

GRETCHEN WHITMER
GOVERNOR

STATE OF MICHIGAN
OFFICE OF THE GOVERNOR
LANSING

GARLIN GILCHRIST II
LT. GOVERNOR

EXECUTIVE ORDER

No. 2020-67

Declaration of state of emergency under the Emergency Powers of the Governor Act, 1945 PA 302

On March 10, 2020, I issued Executive Order 2020-4, which declared a state of emergency in Michigan to address the COVID-19 pandemic. This new disease, caused by a novel coronavirus not previously identified in humans, can easily spread from person to person and can result in serious illness or death. There is currently no approved vaccine or antiviral treatment.

Scarcely three weeks later, the virus had spread across Michigan. As of April 1, 2020, the state had 9,334 confirmed cases of COVID-19 and 337 deaths from the disease, with many thousands more infected but not yet tested. The virus's rapid and relentless spread threatened to quickly overwhelm the state's health care system: hospitals in multiple counties were reportedly at or near capacity; medical personnel, supplies, and resources necessary to treat COVID-19 patients were in high demand but short supply; dormitories and a convention center were being converted to temporary field hospitals. And the virus had also brought deep disruption to this state's economy, homes, and educational, civic, social, and religious institutions.

On April 1, 2020, in response to the widespread and severe health, economic, and social harms posed by the COVID-19 pandemic, I issued Executive Order 2020-33. This order expanded on Executive Order 2020-4 and declared both a state of emergency and a state of disaster across the state of Michigan. Like Executive Order 2020-4, this declaration was based on multiple independent authorities: section 1 of article 5 of the Michigan Constitution of 1963; the Emergency Management Act, 1976 PA 390, as amended, MCL 30.401 et seq.; and the Emergency Powers of the Governor Act of 1945, 1945 PA 302, as amended, MCL 10.31 et seq. On April 7, 2020, the Michigan legislature adopted a concurrent resolution to extend the states of emergency and disaster declared under the Emergency Management Act until April 30, 2020.

Since I first declared an emergency in response to this pandemic, my administration has taken aggressive measures to fight the spread of COVID-19, prevent the rapid depletion of this state's critical health care resources, and avoid needless deaths. The best way to slow

the spread of the virus is for people to stay home and keep their distance from others. To that end, and in keeping with the recommendations of public health experts, I have issued orders restricting access to places of public accommodation and school buildings, limiting gatherings and travel, and requiring workers who are not necessary to sustain or protect life to remain at home. I have also issued orders enhancing the operational capacity and efficiency of health care facilities and operations, allowing health care professionals to practice to the full extent of their training regardless of licensure, and facilitating the delivery of goods, supplies, equipment, and personnel that are needed to combat this pandemic. And I have taken steps to begin building the public health infrastructure in this state that is necessary to contain the infection.

My administration has also moved quickly to mitigate the economic and social harms of this pandemic. Through my orders, we have placed strict rules on businesses to prevent price gouging, put a temporary hold on evictions for families that cannot make their rent, expanded eligibility for unemployment benefits, provided protections to workers who stay home when they or their close contacts are sick, and created a structure through which our schools can continue to provide their students with the highest level of educational opportunities possible under the difficult circumstances now before us.

These statewide measures have been effective, but the need for them—like the unprecedented crisis posed by this global pandemic—is far from over. Though its pace of growth has showed signs of slowing, the virus remains aggressive and persistent: to date, there have been 41,379 confirmed cases of COVID-19 in Michigan, and 3,789 deaths from the disease—fourfold and tenfold increases, respectively, since the start of this month. And there are still countless more who are infected but have not yet been tested. There remains no treatment for the virus; it remains exceptionally easy to transmit, passing from asymptomatic individuals and surviving on surfaces for days; and we still lack adequate means to fully test for it and trace its spread. COVID-19 remains present and pervasive in Michigan, and it stands ready to quickly undo our recent progress in slowing its spread. Indeed, while COVID-19 initially hit Southeast Michigan hardest, the disease is now increasing more quickly in other parts of the state. For instance, cases in some counties in Western and Northern Michigan are now doubling every 6 days or faster.

