

IF YOU OR SOMEONE YOU KNOW
SERVED IN THE US ARMED FORCES...

and is experiencing
symptoms of PTSD with pain,
STRIVE has a study to help!

STRIVE leads the way in developing targeted treatments for
suicide risk reduction as well as refining existing PTSD treatments
to make them work better and faster so you can start living a
more meaningful life without suicide or PTSD in your way.

R&R with Stellate Ganglion Block

R&R w/ SGB is a two-week intensive treatment-study delivered via *telehealth*
and includes an SGB shot to block pain.

- AT NO COST to the veteran
- Travel costs are eligible for reimbursement
- Compensation for completing post-treatment surveys (up to \$275)

This new research study initiated as part of the R&R program
combines CPT and **Stellate Ganglion Block (SGB)**, which
involves an injection of a pain killer in an area surrounding a
nerve located in the neck to block pain.

The SGB injection will be administered
by The Stellate Institute in Annapolis, MD

CPT will be delivered by STRIVE at The Ohio State University
where you meet daily with a clinician via Telehealth for 10-days.

Travel reimbursement to/from Annapolis, Maryland for eligible participants is available.

ALL AT NO COST TO THE VETERAN!

Paid for by Navy Seal Foundation and donors.
