Dr. Alfred W. Daviso III, Ph.D.

There are approximately 2.7 billion smart phone user and 1.35 billion tablet users. The average American checks their phone every twelve minutes and 90% of mobile time is spent on apps. 57% of all digital media use comes from mobile apps. Many users are adults and students.

These training sessions will introduce attendees to different apps for facilitating successful transition in the areas of employment, education and independent living for the transition student.

Dr. Alfred Daviso is a Professor at the University of Akron, the LeBron James Foundation School of Education. He is an instructor of special education there since 2004. He is the co-conference planner for DCDT and has published many professional articles.
