

Eric J. Holcomb
Governor

Kristina M. Box, MD, FACOG
State Health Commissioner

January 25, 2021

To streamline the logistics of testing supplies, the Indiana Department of Health has contracted with Langham Logistics to start delivering supplies to long-term care (LTC) facilities on a bi-weekly basis. LTCs will input their requests using a portal, created by Langham Logistics. A portal training guide is attached for your reference. To set up your portal account, visit: <https://warehouse.elangham.com>. Langham will then analyze quantities to develop routing schedules for these supplies. Please note that the amount of supplies requested may not be 100% fulfilled depending on inventory and demand. Supplies will be delivered once every two weeks.

After LTCs have received the supplies, they will receive an electronic invoice from the Indiana Department of Health for the cost of the supplies and courier service. The state health department will work closely with Langham in the coming weeks to provide facilities with the most cost-effective solution for testing supplies and the distribution of those supplies. We encourage sites to start developing methods to forecast testing supply needs as we move to this model. Please email Kelsey Barrick at kbarrick@isdh.in.gov.

FEMA BinaxNOW– Delivery Fees apply to order:

Please note: a current minimum order is 1 (40 kits per 1 box). The maximum quantity you can order is dependent upon the facility. ***Once you receive your maximum allocation, you will not be able to request additional quantities.***
