

VIOLATION TYPES

Priority (P): The highest risk violations which are directly related to an increased risk of foodborne illness. Examples include improper handwashing, unsafe food temperatures.

Priority foundation (Pf): Violations that can create a high risk (Priority) violation. Examples include lack of soap at a handsink, no calibrated thermometer, no test strips to check sanitizer levels.

Core (C): Lower risk violations. Examples include general maintenance of facility (floors, walls, ceilings).

Correction Requirements: (P) and (Pf) violations must be corrected immediately when possible. Follow-up inspections occur to ensure all of these violations have been resolved if not corrected during the routine inspection. Open Core (C) violations are verified at the next routine inspection.
