

In honor of Veterans Day, please join the Howard County Recovery Oriented Systems of Care (ROSC) on Tuesday, November 10th at 10 o'clock a.m. EST (the day before Veterans Day) for a FREE presentation by Dr. Daniel Amen and Kathleen Inoa of the world renowned Amen Clinics.

Through their SPECT Scan, the Amen Clinics get to the root causes of brain health issues not typically discovered in traditional psychiatry. Some of those issues include PTSD, trauma, depression, anxiety and attention-deficit challenges; many of which are prominent in the veteran community.

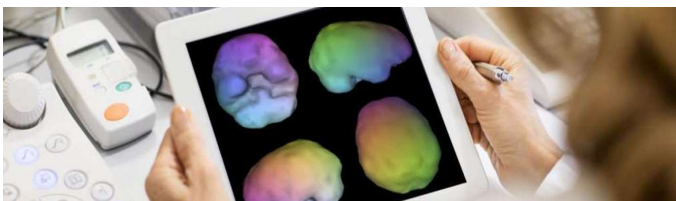

Come, learn and ask your questions on Tuesday, November 10th at 10am, EST.
