

New Reentry Resource Directory!

Montage Reentry Solutions is launching the Reentry Resource Directory (RRD), an online, searchable database of resources available to assist corrections professional (state, federal, county) and others in the reentry community. We invite your organization to become a member of the RRD. The cost is \$50/year. Your organization has complete control over what information is visible to the public, and how frequently it is updated.

Why This Is Different

Other attempts have been made to collect, compile and publish similar information. However, these previous resource directories have not worked because the directory information changes and cannot be easily updated. The RRD solves this problem by giving every member control over what information is published and when it is updated. To keep the RRD as complete as possible, we ask all members to commit to keeping your information current and accurate. We know you're busy, so we'll send you periodic reminders to update your information.

Who is it designed for

The RRD is a tool designed primarily for caseworkers, probation, and anybody working with individuals coming out of prison. This is where they can access a searchable data base by either typing in specifics or using labels already provided that are common in the community corrections world. Each member's page contains photos, current contact and program information, a geo locator, and additional links.

How to Participate

To become a member of the RRD, simply visit the Montage Reentry Solutions web page (<https://www.montagereentrysolutions.com/>) and click on *Directory*. Check out the page and see how current members are taking advantage of this resource. Then just click on the sign up button! We will provide assistance for building your page and maintaining it if needed
