

MD 32 - Main Street to Macbeth Way Roadway Widening Construction Announcement

PROJECT NEWSLETTER • SPRING 2019

ROAD WIDENING SCHEDULED; CONSTRUCTION TO BEGIN

The Maryland Department of Transportation State Highway Administration (MDOT SHA) is beginning a project in Eldersburg to widen MD 32 and construct an additional northbound lane. The work will occur on MD 32 from Main Street to Macbeth Way and will include drainage and stormwater management improvements, traffic barrier installation, and resurfacing of MD 32. The project will begin in Spring 2019 and last approximately one year. The project will improve access to the new Maryland National Guard "Freedom Readiness Center".

What to expect prior to and during construction

Prior to construction:

- Project area measurements and site preparation
- Placement of stakes and paint markers on the roadway lanes, shoulders, and edges of MD 32

During construction:

- Excavation and construction activity such as stormwater management and drainage pipe extension (This work will take place behind a temporary traffic barrier.)
- Leveling for drainage ditches and driveway pipe replacements on southbound MD 32
- Modifications to the traffic signal at the Macbeth Way intersection
- Full resurfacing of MD 32 with restriping for the additional lanes

How will traffic be impacted during construction?

For motorist and worker safety, temporary concrete traffic barriers will be placed along the shoulder edge of MD 32 Northbound. This will close the existing shoulder off from Main Street to Macbeth Way. The Park and Ride, as well as the existing southbound shoulder, will remain open during this phase of construction. Intermittent lane closures for landscaping and touch-up work will also take place after the major construction is completed.