The economic and social harms from this pandemic likewise persist. Due to the pandemic and the responsive measures necessary to address it, businesses and government agencies have had to quickly and dramatically adjust how they work. Where working from home is not possible, businesses have closed or significantly restricted their normal operations. Michiganders are losing their jobs in record numbers: to date, roughly one quarter of the eligible workforce has filed for unemployment. And state revenue, used to fund many essential services such as our schools, has dropped sharply.

The economic damage—already severe—will continue to compound with time. Between March 15 and April 18, Michigan had 1.2 million initial unemployment claims—the fifth-highest nationally, amounting to nearly 24% of the Michigan workforce. During this crisis, Michigan has often processed more unemployment claims in a single day than in the most painful week of the Great Recession, and the state has already reached its highest unemployment rate since the Great Depression. On April 9, 2020, economists at the University of Michigan forecasted that the U.S. economy will contract by 7% in the second quarter of this year, or roughly an annualized rate of 25%. As a result, many families in

Michigan will struggle to pay their bills or even put food on the table. So too will the pandemic continue to disrupt our homes and our educational, civic, social, and religious institutions. Transitioning almost overnight to a distance-learning environment has placed strain on educators, students, and parents alike. The closure of museums and theaters limits people's ability to enrich themselves through the arts. And curtailing gatherings has left many seeking new ways to connect with their community during these challenging times.

The health, economic, and social harms of the COVID-19 pandemic thus remain widespread and severe, and they continue to constitute a statewide emergency and disaster. While the virus has afflicted some regions of the state more severely than others, the extent of the virus's spread, coupled with its elusiveness and its ease of transmission, render the virus difficult to contain and threaten the entirety of this state. Although local health departments have some limited capacity to respond to cases as they arise within their jurisdiction, state emergency operations are necessary to bring this pandemic under control in Michigan and to build and maintain infrastructure to stop the spread of COVID-19, trace infections, and quickly direct additional resources to hotspots as they arise. State assistance to bolster health care capacity and flexibility also has been, and will continue to be, critical to saving lives, protecting public health and safety, and averting catastrophe.

Moreover, state disaster and emergency recovery efforts remain necessary not only to support Michiganders in need due to the economic effects of this pandemic, but also to ensure that the prospect of lost income does not impel workers who may be infected to report to work, which would undermine infection control and contribute to further spread of the virus. Statewide coordination of these efforts is crucial to creating a stable path to recovery. Until that recovery is underway, the economic and fiscal harms from this pandemic have been contained, and the threats posed by COVID-19 to life and the public health, safety, and welfare of this state have been neutralized, statewide disaster and emergency conditions will exist.

Section 1 of article 5 of the Michigan Constitution of 1963 vests the executive power of the State of Michigan in the governor.

The Emergency Powers of the Governor Act of 1945, 1945 PA 302, as amended, MCL 10.31 et seq., provides that “[d]uring times of great public crisis, disaster, rioting, catastrophe, or similar public emergency within the state . . . the governor may proclaim a state of emergency and designate the area involved.” MCL 10.31(1). The state of emergency ceases “upon declaration by the governor that the emergency no longer exists.” MCL 10.31(2).

Acting under the Michigan Constitution of 1963 and Michigan law, I order the following:

1. A state of emergency remains declared across the State of Michigan under the Emergency Powers of the Governor Act of 1945, 1945 PA 302, as amended, MCL 10.31 et seq.
2. This order is effective immediately and continues through May 28, 2020 at 11:59 pm.
3. I will evaluate the continuing need for this order prior to its expiration.

4. Executive Order 2020-33 is rescinded and replaced. All previous orders that rested on Executive Order 2020-33 now rest on this order.

Given under my hand and the Great Seal of the State of Michigan.

Date: April 30, 2020

Time: 7:30 pm
