

# Indiana Course Access Network

The Indiana Course Access Network is a collection of projects with the same goal: to provide students with flexible options to take course work and to expand course offerings. This document shares the current projects in place.

## Indiana Course Access Portal (iCAP)

The Indiana Course Access Portal (iCAP), Indiana Code 20-30-16, currently offers over 180 course options from seven course providers. Course providers have been approved to offer courses by IDOE.

iCAP provides options to help schools meet students' individual needs, expand learning opportunities, and diversify their curricula.

## Indiana Course Design Academy

Indiana teachers created over 20 new courses as part of Indiana University's Course Design Academy. These courses were designed to align with Indiana Academic Standards. Long-term, the content for these courses will be merged with the WRCA program.

## Well-Rounded Course Access (WRCA)

The IDOE was awarded a five-year grant from the U.S. Department of Education to expand access to well-rounded courses for students across the state. IDOE has partnered with Indiana University (IU) to develop and implement a model for providing well-rounded educational opportunities through increased course access for all students. A total of 90 courses, grades K-12, will be designed and implemented by Indiana teachers over the duration of the project. There will be at least 15 secondary-level courses available for the 2022-2023 school year.

# Well-Rounded Course Access

## Overview

The IDOE was awarded a five-year grant from the U.S. Department of Education to expand access to well-rounded courses for students across the state. IDOE has partnered with Indiana University (IU) to develop and implement a model for providing well-rounded educational opportunities through increased course access for all students, “including female students, minority students, English learners, children with disabilities, and low-income students who are often underrepresented in critical and enriching subjects” as determined by the grant. Well-rounded courses may include specialized courses, courses that are more rigorous than the regular curricula, career and technical education, or elective courses.

## Courses

A total of 90 courses, grades K-12, will be designed and implemented by Indiana teachers over the duration of the project. There will be at least 15 secondary-level courses available for the 2022-2023 school year. The upcoming initial courses will be delivered with one of the following virtual modalities:

ASYNCHRONOUS	SEMI-SYNCHRONOUS	SYNCHRONOUS
Online content and instruction with common due dates. Although classes do not meet on a daily or weekly basis, instructors may schedule online support structures. Content is predetermined through WRCA professional development where course design, instruction, and engagement strategies are highly coordinated and structured.	Self-paced, not dependent on time, and content and assignments are delivered remotely. This modality may involve local coaching to monitor student progress through virtual curriculum by teachers, coaches, or instructional staff. It provides independence, timely-feedback, and formative guidance from the instructor.	Learning occurs in real time virtually. It may involve students working on material independently between live sessions.

## Participate

To find out how to participate in the WRCA program as a corporation, instructor, or to enroll students, please contact [Mark Conrad](#), Project Management Specialist at IU.
