Subject: Individual Learning Plan (ILP) Data Flow

The Indiana Department of Education (IDOE) recently migrated the ILP system to an electronic format in the Indiana-ILP (I-ILP) system, hosted by Public Consulting Group (PCG). This system is designed to capture unique accommodations for instructional and assessment delivery to meet the needs of each individual English learner (EL). The system is not required for immediate use; however, data available in the system will be available for receipt into the American Institutes for Research (AIR)'s Test Information Distribution Engine (TIDE) system hosted by AIR for ILEARN, IREAD-3, I AM and ISTEP+ assessments.

Data reported into I-ILP will begin to flow into TIDE via the nightly data feed in mid-January in anticipation of the Spring 2020 delivery of statewide assessments. ILP accommodations data is not used for WIDA ACCESS assessments, as accommodations for this assessment are only available for ELs with disabilities and are documented through the Indiana IEP system.

Questions about the use of I-ILP to serve ELs may be directed to Valerie Beard at vbeard@doe.in.gov. Questions about assessment implementation and policy may be directed to inassessments@doe.in.gov.
