporting System (ORS) Helpful Reminders

ILEARN and I AM Spring 2019 scores have been released in the Online Reporting System (ORS). Please keep the following information in mind while accessing student test results. Online individual student reports (ISRs) and corporation score data files are available in ORS for educators by accessing two radial buttons. Please see the Reports and Files/Retrieve Student Results section for more information.

Score Reports – Two Radial Buttons:

Scores for my current students

At the school level, this radial button displays scores for students who are currently in the Test Information Distribution Engine (TIDE), associated to this school, and rostered to a Test Administrator (TA) at this school. TAs must have the student(s) rostered to the TA to see the student's scores. School Test Coordinators (STCs) will see all students who are currently in TIDE at that school. Corporation Test Coordinators (CTCs) will see all students currently in TIDE associated to a school within their corporation.

As mentioned in the August 26 IDOE ILEARN Assessment Update, nightly student enrollment files are not being updated in TIDE at this time in preparation for the 2019-2020 school year. Any changes in student enrollment will be reflected in TIDE on September 23, when the updates are complete. If you have a student currently enrolled at your school and you cannot see their score reports from Spring 2019, please ensure that this information has been properly updated with the Indiana Department of Education (IDOE) so that these students will be added to the nightly files that will populate TIDE beginning on September 23.

Scores for students who were mine at the end of the selected administration

Students must be actively enrolled at a school in TIDE at the **end** of the selected test administration for their score reports to be accessible using this radial button. The ILEARN test window end date in ORS is May 24 at 11:59 p.m. ET, and the I AM test window end date in ORS is June 30. These dates are considered the end of the testing windows in ORS for ILEARN and I AM, and dictate whether a student score is available in ORS using this button.

Reports and Files/Retrieve Student Results

Both radial buttons are available for the Reports and Files tab where schools can go to select Retrieve Student Results to see corporation score data files. The default radial button is 'Scores for students who were mine at the end of the selected administration.' If a school needs to view 'Scores for my current students,' please select this radial button first on the Score Reports tab and then access the Retrieve Student Results tab.

ILEARN and I AM Student Paper Score Reports and Labels – Coming Soon!

ILEARN and I AM student score reports (ISRs) and labels will arrive in corporations on September 16-17, for corporations to distribute to schools. The student reports and labels will go to the corporation for which that student was associated in TIDE on August 9. Please keep in mind that even if the students are no longer in TIDE or ORS as of August 9, they will still receive their reports and labels at the last corporation for which they were associated prior to being removed from TIDE. If they have changed enrollment to a new corporation prior to August 9 and this was reflected in TIDE, the reports and labels will go to their new corporation.
