CLOPPER ROAD WATER MAIN REPLACEMENT

Over the past several months, a 24-inch diameter water main under Clopper Road in your neighborhood has experienced multiple breaks. To enhance service and reliability, we are fast-tracking a project to replace this main.

WSSC Water engineers are actively analyzing replacement options for this '70s-era water main. This includes potentially repairing and/or replacing 3.8 miles of the 24-inch-diameter pipe in a multi-phase process, with priority given to the 0.7-mile section that has experienced multiple recent breaks.

Community Meeting

WSSC Water will hold two virtual community meetings online and by phone using Microsoft Teams. For either session, visit wsscwater.com/projectmeetings and click on Clopper Road Water Main Replacement Project.

- **Wednesday, February 15, 2023, 6:30 p.m.**
- **Thursday, February 16, 2023, 6:30 p.m.**

Scope of Work Phase 1A (First Phase)

- Replace approximately 0.7 miles of 24-inch water main and side connections.
- See the attached map of impacted streets in your neighborhood.

Estimated Project Schedule Phase 1A (First Phase)

- Estimated design completion: Summer 2023
- Estimated construction start: Fall 2023
- Estimated construction duration: 1 year

The estimated project schedule may change based on the issuance of permits, available funding or inclement weather.

Site Investigation Work Phase 1A (First Phase)

- Early design and site work, which may impact traffic, will occur during off-peak hours, 9 a.m. - 3 p.m.
- Our field investigation during the design process will not impact your water service.
- Site survey, utilities survey and soil sampling will take place between Great Seneca Highway and Allspice Drive starting January 2023.
