

**Networking  
CISCO Academy**

## 2019 Michigan Instructor Training Scholarships

Skills in IT, networking, cybersecurity, IoT and programming are needed throughout the state, in business, manufacturing, government and beyond.

The Cisco Networking Academy program now offers training scholarships to qualify more instructors to teach these courses. We also offer self-paced, online courses to allow more citizens to easily explore technology pathways.

Courses are available in a wide range of learning environments, including traditional (schools and colleges) and non-traditional (libraries, workforce development centers, community organizations, military/veterans, and programs for rural/remote, disability, at-risk, correctional, and much more).

Apply: [www.cvent.com/d/ptqbxp](http://www.cvent.com/d/ptqbxp)

**Elaine Horn**, Cisco Academy Manager  
 META Solutions ASC/ITC

**Clydene Stangvik**, Cisco CSR Manager  
 Networking Academy, [cstangvi@cisco.com](mailto:cstangvi@cisco.com)

### Recipient Commitment

Scholarship recipients will agree to teach at least one Networking Academy course in Michigan within 12 months of completing their instructor training for that course.

### Train-the-Trainer Workshops

- All instructors are welcome to apply for scholarships (no Networking Academy affiliation required)
- Prerequisites, course objectives, and certification alignment: [www.NetAcad.com/courses](http://www.NetAcad.com/courses)
