Additional information: "The goal of our NTI program is to provide a safe environment for children to attend virtual classes and complete their assignments. We offer support by helping them log on to classes, assisting with task management, and providing socially distanced activities and programming when they are not actively working on NTI.

Students are provided their own workspace in our classroom-style environment complete with decorations, books, games, and various school and art supplies. Our afternoons are programmed with special activities such as sports, art, drama and more. We utilize a 'pod system' to minimize COVID-19 exposure, limiting class sizes from 9-13. We also offer a staff-student ratio of 1:5, which allows us to provide students the supervision and attention they

need to manage their schoolwork. Additionally, our students have access to free online tutoring through the H.U.G. (Help us Grow) Reading Program.”
