

JA Speaker Spotlight

Overview

Students in grades kindergarten through twelve learn about various career pathways, jobs in demand, skills needed, education, training, and more in this small group setting.

After gaining exposure to careers, companies, and industries, students kindergarten through twelve can make connections to prepare for their own future.

The JA Speaker Spotlight curriculum supports Common Core and State Academic Standards by introducing these employability skills:

- Self-Confidence
- Lifelong learning
- Financial & Personal Independence
- Professionalism
- Problem Solving
- Collaboration
- Decision-Making
- Initiative
- Career Exploration
- Goal Setting

Volunteer Role

With this 30 minute time commitment, volunteers share their career pathway with students. They share information on why they chose their career and how they got to where they are today. Volunteers share the skills needed, education background, training, and what it takes to be successful in a certain industry. Making a connection and giving students possibilities for a future career, is what we want our volunteers to provide for our youth.

JA Speaker Spotlights help prepare students to succeed in school and beyond. Learn more at jaindy.org.
