

Things to keep in mind when planning an event:

- **Licensee responsibility**

- Event organizers are subject to penalties for violations that occur at the event (19 CSR 100-1.020(3)(E)).
- Licensees must ensure all participants (including vendors and outside parties) understand compliance requirements.
- Licensees must take measures to prevent, address, and report violations.

- **Distribution and transactions**

- Any transfer of marijuana product, even if free, is considered distribution.
- Only licensed dispensaries may distribute marijuana.
- Cultivation and manufacturing licensees must transfer product to a dispensary before distribution.
- All transaction orders must originate directly from the consumer, qualifying patient, or primary caregiver (in person, by phone, or online).
- Product cannot leave the facility before payment is received, unless for delivery.
- Deliveries are limited to two individuals at the same address on the same day if not prepaid.
- Product that has not been purchased may not be stored outside the licensed premises and approved areas.
- See 19 CSR 100-1.180(2)(D) for transaction requirements.

- **Facility**

- Dispensaries must maintain a 1 facility agent to 3 consumers/patients/caregivers (combined) ratio in limited access areas (19 CSR 100-1.180(2)(A)3).
- “Licensed premises” includes the physical structure and surrounding areas used for licensed functions (e.g., parking lots if included in the licensed premises).
- Consumption of marijuana on the licensed premises is prohibited, including during events (19 CSR 100-1.100(4)(M)).
- There is no scenario where a licensee or agent ID holder working for a licensee may give away, sell or otherwise distribute marijuana to anyone unless they are doing so in an approved area of the dispensary facility.
- Product must be properly entered into Metrc before distribution.
