Free Cancer Screening

Visit www.mnsage.com | Call 1-888-643-2584

Screening saves lives.

- You may be at higher risk for breast or cervical cancer.
- American Indian, Black, and Asian Minnesotans are impacted by these cancers more than other groups, in part because of barriers to resources that support health.

Get screened!

- Screening can help prevent cancer from developing or find it early when it's easier to treat.

Services covered by Sage:

- A screening office visit every year where a clinical breast exam and pelvic exam are provided.
- A mammogram every year for those ages 40-64.
- A Pap test every 3 years, a Pap and HPV test every 5 years, or an HPV test alone every 5 years for those ages 30-64.
- Follow-up office visits and/or diagnostic tests whenever there is an abnormal breast or cervical screening result for those ages 30-64.

Sage does not cover treatment but uninsured patients may be eligible for treatment services through Medical Assistance for Breast and Cervical Cancer (MA-BC).

Take part in this free cancer screening program if:

- You are 30-64 years old.
- You do not have health insurance.
- You have health insurance but have a co-pay or unmet deductible.
- Your health insurance does not cover Pap tests or mammograms.
- Your household income is within guidelines.

2025 Income Guidelines

Household Number	Monthly Income	Yearly Income
1	\$3,260	\$39,125
2	\$4,406	\$52,875
3	\$5,552	\$66,625
4	\$6,698	\$80,375
5	\$7,844	\$94,125
6	\$8,990	\$107,875
Add for each additional	\$1,146	\$13,750

Note: If self-employed or farmers, use household net income (after business expenses), or contact Sage for help. Guidelines change yearly.
