

**VIOLATION TYPES**

**Priority (P):** The highest risk violations which are directly related to an increased risk of foodborne illness. Examples include improper handwashing, unsafe food temperatures.

**Priority foundation (Pf):** Violations that can create a high risk (Priority) violation. Examples include lack of soap at a handsink, no calibrated thermometer, no test strips to check sanitizer levels.

**Core (C):** Lower risk violations. Examples include general maintenance of facility (floors, walls, ceilings).

**Correction Requirements:** (P) and (Pf) violations must be corrected immediately when possible. Follow-up inspections occur to ensure all of these violations have been resolved if not corrected during the routine inspection. Open Core (C) violations are verified at the next routine inspection.
