

Criteria for CPS Program Track Clients – Phase 1

- This is a residential substance use program for mothers involved with the children protection system; it is not a family residential program (i.e. children may visit, but do not stay with mom)
 - For Phase 1, only a faith-based track is offered; moms must be okay with faith-based track
 - This is a non-smoking program and facility
- Accepts Moms or pregnant women with active CPS cases, that are able to be in a residential program for a minimum of 4 months
 - Client may be pregnant, or have up to 2 children, aged 0-6 years
- In need of treatment for SUD, with co-occurring mental health services also offered
 - Able to accept clients with mild to moderate mental health needs
 - Cannot accept clients with a diagnosis of schizophrenia or paranoia
 - Cannot accept clients with a history of significant violence
- Medically compliant:
 - No schedule I narcotics
 - No methadone, unless client is pregnant and currently taking methadone
 - Suboxone with taper accepted
- Children: may have up to two children that are 0-6 years old
 - Unable to accept children with moderate-severe autism, special needs (medically), or those requiring special diets
 - Screening is required for any child that has been moderately to severely sexually abused (the child's need may be beyond our care)

Referral and Admissions Process:

1. County makes a client referral to Tracy Ronning (contact info will be provided)
2. Mom completes a Chemical health Assessment, a Mental Health Assessment, and a Family Dynamics assessment (interview)
3. Admissions team reviews the client's CPS Plan and speaks with the CPS worker to clarify expectations about length of stay and visitation
4. Once a client is accepted into the CPS Program Track, Program Care team works with CPS worker to create a plan, including: goals, timelines, individual case plan, and establish communication and reporting routines
