GROUNDED is a work of extraordinary psychological intensity. It is the story of a female ace fighter pilot who, after interrupting her career to have a child, has been removed from flight duty and reassigned to operating drone missions in hostile territory. Against the background of removal from flying an actual aircraft – a job she loved – the protagonist is reassigned to operate military drones from a windowless trailer outside Las Vegas, she hunts terrorists by day and returns to her family each night. As the pressure to track a high-profile target mounts, the boundaries begin to blur between the desert in which she lives and the one she patrols half a world away.
