

Kansas Early Childhood Budget Sign-On Letter

Kansas Legislature
300 SW 10th St.
Topeka, KS 66612

Dear Kansas Legislators,

Kansas families are struggling with the high costs of child care. High quality, safe, affordable child care allows parents to continue working, encourages healthy development in young children, and helps families become stronger and more financially stable, which is why we are writing in support of the record investments in the Kansas early childhood system proposed in the budget. Access to high-quality child care is necessary for Kansas children and our economy to be able to thrive- ***it is critical infrastructure.***

For parents to be able to work, they need access to affordable child care. However, too many Kansas families are struggling with the high costs of child care. Investing in early childhood programs included in the budget will make child care more affordable and more available in communities from Kansas City to Garden City.

The first five years are so important to healthy brain development in kids - ***90% of brain development occurs before the age of five.*** By supporting early childhood measures in this budget, the state of Kansas will speak through action how vitally important it is to maintain families and protect children.

The investments outlined below are in response to listening to the local needs of stakeholders in Kansas child care. We need to invest in early childhood education to make sure all Kansas kids get started on the right track. Our kids and grandkids deserve access to high quality, safe child care programs, which is why we ask you to join us – **over 1,000 Kansas early childhood providers, business leaders, and community child care champions** – in supporting investment in the early childhood system.

Kansas Department of Children and Families (DCF) Budget Items

- **\$2.7 million in state Child Care Development Funds (CCDF) to maximize federal funds** and draw down \$4.4 million in new federal dollars to make child care more available and affordable to Kansas families. This smart fiscal policy will have a meaningful impact on child care by providing direct support to families and providers as the cost of care has increased by 41% since 2019.
- **\$15 million in workforce grants to support the sustainability of the state's child care providers.** These grants will help sustain a fragile early childhood system that is reeling from the loss of emergency federal dollars and struggling with growing workforce

costs. The funds will support the cost of wages and facility-related costs for centers and home-based providers. This money would fund an estimated 3,500 providers with a \$4,000 grant in FY25.

- **\$1.1 million in new funding to support the creation of the Child Care Workforce Registry**, which will serve as a resource to allow providers to track educational progression, facilitate the development of higher-quality care, and assist in the provision of required professional development trainings.

Kansas Department of Health and Environment (KDHE) Budget Items

- **\$456,000 for Digital Fingerprinting Devices.** KDHE is required to fingerprint providers as part of mandatory background checks. In the past, timelines of background checks have been an issue. Investing in additional digital fingerprinting devices would speed up the background check process and make it easier and timelier for providers to be able to hire new workers.
- **\$1,300,000 for Child Care Health and Safety Grants:** Navigating the licensure and compliance process is challenging for any small business. To help childcare providers navigate this process the Child Care Health Consultants Network was created to provide assistance to child care providers to make it easier comply with safety requirements. The successful program has assisted over 1,000 prospective providers since 2022 and this funding would sustain the program.

Kansas State Department of Education (KSDE)/Children's Cabinet Budget Items

- **\$815,000 to support the Baby Steps pilot program that provides additional financial incentives for child care providers who increase infant slots.** Currently, the high cost of providing infant care makes it challenging for providers to offer sufficient number of infant spots, which leaves working families without access to child care during this critical time. This program will explore ways the state can increase the number of providers caring for infants.
- **\$30,000,000 to continue the Child Care Capacity Accelerator Grant Program:** The Child Care Capacity Accelerator Grant Program launched last year with \$55 million in funding and funded the creation of 5,655 new child care slots in every corner of the state. Additional funding would help create new child care slots throughout the state. These funds covered construction and operation costs that cannot be covered with federal dollars. We know, from previous applications, there is existing demand (\$60 million in unfunded projects from previous grant rounds) for these funds. The additional \$30 million would fund critical construction and operations costs in FY 2025 and would result in additional, much needed child care slots in communities throughout Kansas.

- **\$5 million for a public private partnership to sustain child care in northwest Kansas.** The Dane G. Hansen Foundation is proposing a public-private partnership to significantly improve child care availability in their rural service area. To reach the goal of \$25 million, match funds have already been committed by the Patterson Family Foundation in the amount of \$5 million. DGH is requesting state support in this endeavor in the amount of \$5 million, which will result in an additional estimated match of 100-400% from other private partners. This successful model could be replicated across the state

These investments will benefit all Kansans, support child care providers, and strengthen our workforce. Thank you for your consideration of the proposed early childhood budget items, we urge our Kansas legislators to support these recommendations.

Sincerely,

(listed below are all of the Kansas individuals and organizations that have signed in support of this letter)
